TEN DOLLARS

1972 EDITION

STANDARD CATALOG of WORLD COINS

by Chester L. Krause
and Clifford Mishler

FEATURING:

- 261 Countries
- Covers From Mid-1800s To 1971
- Over 15,000 Original Photographs
- Over 30,000 Coins Listed by Date
- Complete Mintage Statistics, Values
- 800 Pages

STANDARD CATALOG of
WORLD COINS

by Chester L. Krause and Clifford Mishler

— Contributing Editors —
Clement F. Bailey, George Blenker,
Fred B. Green, Doug Watson, Glenn Wright

Photography by Fred Baerwald

All the knowledge that we mortals can acquire is not knowledge positive, but knowledge comparative, and subject to the errors and passions of humanity.

INTRODUCTION

This volume is designed to fill a need which has come into growing evidence in recent years as the expanding interests of the American coin collecting community have been ceaselessly shifting into the arena of world coin issues. The absence of a single, comprehensive standard catalog to which collectors could turn as they sought guidance has tempered the growth of that interest.

That cataloging deficiency is filled with the publication of this time which covers, by date, the world's coin issues from the mid-1800s right down through 1971. The arrangement of this catalog is such that it will provide the novice with a guide for the direction of his efforts, at the same time it provides the advanced collector with the detailed background he desires.

This work is basically a compilation of the digested knowledge which students of the numismatic science have contributed to the coin collecting hobby through the years. Gathered from a multitude of sources, it has been assimilated into a single, coordinated package. Still, much virgin ground is being plowed, as comprehensive listings did not exist, or were inadequate in a number of instances, demanding the compilation of originals.

Original date listings for a string of countries stretching from western North Africa through the Middle East are presented. They include Morocco, Tunisia, Egypt, the Sudan, Iran and Afghanistan, along with Turkey. Several countries in Europe also came in for special attention, including France, Germany and Switzerland, while the Russian section, including Soviet Central Asia, is the most detailed ever offered in an American reference.

The China section is the most comprehensive ever presented, and is unlike any previous listing in that it incorporates photographs of hundreds of pieces never before illustrated. The Siam listings are also completely revised for this work, as are those of Nepal and Tibet, while British India and the native states are updated to include the latest available information. A special effort has also been made to provide a fully detailed, logical arrangement of the often bewildering counterstamped and early coin issues of the states of the Arabian peninsula.

The mid-19th century time line to which the starting dates for the national listings are tuned provides full coverage for the world coin issues which evidence the greatest overall collector interest. In all cases logical starting dates have been selected, which range accordingly where countries have enjoyed coinage histories stretching over several centuries, for example; British Empire coverage generally commences with the Victorian coinages of 1838, while the date is 1880 for the Himalayan Mountain kingdom of Nepal.

One of the primary keynotes of this volume is an aim to provide the collector with a complete guide to the modern coin issues which are encountered for a given country, without arbitrarily ruling on their acceptability as legal coins. For this reason the compilations incorporate pattern, emergency or other non-national, non-circulating or pseudo, and similar coin issues which have gone unrecognized in most other catalogs.

Those issues falling outside the customary definitions of circulating legal tender, coin-of-the-realm emissions are handled on several bases. The early pattern and pseudo coin issues which have gained acceptance with advanced collectors, and which generally date from the late 1800s, are incorporated in the primary compilations. An appendix listing of modern non-circulating legal tender coins, which includes all proof set offerings, enumerates such issues which have been created for the collector market during the past 10-15 years.

All of the coins which are accorded first time recognition in a world coin catalog in this work are by no means controversial in origin, however, as the individual contributors to the national listings have also come up with substantial numbers of new dates, varieties and even types of coins which enjoyed regular issue status. Without exception, these contributors used as their guide not the fact that an issue had gained acceptance elsewhere, but that it exists and provides puzzlement to the uninitiated.

Another of the primary keynotes of this volume is its design as a visual identification guide. In assembling the book an effort was made to acquire and photograph each coin type listed. Although the ultimate objective was not achieved, only about 500 of the more than 8,200 listed coin types are not illustrated, most of which are among the seldom encountered gold issues. In all, more than 15,000 original photographs are represented, with both the obverse and reverse designs of each coin being presented, the most ever incorporated in any numismatic reference.

The catalog has been arranged alphabetically by country utilizing the popular name by which it is known to Americans, which in some cases contrasts to the legal or historical name. An index listing of countries, and coin issuing states or provinces, is also included which recognizes the various applicable name designations.

The listings are arranged according to the basic American system; i.e., by denomination, rather than type or period of issue, commencing with the smallest unit and working up the scale. Thereunder the arrangement is by known dates of issue. Although applicable catalog number designations from other works have

(Turn to page 5)

ACKNOWLEDGMENTS

It goes without saying that this book undoubtedly would not have materialized had it not been for the sincere interest and cooperation extended by numerous individuals. Topping out the list of those to whom special thanks must be extended are the collector-students who researched and compiled revised and original national compilations of coin issues especially for this catalog:

Steve Album
Albert Baber
Tim Browder
Colin Bruce II
Harvey Bruns
Ray Byrne
James Center
George Falcke
Kent Froseth
Sylvia Haffner
Lee E. Harvey
Pat Hogan
William Holberton
Robert Julian
Mel Kohl
Charles Panish
Harvey Rose
Albert J. Ruh
Robert Saiber
John Scheiner
Richard Trowbridge

This work is also enhanced greatly by the heavy infusion of coin photos, the presence of which also resulted from a high degree of interest and cooperation. The invaluable assistance contributed by the following individuals in making their collections available for the preparation of the original photographs prepared to illustrate this volume is acknowledged with sincere gratitude:

Ed Ackerman
Albert Baber
Lauren Benson
Tim Browder
Colin Bruce II
James Center
Pete Foerster
Mrs. K. M. Gaver
Sylvia Haffner
Lee E. Harvey
William Holberton
Byron Johnson
Robert Julian
Richard L. Lissner
William Pettit
Harvey Rose
Albert J. Ruh

The assistance provided by the following individuals in verifying listings, reviewing prices and supplying photographs which would have otherwise been missing has also contributed heavily to any success this effort may enjoy:

Ben J. Adams
J. A. Alemay
Al Almanzar
Fred Bertram
Walter Blank
Fred J. Borgmann
Richard Bright
Irv Brotman
Charles B. Byers
Charles G. Casey
Daniel K. E. Ching
Robert L. Clarke
Sam Clements
Charles Colver
Scott E. Cordry
Michael A. Cotta
Mrs. Aldona B. Davis
Mrs. Dolores H. Davis

INTRODUCTION

(Continued from page 3)

been retained for the convenience of collectors who use them, the basic system used in this work is self-cataloging, negating the demand for numbering.

While this work has been designed primarily to serve the American collector market, with all catalog valuations being entered in U.S. dollars, its photographic-date listing format will allow collectors throughout the world to use it with relative ease. For this reason we have incorporated a comprehensive table of foreign exchange covering the world's major currencies, which is, of course, subject to fluctuations in the world monetary markets.

The compilers accept the unavoidable fact that like other references, this work will have its errors and shortcomings. The reach is for perfection, however, and in seeking to attain that end each collector purchasing a copy of this catalog is inivited to offer criticisms pointing up errors or omissions, thereby contriubuting to an improved second edition.

A handy tear-out envelope form is bound in this volume between pages 32 and 33 which can be used for submitting any suggestions to the publisher. All collectors are urged to fill out and return this form, even if no suggestions for improvements are offered, as all who do will receive an addenda which will correct errors which have crept into this first edition and which will be published as an interim updating prior to the appearance of the second edition.

HOW TO USE THIS CATALOG

While the arrangement of this catalog is such that only a very minimal knowledge of world coins and coin collecting is demanded of those who use it, a few explanations covering its presentation are in order. Although the explanations which follow capsulize the general practices observed, however, they must not be considered as ironclad, as some compilations demanded alternate approaches which are appropriately noted where they pertain.

IDENTIFICATION

To utilize this catalog in determining the exact origin or value of a given coin, the first determination which must be made is that of the nation of origin. In the case of English speaking lands this is generally accomplished easily, as the coin legends usually incorporate the name of the country exactly as it appears at the head of the listings in this catalog.

Non-English speaking nations which have languages which utilize English-type alphabets, such as French, Italian and Spanish, are also relatively easy to determine. In many instances the name is spelled exactly the same in English as it is in the national language, while in other cases it varies only slightly, like Francaise for France, Italia for Italy and Belgique or Belgie for Belgium.

This is not always the case, however, as it is Norge for Norway, Espana for Spain and Sveriges for Sweden, while the German designation is Deutsches Reich or Deutschland. Thus, in some cases a little schooling in the rudiments of foreign languages is helpful. In general, the colonial possessions of these English-type alphabet countries are similarly identifiable.

If a coin bears legends in the Cyrillic alphabet it can be readily attributed to the Russian lands, along with the Slavic and Baltic states. Similarly, coins bearing lettering in the Greek Alphabet must originate from Greece, while Amharic alphabetic characters are symbolic of Ethiopia, and so on. Dragons and sunbursts, along with their distinctive written characters, easily identify coins from the Oriental countries.

Cyrillic

Greek

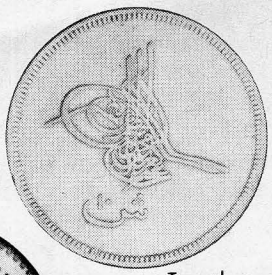
Amharic

Oriental

The most difficult grouping of coins to identify originate from the Arab regions, stretching from North Africa in the west through the Middle East to Afghanistan and the Indian subcontinent. Although the task is often eased on the more modern pieces by the presence of English-type lengends, in addition to the Arabic legends, for the earlier issues it is often a case of seek and find for the uninitiated.

Except for the cruder issues, however, it will be found that certain characteristics and symbols used in addition to the often predominating Arabic legends are typical of coins from a given group of countries, or a single country. The toughra monogram, for instance, occurs only on the coins of Afghanistan, Turkey, Egypt, the Sudan, Pakistan and some of the Indian native states.

Arabic



Toughra

Trident with Sanskrit legend

Coins of the Indian native states often appear quite similar in style to the Arab issues, even to the presence of Arabic legends. In other cases, however, they bear Sanskrit alphabetic characters. A predominating feature on early issues from the Indian subcontinent area is a trident.

With these guides to go by, a little comparative research in matching coins to photos should bring forth positive identification of any coin which originated during the era encompassed by this volume.

DENOMINATIONS

The second basic consideration in attributing a coin is the determination of denomination. As denominations are generally indicated in numeric, rather than written form, in those countries which use Western-type numbering this usually proves to be no problem, again excepting those countries in the sphere stretching from North Africa through the Orient where symbols generally unfamiliar to Americans are employed. Even on some of the more modern issues from these latter areas, however, Western-type numerals are used.

The determination of a coin's denomination can also be of value in attributing the issue to its country of origin. Presented in the appendix of this volume is an alphabetical index of denomination names used for world coins. All units listed in this catalog are arranged in alphabetical sequence, with the names of the countries which have used them following similarly.

The following table charts the basic numeric designations carried on coins of Arabic, Oriental or Indian subcontinent origin. They are generally presented in prominent form on the coins, but it must be remembered that these representations are just that, and individual coin engravers have used widely varying styles on the various coin issues, much as do Western engravers. Where other numeric forms peculiar to a given country are employed they are so indicated in conjunction with the appropriate listing.

BASIC NUMERAL STYLES

WESTERN	1	2	3	4	5	6	7	8	9	0
ARABIC	١	٢	٣	٤ or ۴	٥ or ۵	٦ or ۶	٧	٨	٩	٠
ORIENTAL	一	二	三	四	五	六	七	八	九	十 (10)
INDIAN SUB-CONTINENT	৭	২	३	४	५	६	৩	८	९	০

DATING

The final basic consideration in attribution involves dating and here the problem becomes more difficult, as dating can be according to any one of a number of religious eras or regal periods. Although again most countries outside the North Africa through Orient sphere rely on Western date numerals and Christian era (A.D.) reckoning, there are instances, such as the Vatican, where coin dating is according to reign.

Countries of the Arabic sphere generally date their coins in accordance with the Mohammedan era (A.H.) which commenced on July 16 in the A.D. year 622 when the prophet Mohammed fled from Mecca to Medina. A formula is required to convert the dating, however, as they have used a lunar year of 354 days, which is about three percent shorter than the 365 days in a Christian year. Thus, to convert an A.H. date to A.D. a person must subtract three percent of the A.H. date (rounded to the closest whole number) from the A.H. date, then add 621.

The Mohammedan calendar is not always based on the lunar year (A.H.), however, causing some confusion, particularly in Afghanistan and Iran (Persia) where a calendar based on the solar year (S.H.) was introduced around 1920. These dates can be converted to A.D. by simply adding 621.

On the Indian subcontinent several different eras of dating have been observed. The two basic systems are the Samvat or Vikrama era which dates from 57 B.C., and the Saka era which is reckoned from 78 A.D. Dating according to both eras appear on the coins of several countries of the area, as well as the various native states.

Coins of Thailand (Siam) will be found dated by three different eras. The most predominate is the Buddhist era (B.E.) which originated in 543 B.C. Next comes the Bangkok or Ratanakosind-sok era (R.S.) which dates from 1782 A.D. (dates consist of only three numerals), followed by the Chula-Sakarat era (C.S.) which dates from 638 A.D., with the latter also applied on the coins of Burma.

Other calendars include that of the Ethiopian era (E.E.) which commenced 7 years, 8 months after A.D. dating, and that of the Jewish people (A.M.) which commened on October 7, 3761 B.C., while Korea claims a legendary dating from 2333 B.C. which is acknowledged in some of its coin dating. More detailed guides to the application of these and other less significant coin dating systems, and the numeral designations employed, are presented in conjunction with the appropriate listings.

The following table indicates the year dating for the various eras which corresponds to 1972 in our Christian calendar, but it must be remembered that there are overlaps between the eras:

Christian era (A.D.) — 1972
Mohammedan era (A.H.) — 1392
Solar year (S.H.) — 1351
Samvat era — 2029
Saka era — 1894
Buddhist era (B.E.) — 2515
Bangkok era (R.S.) — 190
Chula-Sakarat era (C.S.) — 1334

Ethiopian era (E.E.) — 1964
Jewish era (A.M.) — 5732
Korean era — 4305

Coins from the Orient are generally dated according to the year of the government, dynasty or reign, with the dates indicated in Oriental characters which usually read from the right to the left. In recent years, however, some dating has been according to the Christian calendar, and in Western numerals, while in Japan the Oriental character dating has been rearranged to read from left to right since 1948.

Some coins carry both the local dating and Christian dating. This is particularly true in the Arabic sphere, where the Mohammedan date may be indicated in Arabic numerals and the Christian date in Western numerals, or both dates may be represented in either Arabic or Western numerals. In general the date actually carried on a coin is indicated in the listing, with the Christian date in parenthesis. Issues which are not dated are indicated by the presence of the letters ND in the date column of the listings.

PHOTOGRAPHS

To reduce the problems of coin identification to their minimum, one of the primary focuses in assembling this volume was placed on the acquisition and presentation of actual size photographs of each coin type listed. The objective was virtually achieved, with all but about 500 of the more than 8,200 listed coin types being illustrated, most of which are among the seldom encountered gold issues.

All coin type photographs are presented in actual size; to the nearest ½mm up to 25mm, and to the nearest 1mm thereafter. Where slight changes in size are important to the identification of a coin type, actual millimeter sizes are stated. A millimeter scale follows:

NUMBERING SYSTEM

This volume does not project a new catalog numbering system to the collecting community, rather the election was to basically rely on systems which are already in force. This decision was arrived at for two basic reasons: first, when world coins are listed by date in line with the practice on U.S. coins they are self-cataloging; second, there is no need to confuse collectors by adopting a new numbering system.

The majority of the coins listed in this catalog are identified by the numbers assigned by R. S. Yeoman, or slight adaptations thereof, in his *Modern World Coins* and *Current Coins of the World* for the convenience of those collectors who maintain their collections by number. In some cases numbers assigned by William D. Craig in his *Coins of the World* (1750 - 1850 period) have been applied. Other more specialized works have also been consulted in the assignment of numbers, while some systems were originated by contributors to this catalog. In all cases, the origins of the numeric assignments are indicated.

METALS

The metal of issue for each coin denomination is indicated at the beginning of the date listing thereof, and thereafter whenever a coin type change encompasses a change in metal.

MINTAGES

The quantities minted of each date are indicated where the information is available, with quantities generally stated in millions, rounded off to the nearest 10,000. On quantities of a few thousand or less, actual mintage are generally indicated, a fact which can be determined by the absence of a decimal point in the stated figure.

CONDITIONS

Valuations are basically listed in three grades of preservation, they generally being good, very fine and uncirculated. It is not practical to apply sharply defined guidelines for these conditions, however, as coin quality-detail varies widely from country to country, particularly outside Europe prior to the early 1900s, excepting the home produced colonial issues of European powers.

Uncirculated coins represent the best obtainable condition of coins which have not been placed in circulation. In the cases of Arab, Asian and sometimes South and Central American coinages such coins often have poorly defined detail, particularly on the high points, which at first glance would appear to be wear. In some cases coins in uncirculated condition are virtually impossible to obtain, so they are not priced in that grade.

Very fine coins reflect a fair degree of wear at the fine points of the design, although in a relative sense they remain sharp overall. In the case of coin issues which are generally poorly executed, the original condition must be taken into consideration. Good condition world coins generally grade somewhat higher than the comparable quality in U.S. coins. Although they show considerable wear, with most points of detail smooth, all major portions of the design remain well defined.

VALUATIONS

All valuations entered in this catalog have been compiled and verified by panels of specialists in various countries and areas, with the values based on the American market and stated in terms of the U.S. dollar. For the convenience of U.S. collectors purchasing from foreign dealers, and also for foreign collectors using this volume, a comprehensive table of foreign exchange rates covering the world's 24 major currenices, in graduated increments from 5-cents through $500, is presented on the following pages. Those using this table are reminded, however, that although the rates were current the day this work went to press, they are subject to fluctuations in the world monetary markets.

— NOTES —

AFGHANISTAN

A landlocked kingdom called the crossroads of Central Asia describes Afghanistan. It has about 260,000 square miles for the 16.5 million people who call Kabul the capital city.

Alexander the Great first entered the country in 328 BC and in AD 652 the country fell to the Turks and they brought the religion, Islam. The Arabs fell to the Persians and Ghengis Khan invaded the country in the 13th century. Babar founded the Moghul dynasty in the 16th century and who is buried at the capital city, Kabul, which was his favorite. The first king was crowned in 1747 and since that time the throne has been occupied by a member of the Durrani tribe.

Afghan Persian (Dari) and Pushtu are the principle languages and these are the languages used on the coins. After 1919, dating is by the Mohammedan solar calendar (SH). 100 pul equal 1 afghani.

BARAKZAI DYNASTY

Hand Minted Silver and Gold

"W.K." numbers refer to L. White-King's "History and Coinage of the Barakzai Dynasty of Afghanistan."

Dost Muhammad, 1st Reign: AH 1239-55 (AD 1823-39); 2nd Reign: AH 1258-80 (AD 1842-63).

1 RUPEE

K Silver, 22-25 mm.

Type 1, in the name of Mahmud Shah Durrani.

ALBANIA

The People's Republic of Albania has a population of 2.1 million with an area of 11,000 square miles and the capital is Tirane (Tirana).

An independent Albania was established in 1443 to 1478 after overcoming the Turks. This was the only period of independence until 1912. At that time a provisional government was established. Mussolini's conquest of the country came in 1939. Germany took over the country when Italy surrendered in 1943. When Germany withdrew in 1944 the National Liberation Front (NLF) took control of the country. Since 1962 Albania has been a model ally with Communist China.

Shqiperi is the name found on the coinage of a country whose economic figures are unobtainable. 100 quindarka are equal to 1 lek which officially has no exchange rate.

ALGERIA

The Democratic and Popular Republic of Algeria is located in northwestern Africa with a 620 mile coastline along the Mediterranean Sea. The capital city, Algiers, overlooks a country that is 920,000 square miles, one third of the U.S., in size with a total population of 12.8 million people. Nearly all are Moslems and speak Arabic (official language) or French or Berber.

Algeria has seen the Phoenicians, Romans, Vandals, Byzantines, Arabs, Turks and finally the French in her history. France began to colonize in 1830. The Algerians recognize July 3, 1962 as their independence day, after the 132 year rule by the French.

The early coinage of the country was issued by various Turkish sultans. The coinage, after 1830 when the French took over, took on the pure French look and 100 centimes equaled one franc.

ANGOLA

This is a territory on the West Coast of Africa ruled by Portugal as an Overseas Province. The area is 481,351 square miles (14 times the size of Portugal) with a total population of 52. million and the capital Luanda is on the Atlantic Ocean.

The country is almost entirely Bantu in origin and four important tribal groups make up the bulk of the population. No one tribal language extends beyond the boundaries of the tribe, Portuguese is the only language common to the whole territory. The Portuguese first reached the land in 1483. By constitutional amendment the colony of Angola became an Overseas Province in 1951.

The coinage issues are typical of all issues of Portugal for their overseas departments. The name of the country, Angola, appears on one side and Republica Portuguesa on the opposite. 100 centavos equal 1 escudo.

ANNAM

Annam or Anam was a former empire and later a French protectorate of Indochina. It was nearly 800 miles long with an area of 57,000 square miles supporting a population of 6 million. The capital city of Hue, in the central coastal region, is in the middle of the northeast monsoon season and quite often typhoons cause loss of life.

The first rulers of Annam are supposed to have been part of the Chinese Imperial family. A succession of Chinese dynasties with interruptions of Annam independence is the main history of the country. The present day Annam is smaller than the original due to the French dividing the country and making Tokin and Cochin-China as separate states. The country is now divided between North and South Vietnam.

The obsolete coinage of Annam is pure Chinese types with cast copper cash pieces.

ANTIGUA

Antigua is a colony of the British West Indies comprising the island of Antigua (108 sq. miles), Barbuda (62 sq. miles) and Redonda (.5 sq. miles). The capital is St. John's on Antigua and the entire population of the colony is 55,000.

The island is 1,962 miles southeast of N.Y. It is part of the British Leeward Island and was once the center for the British fleets of Nelson, Rodney, Hood and Drake. It was discovered by Columbus in 1493, settled by the British in 1632, briefly occupied by the French in 1666 and ceded to England in 1667.

The language is English but the currency of the group is called the Beewee for the initials BWI (British West Indies Dollar) divided into 100 cents. All of the island groups now use the BWI which replaced pure British types in use since the early 1800s, and now obsolete.

ARGENTINA

The Argentine Republic has the famed city of Buenos Aires as the capital for a population of 23.3 million persons in an area of 1,073,700 square miles. This is the size of the U.S. east of the Mississippi River. It is located in the southern section of South America.

It was 'discovered' in 1516 by Juan de Solis, a Spaniard. A colony was established in 1580, which is now Buenos Aires. The first step to independence came on May 25, 1810 with the May Revolution. Independence from Spain came in 1816 on July 9. Unity of the country was achieved in 1853. Argentina has been ruled by a de facto government since 1966. It has 22 provinces, a federal capital district and a national territory of Tierra del Fuego.

100 centavos equal 1 peso and Spanish is the language of the country. In a monetary reform in 1970 100 of the old pesos were made equal to 1 new peso.

AUSTRALIA

Australia is the smallest continent and the largest island in the world. It is located in the Indian Ocean south of Indonesia. It has an area of 2,974,581 square miles with 12.4 million population. The capital is Canberra. The country is divided into six states and one territory.

Not much is known about Australia prior to discovery by the Dutch in the 17th century. In 1770 Captain James Cook explored the east coast and annexed it for England. January 26, 1788 marked the founding of the colony of New South Wales. That date is now observed as Australia Day. The first federal parliament came in 1901. In 1927 the seat of the government was transferred to Canberra. Complete autonomy is marked on October 9, 1942.

The British system of coinage was used until the decimal conversion took place in 1966. 100 cents now equal 1 dollar.

AUSTRIA

"Oesterreich" is a republic in central Europe. The area involved is 32,369 square miles with a population of 7.3 million. Vienna is the capital city. The current country is a tiny part of the former powerful Austro-Hungarian Empire.

The republic was established at the end of WWI. At the present time it is a federal republic composed of nine provinces. German is the native language of the state. In 1933 the depression lead to the establishment of a dictatorship. In March of 1938 Hitler invaded the country and added it to the German Reich. At the Moscow conference in 1943 the allies wanted to liberate Austria which was accomplished in 1945. It became a free state in 1955.

100 groschen equal 1 schilling at the present time but Austria has had several monetary reforms. Outstanding issues of Austria are the commemorative coins before and after WWII.

AZORES

Three island groups, 1,000 miles west of Portugal, make up the Azores. These islands are under the administration of the Republic of Portugal. The land area is only 922 square miles but stretches out over a distance of 340 miles in the Atlantic. The chief city is Ponta Delgrada.

1432 seems to be the traditional date when the Portuguese first appeared on the islands. From 1580 to 1640 the islands were under the influence of the Spanish but the final Portuguese authority came in the 1830-33 period. The official language is Portuguese.

The pure Portuguese issues for the Azores in the reis denominations is now obsolete coinage. Several issues of foreign coins were counterstamped to be used in the Azores. It is doubted if the Greeks or Romans knew of the islands but the coins of the Carthaginians have been found on the island of Corvo.

BAHAMAS

Commonwealth of the Bahama Islands has a population of 173,000 on an archipelago of long low islands that cover 90,000 square miles in the western Atlantic Ocean. The capital of the commonwealth is Nassau.

The Bahamas achieved self government on January 7, 1964. Their new constitution is dated May 10, 1969. The islands were discovered by Columbus in 1492. Spain later had the islands but made no attempt to settle them. The English became interested in 1629, British owners had them until 1717 when they were surrendered to the King of England. After that time they were a British Crown Colony. In the U.S. Civil War they were used by blockade runners and later in 1919 to 1933 they were used by bootleggers from the U.S.

100 cents equal 1 dollar and British coin types were used until the first Bahama coinage was issued in 1966.

BAHRAIN

An archipelago in the Persian Gulf off the mainland of Saudi Arabia. The 240 square miles of the island is hot and humid. Two-thirds of the population of 200,000 is concentrated in the two cities of Muharraq and the capital city of Manama. The official language of the indigenous population is Arabic and oil is the principle product.

Since the late 18th century the country has been ruled by the Khalifa family. A treaty of protection was entered into with the United Kingdom in 1861 and revised in 1892 and in 1951. This is the area where the British troops get credit for a full tour of duty after serving only one half of the required time.

The denomination 1 dinar is divided into 1000 fils. The banking requirements are met by the Bank of Baharain and branches of the British Bank of the Middle East.

BARBADOS

The most easterly of the Caribbean islands is Barbados. The island has an area of 166 square miles with a population of 250,000. The island is divided into 11 Parishes and the city of Bridgetown, which is the capital.

This island is the most densely populated areas in the world with 1,500 people per square mile. British sailors first landed in 1624. Since that time until the independence date of November 30, 1966 the island has been under uninterrupted British control. The House of Assembly which began its meetings in 1639 is the third oldest legislative body in the Western Hemisphere. In 1958-62 Barbados was one of ten members of the West Indies Federation but after that period it reverted to its former status as a self-governing colony.

The only genuine Barbados currency was an issue of copper tokens in 1788 and 1792 from the plantation of Sir Phillip Gibbs. Other issues are British.

BELGIAN CONGO

The former Belgian Congo was an area of 904,991 square miles with a population of about 13.5 million persons. The capital of the Belgian Congo was Leopoldville which since has been renamed Kinshasa and is the capital of Democratic Republic of the Congo.

The area was first explored by Stanley on behalf of the Belgian King, Leopold II. At first many nations laid claims to the area but in the Berlin Conference of 1885 the Belgian king was given possession of the country. It was his personal possession until he ceded it to Belgium in 1907. Push for independence and national pride started in 1950. Under pressure the Belgium government gave the Belgian Congo independence in 1960.

Early coins of the area carried the legend "Belgisch Congo or Congo Belge." The coinage of Belgian Congo is now obsolete.

BELGIUM

Brussels the capital of Belgium oversees a population of 9.7 million persons in an area of 11,780 square miles. A country in western Europe and ruled by a king puts Belgium in the position of being the crossroads of Europe.

Belgium received its name from one of the Celtic tribes, the Belgae, described by Caesar as the most courageous of all the tribes of Gaul. In the last century B.C. Belgium became a province of the Roman Empire. Then came the Germans in AD 300 followed by the Franks and then the Hapsburgs. Belgium was occupied by the Spanish, Austrians and the French, the Dutch took over in 1815. Belgium gained independence from the Netherlands in 1830. A neutral country in WWI and WWII it was occupied by the Germans in both wars.

The coinage of the country features the language of both French and Flemish. The double language appears on some coins while others may feature one or the other. In any event the mintage figures are equal. 100 centimes equal 1 franc.

BERMUDA

An archipelago in the western Atlantic Ocean and it is the most isolated island in the world. It has a total land area of 21 square miles which consists of many islands connected to make the "island" of Bermuda. The total population is 50,000 and the capital is Hamilton.

Bermuda was "discovered" in 1503 by the Spanish. A group of British colonists, headed by Sir George Somers, were shipwrecked for 10 months on the island in 1609. Their food consisted of the hogs that had been shipwrecked on the island more than seventy years before. The first name of the group was Sommer islands. For many years Bermuda was the outpost of British civilization. St. George is the Oldest English-speaking continuous settlement in the Western Hemisphere. June 8, 1968 is their constitution day.

Early coinage reflect hogs and Sommer island. Later issues are British types. Decimal coinage in 1970 carried designs native to the island, a British colony.

BHUTAN

Bhutan is a landlocked Himalayan kingdom between the Tibetan plateau and the Assam-Bengal plains of northeastern India. The capital city of Thimphu looks over an area of 19,000 square miles. Tibetan dialects are spoken by two-thirds of the 750,000 population.

The past history of the country is lost in obscurity but Bhutan is now trying to emerge from its feudal and isolated past. After more than three hundred years of local struggles a treaty was signed with the United Kingdom to use British India as a guide.

The monetary system is based on that of India. 100 paisa being equal to 1 rupee. Much of the local trade is still done with the barter system. The only Bhutanese monetary unit is the "tikchung" equal to half an Indian rupee. So far the only bank in the country is located in the border town of Phuntsholing with plans to locate in the capital city.

BIAFRA

Biafra was the Eastern Region of Nigeria. It was an area of 30,000 square miles with 14 million people. The original capital of Biafra was the city of Enugu.

For many years animosity between the Northern and the Southern sections of Nigeria had existed. In order to try and do away with the division Nigeria was reorganized from four regions into twelve states. This made the Eastern Region declare independence on May 30, 1967 under the leadership of Lt. Col. Chukuemeka Odmegwu Ojukwu. By October of 1967 Biafra had lost their capital city, Enugu. From that point they never were able to support a capital city. Diplomatic recognition was given to the state by Tanzania, Ivory Coast, Gabon and Zambia. By 1969 the original territory had been greatly reduced and another capital, Umuahia, had been lost.

Coinage reported to have been issued by Biafra appeared on the numismatic scene after Biafra surrendered January 20, 1970.

BOHEMIA-MORAVIA, PROTECTORATE

In March of 1939 two of the Western provinces of Czechoslovakia were incorporated into the German Reich as "autonomous protectorates." The four million people in the puppet state were headed by Baron Constantin von Neurath, the former German foreign minister. The capital was established at Prague. This German protectorate lasted until the 1944-45 winter and spring campaign of the Soviet armed forces in WWII.

These provinces were two of the older Austro-Hungarian territories taken from that former empire at the end of WWI and used to establish the new Czechoslovakia.

The first coin issues came about in 1940 with a zinc issue in old Czechoslovakian denominations. The last issue was in 1944 prior to the time Czechoslovakia was freed. At the time of issue 100 haleru were equal to 1 koruna with the inscription "Bohem und Mahren Cechy A Morava."

BOLIVIA

The Republic of Bolivia is often called the "Tibet of South America." A landlocked country in central South America with an area of 420,000 square miles and a population of 4.8 million has two capitals. La Paz has the seat of the government while Sucre is the legal capital.

Bolivia is a republic with many political problems. Modern Bolivia was once part of the Incan Empire. In 1825 Bolivia won independence from Spain. The Incas had been reduced to slavery by the Spanish since the 16th century. Since the introduction of independence in 1825 the country has had more than sixty revolutions, seventy presidents and eleven constitutions. Internal strife has caused the nation to lose great pieces of land to other countries.

Republica de Bolivia represents the official Spanish language on the coinage. 100 centavos now equal 1 boliviano.

BRAZIL

The Republic of Brazil takes up almost half of South America. It is the fifth largest country in the world and has 3.3 million square miles to take care of the 90 million population. The capital of Brazil was moved from Rio de Janeiro to Brasilia in 1960.

Brazil has 22 states, four territories and a Federal District (Brasilia). The country was discovered by the Portuguese navigator Pedro Cabral. He was sailing for India and sailed very far west to avoid the calms off of the coast of Guinea in Africa, it was then he discovered Brazil. It was ruled by Portugal until gaining its independence in 1822. In 1889 the Federal Republic was proclaimed. Revolutions have marked the current history with a new constitution being approved on January 24, 1967.

New coinage laws in 1967 made 1000 cruzeiros equal to 1 new cruzeiro.

PEDRO II

BRITISH CARIBBEAN TERRITORIES

B.C.T. (Eastern group) were part of the British West Indies Federation. The BCT consisted of British Guiana, Barbadoes, Leeward Islands (Antigua, Barguda, Redonda, St. Christopher (St. Kitts), Nevis, Anguilla, Montserrat, Sombrero and the British Virgin Islands), Trinidad & Tabago and the Windward Islands, (Grenada, The Grenadines, Dominica, St. Vincent and St. Lucia). Each had its own local government.

The idea of the coin issue was to eliminate the British types from circulation. The denomination was the British West Indies Dollar broken into 100 cents. The money was soon abbreviated to BWI and called the "beewee." The coins were first issued in 1955 and the last year of issue for the BCT was 1965. The only denominations struck were the 1/2, 1, 2, 5, 10, 25 and 50 cent coins. The major denomination the BWI or beewee dollar was not minted.

BRITISH GUIANA

A former colony of Great Britain on the northeast coast of South America. It covers an area of 83,000 square miles and had a population of 636,000 (prior to independence as the country of Guyana) and the capital city of Georgetown.

The original area of Guiana was sighted by Columbus in 1498. Other explorers increased European interest. The first settlement was made in the 16th century by the Dutch. For the next 150 years the territory alternated between the Dutch and the British with France also showing interest. After 1796 the British took control the country was ceded to the United Kingdom in 1814 and in 1831 it became a united colony. Guyana became a republic on February 23, 1970.

Dutch and English coins have been used in the country. Countermarked issues and cut bits from higher denominations have also been used. All coinage from the area as British Guiana is obsolete.

BRITISH HONDURAS

British Honduras is located on the east coast of Central America facing the Caribbean Sea. It has a total land area of 8,866 square miles with a population of 122,000. The former capital was Belize City but hurricanes inflicted heavy damage on the city so a new capital was selected. Belmopan was constructed 50 miles inland and is the current capital.

British Honduras was first visited by Europeans in 1502, by Columbus. In 1638 shipwrecked English seamen made the first settlement. Pirates, logwood cutters are included in the early history. Spanish claims were made until 1786. Britain took over and "The Colony of British Honduras" was established in 1840. It became a crown colony in 1862. The country has been traditionally called "Belize" and may take that name with independence.

British Honduras coins are typical British issues. 100 cents is equal to 1 B. H. dollar.

BRITISH NORTH BORNEO

This country is now part of Malaysia and is called Sabah. It has an area of 28,388 square miles with a population of 450,000. The current capital is Jesselton or Kota Kinabalu which is on the South China Sea. This former British Colony joined the Federation of Malaya to form the current Malaysia on September 16, 1963.

The British North Boreno Company first issued coinage with the North Borneo name in 1882. Coins of the Straits Settlements have also been current in North Boreno. The coins were based on the decimal system rather than on the British system. The issues were sporadic, ending in 1941.

All of the coins issued in the North Boreno period carry the "H" mint mark of the Birmingham Mint in Birmingham, England.

BRITISH WEST AFRICA

B.W.A. indicated the following British territories on the west coast of Africa: Gambia, colony and protectorate; Gold Coast, colony and protectorates including Togoland; Nigeria, colony and protectorate, including Cameroons; Sierra Leone, colony and protectorate.

Gambia, 4,467 square miles, Bathurst capital, total population is 389,000. Gold Coast (Ghana), 92,100 square miles, Accra is the capital and total population is 8 million. Nigeria, 356,669 square miles, Lagos is the capital and the population is 66.1 million. Sierra Leone, 27,699 square miles, Freetown is the capital and the population is 2.5 million.

The coinage with the place name of British West Africa is obsolete. The countries involved as the British West African group have been treated as individual states since 1955. The coinage ceased in 1957.

BRUNEI

A Sultanate and independent state in the British Commonwealth on the northwest coast of the island of Borneo on the South China Sea. It is a British-protected state and covers 2,226 square miles with a population of 112,000. The capital city is Brunei on the Brunei river.

It was once a powerful state but fell into decay and in 1888 became a British protectorate and in 1905 a British dependency. The chief export of the country is oil and it has to be exported to be refined.

The first coin issues of Brunei were issued in 1887 and were dated using the Era of Hegira or AH dating system. The dates on the coins were 1304 AH (1887 AD). The issues of 1967 carry the AD date. Coins of North Borneo and Malaya have also been used in Brunei. The current denomination is 100 sen equal to 1 dollar.

BULGARIA

People's Republic of Bulgaria takes up 42,785 square miles of area from the Black Sea across the central Balkan Peninsula. The capital of Sofia oversees the population of 8.4 million.

Bulgaria was named from an ancient Turkic tribe in the seventh century. The Ottoman Turks ruled Bulgaria for 500 years until 1878. A Bulgarian kingdom independent of the Turks was declared September 22, 1908. Bulgaria won the first Balkan War against the Turks in 1912 but lost the Second Balkan War in 1913. Communist rule in Bulgaria began on September 9, 1944.

The Bulgarian Communist Party controls all phases of Bulgarian life. The coin issues by the party depict various phases in Bulgarian history, such as the 1100 anniversary coin of the Slavic alphabet or liberation from the Turks. 100 stotinki equal 1 lev the monetary system.

BURMA

The Union of Burma has an area of 262,000 square miles and is the largest country on the Southeast Asian mainland. The population is 27 million and the capital is Rangoon. It has the same latitude as Mexico but has a monsoon climate with coastal rainfalls of more than 200 inches per year.

Burma was unified for the first time in the 11th century. It remained independent until 1287 when the Mongols moved in and destroyed the order. Five centuries of internal disorganization then followed. Burma was annexed to the British between 1824 and 1886 (years of the Anglo-Burmese wars). As part of British India it remained for the next hundred years. In 1937 it was separated from India with limited self government. A revolutionary government was established in 1962.

Many languages are used but Burmese is the official language. 100 pyas equal 1 kyat.

BURUNDI

A Republic in East Central Africa which was once a part of German East Africa and a former U.N. Trust Territory of Ruanda-Urundi. The area is 10,744 square miles with a population of 3.4 million persons and is a country with many villages. The capital is Bujumbura which is located on Lake Tanganyika.

A feudalistic society with a caste system was the character of Burundi until the country became a self government with limitations in 1961. Independence came in 1962 and Captain Micombero took over the government in 1966 and declared it a republic.

Gold and silver coins have been issued in recent years for Burundi but it is doubted if the coinage was designed to be used in a country where the families live on the hillsides in huts next to the banana patches. The monetary system is 1 franc divided into 100 centimes.

CAMBODIA

Cambodia is also called the Khmer Republic. This country has 66,000 square miles on the Southeast Asian peninsula. There are 7 million people ruled from the capital of Phnom Penh.

Cambodia first appears as a vassal of the Empire of Funan, AD 100-500. In the 6th century the Empire was overthrown and the ruler Kambu Svayambhuva gave his name to the modern version "Cambodia." In 802 the start of the vast Khmer empire came about. This included Thailand, Laos and South Viet-Nam as well as Cambodia. After the 14th century their power declined and they lost their territories. The French took over in 1863, Japan in 1940, Vichy France most of WWII, 1946 French protectorate, 1949 French Union, 1953 independence. The French fought for eight years, from 1946 to 1954, in the area.

100 centimes equal 1 franc, Khmer is the common language.

CAMEROON

Two states make up the Federal Republic of Cameroon. East Cameroon (formerly the Republic of Cameroon) and West Cameroon (formerly the southern part of British Cameroons). It has a total area of 183,381 square miles, the capital city is Yaounde and the country population is 5.7 million.

The Portuguese made the first contact with the country in the 1500s. Modern history began in 1884 when Germany, Great Britain and France wanted the area. After WWI the country was divided between France and Britain. In October 1961 the East and the West were reunified and the republic was realized.

Cameroon is a partner in the new Economic and Customs Unit of Central Africa (UDEAC) which replaced the Equatorial Customs Union (UDE). Coins of French Equatorial Africa, Equatorial African States and now its own Central Bank have been used.

CANADIAN COINS

The history of Canadian coinage parallels that of the United States in many respects, although in several aspects it also contrasts quite sharply. Canadian coins are widely collected in the U.S., particularly in the northern tier of states, where at times the issues of our northern neighbors have been encountered in substantial circulating quantities.

This is a most logical situation, as when the dollar was established as the monetary unit of Canada, in 1857 it was given the same intrinsic value as the U.S. dollar. Through the years the Canadian dollar has traded on an approximate par with the U.S. dollar, although from time to time one or the other units has traded at a slight premium.

The first Canadian decimal coins were issued in 1858-59 — 1, 5, 10 and 20 cents — in the name of the Province of Canada (Upper and Lower Canada, or the provinces of Ontario and Quebec as we know them today). The first truly Canadian coinage was offered in 1870 — 5, 10, 25 and 50 cents — following the confederation of these provinces with Nova Scotia and New Brunswick in 1867. Both of the latter had offered their own distinctive coinages in the early 1860s.

Prince Edward Island also offered a single issue of a one cent coin in 1871, prior to its 1871 entry into the confederation. A coinage for Newfoundland was also initiated during this period, in 1865, which continued through 1947, with the British dependency moving into the confederation in 1949.

In contrast to the .900 fine standard of American silver coins, Canada's coinage was originally launched with a .925 fine silver content, and as a result slightly smaller coin sizes. In 1920 the standard was reduced to .800 fine, remaining there until mid-1967 when it was lowered to .500 fine, then abandoned in favor of pure nickel a year later. Another contrast with U.S. coinage was evident in the issue of the large cent from 1858 to 1920, when a small cent of similar size, content and weight to the U.S. cent was introduced.

When Canada's dominion coin issue of 1870 was introduced, the 1858 provincial issue of a decimal 20 cent piece was abandoned in favor of a quasi-decimal 25 cent piece. This move was made, in part, because of the confusion between the 20 cent piece and the U.S. 25 cent piece, which also circulated in Canada, forecasting the similar fate which would befall the U.S. 20 cent piece a few years later. Although tentative steps aimed at the creation of a dollar coin were instituted in 1911, it was not until 1935, the year the issue of silver dollars was halted in the U.S., that Canada launched the issue of a silver dollar.

The first dollar was a commemorative of the silver jubilee of the reign of George V, while the other George V dollar coin (1936) utilized dies which had been prepared at the Royal Mint in London in anticipation of the 1911 dollar which did not materialize. From the beginning, Canada's dollar series has been frequently employed as a vehicle for the commemoration of national events. In addition, a 1951 nickel commemorated the 200th anniversary of the isolation of nickel, of which Canada is the world's leading producer, while the entire 1967 series commemorated the centennial of Canadian confederation.

In the early years Canada's coins were struck in England at London's Royal Mint or at the Heaton Mint in Birmingham. Issues struck at the Royal Mint do not bear a mintmark, but those produced by Heaton carry an "H." All Canadian coins have been struck at the Royal Canadian Mint in Ottawa since January 2, 1908, excepting some 1968 pure nickel dimes struck at the U.S. Mint in Philadelphia, and do not bear mint marks. Ottawa's mintmark (C) does appear on some 20th century Newfoundland issues, however, as it does on English type sovereigns struck there from 1908 through 1918.

Canadian coins are graded on standards similar to those used for the U.S. series. The points of greatest wear are generally found on the obverses in the bands of the crowns, the sprays of laurel around the head and in the hairlines above or over the ear. The susceptibility of these varying points to wear has decreed that Canadian coins are almost exclusively graded accordingly, with little concentration on the reverses, unless they are abnormally worn.

Those who become seriously interested in the collecting of Canadian coins will find membership in the Canadian Numismatic Association beneficial. The organization publishes a scholarly monthly journal for its members. Full details on membership may be obtained by writing to:

SOVEREIGNS

In ten of the first twelve years of its existence the Royal Canadian Mint branch in Ottawa, like other branches of the mother facility in London, struck sovereigns of the identical designs and specifications as the corresponding English issues. They may be distinguished by the presence of a "C" (Canada) mintmark concealed in the ground beneath St. George's horse and just above the date on the reverse. Issues struck during the World War I period were primarily used to help pay for was materials that England purchased from the U.S., saving the risk of sending London minted gold coins across the Atlantic.

CAPE VERDE ISLANDS

Cape Verde Islands are an overseas territory of Portugal. They are volcanic islands off the bulge of West Africa. They have an area of 1,557 square miles with a population of 245,000. The capital of the group is Praia on the island of Sao Tigao.

The first settlers on the group were imported slaves from the African coast. The Portuguese government freed the public slaves in 1854. In 1857 gradual abolition of slavery was arranged. By 1876 the last slave was liberated. The language is an offshoot of Portuguese called Lingua Creoula. One of the island group serves as a station for the submarine cable from Portugal to Brazil.

Portugal supplies typical provincial coinage for their "Cabo Verde" with their name on one side and Republica Portuguesa on the other. 100 centavos equal 1 escudo.

CEYLON

Ceylon is a pear-shaped island located in the Indian Ocean southeast of India. The area of the island is 25,332 square miles for its 12.5 million population. The capital is Colombo and the official language is Sinhalese.

It is estimated that the 6th century BC saw the first of the Veddahs as the earliest known inhabitants of Ceylon. The Portuguese were the first Europeans to come to Ceylon and from 1505 began to gain control of the island. In 1638 the Dutch entered the island due to the cinnamon trade and within twenty years had replaced the Portuguese. The Dutch lost out to the British in 1796. Ceylon remained a British crown colony until 1931. Their independence day is February 4, 1948. Ceylon is a member of the British Commonwealth.

The monetary system is 100 cents equal to 1 rupee. They converted to a decimal system of coinage in 1870. Outstanding current issues are the coins for the F. A. O.

CHAD

Chad is the largest country of the former French Equatorial Africa with 495,792 square miles of area. The landlocked country is located in the heart of Africa with a population of 3.4 million and the capital city of Fort Lamy.

Many ancient Arab manuscripts and modern findings indicate that societies existed around Lake Chad more than 1,000 years ago. Many artifacts made between the 9th and 16th centuries have been found in the Logone and Chari River basins which were made by the Sao. The Sao disappeared from Islamic political pressures. The French went into Chad in 1891 and the final battle for Chad was fought near Fort Lamy in 1900. The territory of French Equatorial Africa was dissolved in 1959. On August 11, 1960 Chad became an independent nation.

French is the official language and the monetary unit is the CFA (Colonies Francaises d'Africa) franc.

CHILE

Chile is located on the southwest corner of South America. It has an area of 292,000 square miles in a country that is long and narrow. More than 2,650 miles of coast line is claimed by the Pacific Ocean and the country has an average width of only 100 miles. The population is 9 million and the capital is Santiago.

Chile was first settled by the Spanish, and became a part of the vice-royalty of Peru. A few centuries of this rule and Chile then proclaimed a national government on September 18, 1810. Independence wasn't achieved until 1818. A stream of German immigration started in 1850 and lasted for ninety years. Because of high mountain peaks and deep ocean depths the area has a geological instability which makes for severe earthquakes.

Republica de Chile is the name found on the coinage as Spanish is their language. Numerous coinage reforms have been made. 100 condores equal 1 escudo-currently.

CHINA

Cast coins in base metals were used in China many centuries before the Christian era, but locally struck coinages of the western type in gold, silver, copper and other metals did not appear until 1889. In spite of the relatively short time that modern coins were in use, the number of varieties is exceptionally large.

Before 1912, China was ruled by an imperial government. The republican administration which replaced it was itself supplanted on the Chinese mainland by a communist government in 1949, but it has remained in control of Taiwan and other offshore islands in the China Sea with a land area of approximately 14,000 square miles and a population of more than 14 million. The Peoples Republic of China administers some 3.7 million square miles and an estimated 800 million people. This communist government, officially established on October 1, 1949, was admitted to the United Nations, replacing its nationalist predecessor, the Republic of China, in 1971.

Both nationalist and communist China, as well as the pre-revolutionary imperial government and numerous provincial or other agencies, including some foreign-administered agencies and governments, have issued coins in China. Most of these have been in dollar or dollar fraction denominations, based on the internationally used silver crown, but coins in tael denominations were issued in the 1920's and earlier. Coin issue was largely suspended between 1937 and 1950, but it has since been resumed in both mainland China and in Taiwan, notably the latter.

DATING

Most struck Chinese coins are dated by year within a given period, such as the regnal eras or the republican period shown at the right. A 1907 issue, for example, would be dated in the 33rd year of the Kuang Hsu era (1875 + 33=1907) or a 1926 issue is dated in the 15th year of the Republic (1912 + 15=1926). The mathematical discrepancy in both instances is accounted for by the fact that the first year is included in the elapsed time. Modern Chinese communist coins are dated in arabic numerals using the western calendar, but earlier issues use conventional Chinese numerals. Still another method is a 60-year, repeating cycle, outlined in the table below. The date is shown by the combination of two characters, the first from the top row and the second from the column at left.

	庚	辛	壬	癸	甲	乙	丙	丁	戊	己
戌	1850 1910		1862 1922		1874 1934		1886 1946		1838 1898

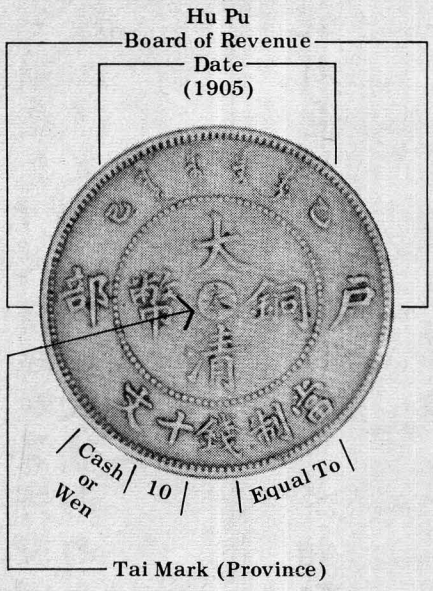
Provincial Names and Other Source Indicators	Single Character (1)	Full Names (Right to left reading)
Anhwei Also: An-hwei, Anhui	(Huan) 皖	安徽
Chekiang Also: Cheh-kiang	(Che) 浙	浙江
Chihli Also: Hopei (after 1928)	(Chih) 直	直隸
Chitung (Japanese puppet)		冀東政府
Chinese Soviet		中華蘇維埃共和國
Ch'ing Dynasty		大清(2)
Ching-kiang Also: Tsing-kiang	(Huai) 淮	清江
Fukien Also: Foo-kien, F.K.	(Min) 閩	福建
Fengtien Also: Fung-tien, Fun-tien, Manchurian Provinces	(Feng) 奉	奉天
Heilungkiang Also: Hei Lung Kiang		黑龍江
Honan Also: Ho-nan	(Pien) 汴	河南
Hunan Also: Hu-nan	(Hsiang) 湘	湖南
Hupeh Also: Hupei, Hu-peh	(O) 鄂	湖北
Hu Pu (Board of Revenue) Also: Hu Poo	(Hu) 戶	戶部
Kansu		甘肅
Kiangnan Also: Kiang Nan	(Ning) 甯	江南
Kiangsi Also: Kiang-si, Kiang-see	(Kan) 贛	江西
Kiangsu Also: Kiang-soo	(Su) 蘇	江蘇
Kirin	(Chi) 吉	吉林
Kwangsi Also: Kwang-si	(Kuei) 桂	廣西
Kwangtung Also: Kwang-tung	(Yueh) 粵	廣東
Kweichow Also: Kweichou	(Ch'ien) 黔	貴州
Manchukuo (Japanese puppet)		大滿洲國
Mengchiang (Japanese puppet)		蒙疆銀行(2)
Peoples Republic (Communist)		中華人民共和國(3)
Peiyang (Tientsin mint) Also: Pei-yang, Pei Yang		北洋
Republic of China (Nationalist)		中華民國
Sinkiang (Chinese Turkestan) Also: Sin-kiang, Sungarei		新疆
North China (Japanese puppet)		中國聯合準備銀行
Shansi	(Shan) 山	山西
Shensi Also: Shen-si	(Shan) 陝	陝西
Shantung Also: Shan-tung, Shang-tung	(Tung) 東	山東
Szechuan	(Ch'uan) 川	四川
Taiwan Also: Tai-wan	臺	臺灣
Yunnan Also: Yun-nan	(Yun) 雲	雲南
Yunnan (Alternate reading)	(Tien) 滇	

(1) Single-character designators for provincial or regional mints are used primarily on copper coins of the Tai Ching Ti Kuo series
(2) Vertical readings predominate
(3) Reads left to right

Reading Tai-Ching-Ti-Kuo Coins



Coins dated after 1916 have date symbols at 3 and 9 o'clock. (Hu Pu removed.)

MONETARY UNITS

CHINESE TURKESTAN

Chinese Turkestan is also known as Eastern Turkestan. It is the Sinkinag province in North West China. It has an area of 660,000 square miles for an estimated population of 5.1 million. The capital city of the province is Urumchi.

This area is bordered on the North and West by USSR, on the East by Mongolian People's Republic and on the South by Tibet and India. Most of the area is mountainous and most of the population are oasis-dwelling Uigurs. It is rich in minerals and oil resources. It has been ruled by Uigurs and the Mongols prior to the Chinese Ching Dynasty which took over in the area in 1756. In 1949 it capitulated to the Chinese Communists who then established the Sinkinang Province as the Uigur Autonomous region later in 1955.

10 miscals equaled 1 tael in the obsolete coinage.

COLOMBIA

Colombia is located in the northwest corner of South America. It has an area of 440,000 square miles for its 21.1 million population. The capital city is Bogota. It is the fourth largest country on the continent.

It was established as a Spanish colony in 1549, with Bogota as the capital then in 1717 Bogota became the capital of the Viceroyalty of New Granada (Venezuela, Ecuador and Panama). Along with Lima and Mexico City, Bogota, became one of the major adminstrative centers of Spanish possessions in the New World. July 10, 1810, Bogota citizens created a representative council in defiance of Spain. Total independence was declared in 1813 and Republic of Greater Colombia was formed in 1819.

The coinage of Columbia features Spanish and the busts of famous persons in the history of the country. The denominations are 100 centavos equal to 1 peso.

COMORO ISLANDS

Comoro Islands are now an autonomous French overseas territory formed from volcanic rock in the Indian Ocean. They have an area of 863 square miles and a population of 260,000 people. The capital of the group is Moroni which is on the island of Grand Comore, the largest of the group.

They were first visited by Europeans in the 16th century, and were recorded on a map of Diego Ribero in 1527. The influence at the time was Arab. Possession of one island was taken by France in 1843. Three other islands were placed under French protection in 1886. In 1908 they were placed under the authority of Madagascar. In 1946 they achieved the status of a French Overseas Territory. In 1961 they gained complete internal autonomy.

100 centimes equals 1 franc. Earlier coinage used the AH dating system and is obsolete. Typical French issues are now in use.

CONGO

The Democratic Republic of Congo is in the south-central part of Africa. It covers 904,747 square miles with a total population of 16 million. The former Belgian capital of Leopoldville is now called Kinshasa. Four of the more than 200 languages and dialects are in major usage.

The Congo is claimed to have been populated as early as the stone age. The first explorations by the Portuguese found the Bankongo Kingdom which is now separated into Congo (Brazzaville), Congo (Kinshasa), Cabinda and Angola. The Belgian sovereign gave the Congo, his personal possession since 1885, to the Belgian country in 1907. Several upheavals have taken place, most of them in the 1960 period, before entering a political calm in 1967.

Belgium issued coinage from 1887 to 1948. Coins issued from 1952-1960 were for Congo, Ruanda-Urundi. Congo now issues coinage from the National Bank of Congo.

COOK ISLAND

A series of islands which takes up 89 square miles of land scattered over 850,000 square miles of the Pacific Ocean. The island group has a population of 20,000 and the capital city is Rarotonga. They lie near the French Polynesian group and are southwest of Samoa.

Captain James Cook sighted part of the island group while on the second of his three explorations and voyages in the South Pacific. The island group was placed under the administration of New Zealand in 1901. In 1965 they became a self-governing unit for internal affairs.

New Zealand coinage has always been used as the official money of the islands. The conversion of the coinage of New Zealand in 1967 changed the Cook Islands monetary system to 100 cents equal to 1 dollar. The first pure Cook Islands issue was in 1970 when they issued a 1 dollar commemorative for the bicentennial of Cook's voyages.

COSTA RICA

Costa Rica is in the southern section of Central America between Nicaragua and Panama. It has a population of 1.8 million in 19,700 square miles of area. The capital city is San Jose.

Christopher Columbus discovered Costa Rica in 1502. It remained a Spanish colony from 1522 until independence in 1821. Spanish is the official language but the primary language is a Jamaican dialect of English. Costa Rica is divided into seven Provinces which are subdivided into cantons and districts. The modern political era was started in 1889 free elections. Costa Rica is considered to be a democratic republic.

Several monetary changes have marked the coinage issues of the country. They converted to decimal system in 1864. One of the notable marks on their coinage is B. C. C. R. which means Banco Central de Costa Rica.

CRETE

Crete is the largest of the Greek islands. It has an area of 3,199 square miles with a population of half a million. The capital of the island is Khania or Canea.

Crete in the 19th century was almost in constant upheaval due to a series of insurrections. They started in 1821 and were followed by other in 1833, 1841, 1858, 1866-68, 1878, 1889, 1896 and a general rebellion of 1897. At this time Greece came into the picture. In 1899 they established an autonomous Crete government. Cession of Crete by Turkey to Greece came about in 1912 and since that time it has been a province of Greece.

The obsolete coinage of Crete issued under the jurisdiction of the Greeks is dated 1900 and 1901. The denominations were 100 lepta equal to 1 drachma.

CUBA

Republic of Cuba lies on the northern boundary of the Caribbean Sea, 90 miles west of Florida. It has an area of 46,000 square miles with a population of 7.9 million. The capital is Havana, the Spanish is Habana.

Cuba was discovered by Columbus in 1492. In 1511 a Spanish governor came to colonize the island. In 1519 he established Havana, which then became important as the crossroads between Spain and her colonies. The drive for independence was started in 1850 which started a 10 years war. In 1898 Spain relinquished its rights over Cuba. Three years of American adminstration was started, independence came in 1902. In 1952 a president seized the presidency prior to elections. In 1953 a revolt was turned back but was eventually successful and a new regime came on the scene in Cuba, in 1958. No national elections have been held since that time. 100 centavos equal 1 peso.

CURACAO

Curacao was once a Netherlands colony and is now part of the Netherlands Antilles, which is the official name but is actually called the Nethlands West Indies. It covers an area of 403 square miles and has a population of 150,000. Willemstad is the major city of Curacao.

English, Spanish and Dutch are spoken with the native language of Papiamento being a combination of all three with a mixture of Portuguese. Netherlands acquired the island from Spain in 1634. The British had possession of it twice in the early 19th century then it was again taken by the Dutch and retained. Curaco is considered to be one of the A-B-C islands of the Dutch in the West Indies, Aruba, Bonaire and Curacao. The color of the houses on the island are every color but white. A Dutch governor received headaches from the tropical sun on the white houses, so he passed a law that no houses could be painted white. 100 cents equal 1 gulden.

CYPRUS

The Republic of Cyprus is the third largest island in the Mediterranean Sea having an area of 3,572 square miles with a population of 630,000. The capital of the country is Nicosia.

Cyprus, for most of its history, has been rules by outsiders. 800 years of rule by the Greeks was followed by the Turks in 1571. In 1878 it was transferred to the British. In 1914 it was formally annexed by the United Kingdom and became a Crown Colony in 1925. Cypriot independence was declared on August 16, 1960. Political problems still are in force on the island. About 78% consider themselves Greeks, 18% are Turkish with the rest a mixture of other minority groups.

Most of the coinage releases have been British types. 9 piastres equal 1 shilling.

CZECHOSLOVAKIA

Czechoslovak Socialist Republic is in the heartland of Europe. It has 49,000 square miles of area with a population of 14.2 million persons. The capital is Prague. The languages are Czech, Slovak, German, Hungarian, Ukrainian and Polish.

The independent state of Czechoslovakia was formed after WWI, the territory was formerly a part of the Austrian-Hungarian Empire. The Czechs had lost their national independence in 1620 and the Slovaks had been ruled for the past thousand years by the Hungarians. So in 1918 they were drawn together in a common state. 1939 saw the Germans set up a puppet state of Slovak Republic. Russia liberated most of the area in 1944-45. The Communists came to power in 1948. The current constitution came into being in 1960.

The coinage of the country features the name Ceskoslovenska. 100 haleru equal 1 koruna.

DANISH WEST INDIES

A group of islands in the West Indies of which most are uninhabited. The principal city is Charlotte Amalie which is on the island of St. Thomas. The area involved is about 173 square miles of land with a population of 75,000. The islands are now the U. S. Virgin Islands.

Columbus found them in 1493. The Spaniards drove away the Indians and in 1625 the Dutch and English drove out the Spaniards. The French were in the area from 1651 to 1695. The first Danish settlement was made in 1653. In 1671 the Danish West Indian Company owned St. Thomas and St. John and purchased St. Croix from the French in 1733. In 1754 the Danish government purchased the West Indian Company. The U. S. purchased the islands in 1918 to prevent them from falling into German hands menacing the Panama Canal. The cost was $25,000,000.

The coinage of the Danish West Indies is obsolete.

DANZIG

Danzig, a Baltic port city, was the adminstrative seat of the autonomous territory called Freie Stadt Danzig or Free City of Danzig. A state established by the Treaty of Versailles in 1919 which had a boundary of 147 miles.

Danzig was aligned with Poland from the 13th to the 18th centuries. A trading post city between the East and the West it was assigned to Prussia (Germany) by the Vienna Conference of 1815. In 1919 it was made a Free City but by the end of 1937 it was controlled by the German gestapo and taken by Germany. Following WWII it became a part of Poland and is now known as Gdansk, Poland.

100 pfennig equaled 1 mark on their first coinage from 1920-23. In 1923 a new currency was introduced based on the British pound sterling — gulden. 100 pfennig equaled 1 gulden. Their last coinage was dated 1932 and is now obsolete.

DENMARK

Copenhagen is the capital of "Kogeriget Danmark" or the Kingdom of Denmark, which is the smallest of the Scandinavian nations. A kingdom in northwestern Europe, the Head of State, King Frederik IX, is charged with ceremonial functions while the Prime Minister along with cabinet ministers run the government. The 4.9 million people live in 17,000 square miles of land which is completely productive.

Denmark was a great power in the Viking period and then reached her peak in the 14th century. At that time—Norway, Sweden, Finland, Faroe Islands, Iceland and Greenland—were under the Danish crown. Alliance with a defeated Napoleon caused land losses in 1814.

Coinage established under the Scandinavian monetary convention in 1872 is marked with the official Danish language. The krone—the basic unit—is divided into 100 ore. The Copenhagen mint mark is a heart.

DJIBOUTI
(Somalia Coast)

A seaport and now capital city of French Somaliland. This Arab city is the terminus of the Addis Ababa-Djibouti Railroad located on Tadjura Bay at the western-most end of the Gulf of Aden, and at the mouth of the Red Sea. A port was developed by the French Government after 1884 to tap the resources of Ethiopia.

COINAGE - RUPEE - TALER (RYAL) SYSTEM

COINAGE - RUPEE - TALER (RYAL) SYSTEM

Coins counterstamped (c/s) with 12 scollaped square with Arabic inscription. Sometimes coins have additional c/s's on the coin showing silver fineness.

DOMINICA

Dominica is one of the West Indies Associated States established in 1967 under the British Commonwealth of Nations. They are island territories with a built-in option for independence. Dominica covers 290 square miles in the Caribbean with a population of 80,000 and the capital is Roseau.

Dominica is often confused with the Dominican Republic, but Dominica lies between Guadeloupe and Martinique. It is the third largest British Caribbean island. It was discovered by Columbus in 1493. The Carib Indians fought colonization for more than 200 years. The French started the colonization process in 1783 and the British became permanent in 1805 after the island had changed hands from French to British fifteen times.

Dominica coinage, as such, dates back to the late 1700s with cut and countermarked silver pieces which are not dated.

DOMINICAN REPUBLIC

The Dominican Republic occupies the eastern two-thirds of the island of Hispaniola in the Caribbean Sea between Puerto Rico and Cuba. It has an area of 18,000 square miles with a population of 4 million. The capital is Santo Domingo.

Columbus "discovered" the island in 1492. Later the French settled the western end of the island which later was to become Haiti. In 1822 Haitians conquered all of the island and held it until 1844 when the Dominican Republic was established by driving out the Haitians. In 1861 they returned to Spanish domination. In 1865 independence was restored. U. S. occupied the country from 1916 to 1924. The current constitution was made in 1966 after several years of trouble.

100 centavos equals 1 peso for the monetary issues. The Spanish language is dominant and is the language on the coinage.

EAST AFRICA

British East Africa was the term used to describe the colony of Kenya and protectorate with the capital at Nairobi; Somaliland protectorate with the capital at Hargeisa (which doubles population in the cold season); Tanganyika trust territory with the capital at Dar es Salaam; Uganda protectorate with the capital at Entebbe; and Zanzibar a protected island sultanate with the capital at Zanzibar.

The East Africa commission comprised of the governors of Kenya, Tanganyika and Uganda administered taxes, development and research, transport and other central services in the political group called East Africa. One by one the various members of East Africa achieved independence and the organization of East Africa no longer exists.

The monetary unit was the East African shilling divided into 100 cents.

EAST GERMANY

The Soviet Zone of Germany uses East Berlin as the capital city. The zone has 17 million people in an area of 41,776 square miles. The area compares in size to the State of Tennessee.

On March 25, 1954 the U.S.S.R. announced that the German Democratic Republic (Deutsche Demokratische Republik DDR) was a "sovereign state." On May 14, 1955 the newly created state became a signatory of the Warsaw Pact along with the Soviet Union and her satellite states. A new constitution condifying the social, political and economic life of the Soviet zone was adopted in April 1968.

The coins produced for East Germany are minted in the East Berlin mint. They may or may not be mint marked with the famous "A" mint mark of Berlin. They have produced a series of coins commemorating famous Germans. The monetary unit is the Mark der Deutschen Notenbank — the mark.

ECUADOR

Ecuador straddles the Equator in South America and is the second smallest republic on the continent. It has 104,506 square miles with 5.5 million population. The capital is Quito.

The northern half of the Inca Empire fell to Spain in 1532. In 1563 the area conforming to present Ecuador was made a Royal Audiencia of Spain with the, current, capital city of Quito. This was later incorporated into the Viceroyalty of New Granada. Ecuador gained its independence from Spain in 1822. It was then joined to Greater Colombia. In 1830 it seceded and became a separate republic. For the first 95 years of independence Ecuador had 40 presidents, dictators and juntas. From 1925 to 1948 no president completed his term of office.

The Spanish language shows on the coinage and at the present time 100 centavos equal 1 sucre.

EGYPT

Egypt is the Egypt Arab Republic in the northeast corner of Africa. It is a rainless block of 386,200 square miles with a population of 34 million. The capital is Cairo.

Egypt or the U. A. R. has a recorded history of more than 5,000 years, the longest in the world. The last period of foreign rule began in 1882 when the British occupied the country. Egypt was granted independence in 1922 but was unable to erase British influence until 1956. Egypt was declared a republic in 1953. The union of Egypt and Syria as the United Arab Republic was proclaimed on February 1, 1958. Economic and political incompatibilities caused Syria to secede in September of 1961. Egypt continues to call itself the United Arab Republic.

100 milliemes now equal 1 Egyptian pound with 10 milliemes equal to 1 piastre.

All Egyption coins prior to 1916 are similar to Turkish coins of the same period.

ABDUL AZIZ

1861-1876

Inscriptions similar to those illustrated above will appear on coins of this reign. MISR meaning Egypt & 1277 the AH dating of the accession of this ruler.

EQUATORIAL AFRICAN STATES

The Republic of Congo (Brazzaville), Gabron, Central African Republic, Chad and Cameroon made up the Equatorial African States. The currency issued from a central bank is the African Financial Community (CFA) franc which is supported by and tied to the French franc.

The Congo, Gabon, Central African Republic and Chad linked into an Equatorial Customs Unit in 1960, Cameroon became an associate member in 1961. The five countries in 1966 then entered into a broader arrangement called the Customs Unit of Central Africa (UDEAC).

Chad has withdrawn from the UDEAC and signed an accord with Congo (Kinshasa) and Central African Republic establishing the Union of Central African States (UEAC).

In the early part of 1971 the CFA franc was pegged at 277 per U.S. $1.

EQUATORIAL GUINEA

Equatorial Guinea is on the west coast of Africa and includes some islands off of the coast. It has a total area of 10,830 miles with a population of 300,000. The capital city is Santa Isabel which also was the capital of the former Spanish Guinea.

Portuguese explorers seeking a route to India discovered a portion of this country in 1474. They retained control until 1778 when it was ceded to Spain. In 1959 the area was divided into provinces and became the Spanish Equatorial Region ruled by a Governor General. In 1960 the first elections were held and the first Equatorial Guinean representatives were seated in the Spanish parliament. Limited autonomy was granted in 1963 and the name changed to Equatorial Guinea. Independence is marked on October 12, 1968. The official language is Spanish.

Money of Spain was used prior to independence.

ERITREA

Eritrea, prior to WWII, was part of the Italian Colonial Empire. It covered 86,166 square miles in Africa on the Red Sea. At the time it merged with Ethiopia in 1952 it had a population of 1.2 million and the capital city was Asmara.

The Italian colony was set up in 1898 although the Italians had moved into the territory in 1885. Boundaries were cleared up in 1898-99 and 1900. The country has always been closely related to Ethiopia. At the start of WWII the British occupied the country in 1941. It remained under British adminstration until 1952. It then became part of the Kingdom of Ethiopia on September 15, 1952 under a resolution passed by the United Nations in 1950. Eritrea was granted autonomy in domestic matters with federal government powers specified.

The obsolete coinage was issued under Italian authority.

ESTONIA

Tallin (formerly Reval) is the capital city for a population of 1.2 million persons. This small Baltic state along with Latvia and Lithuania are the three Baltic countries carved from provinces which were controlled by czarist Russia prior to WWI.

Estonia first announced its independence on November 28, 1917. Under the protection of Germany they declared their independence again on February 24, 1918. Independence from Russia was formalized with the signing of the Treaty of Tartu on February 2, 1920. In 1939 the absorbtion process by Russia was started and by the end of WWII Estonia was a part of the U.S.S.R. Their language is Finno-Ugrian.

The coinage is obsolete. From 1918-23 100 penni equaled 1 mark, from 1923-27 we find 100 marka equal to 1 kroon, in the 1928-41 period the 100 senti were made equal to 1 kroon.

ETHIOPIA

The Empire of Ethiopia is in East Africa on the Red Sea. It has a population of 24.8 million in an area of 455,000 square miles. The capital is Addis Ababa.

This country has existed for centuries in the highlands of East Africa. The ruling house of Ethiopia is said to have descended from King Solomon and the Queen of Sheba. The Christian Kingdom is reported to have been introduced to Christianity in the 4th century.

The coins are dated according to the Ethiopian Era which is 7 years 8 months short of AD dates. 100 cents equals 1 talari (dollar).

FAEROE ISLANDS

Faeroe Islands are a group of 21 islands in the North Atlantic Ocean which joined with Denmark in 1386. The area involved is 540 square miles, they have a population of 38,000 and the capital of the island group is Thorshavn.

The Danish name for the islands is "Faroerne" or "sheep islands." The Norse are supposed to have first peopled the islands in the 9th century. In the 11th century they were taken for Norway and then in 1386 the islands were transferred to Denmark. After 1910 the movement for self government was started. In 1912 Danish language was the authorized language for the islands. The islands were occupied by the British in WWII after the German occupation of Denmark. They were returned to Denmark at the end of WWII and attained home rule in 1948.

Danish coins are current on the islands, 100 ore equal 1 krone.

FIJI ISLANDS

The Fiji colony consists of several hundred islands in the southwestern Pacific Ocean. The total land area is estimated at 7,055 square miles. The largest island of the group is Viti Levu which is also the site of the capital, Suva. The total population is estimated at 500,000.

The Dutch discovered the northwestern part of the group in 1643. Captain Cook touched on the southern part of the islands in 1773. The first thorough survey was made by a U.S. exploration team in 1840. The British accepted the unconditional cession of the islands in 1874, after the U.S. had not answered an offer made to them by the Fijians in the U.S. Civil War period.

In 1934 the first "Fiji" type coins were issued by the British in the pounds-pence system. Decimal coinage has been used since the conversion in 1969.

FINLAND

The capital of this Scandinavian country is Helsinki. Finland is the most northerly state on the European Continent. It is also the fourth largest state in Europe with an area of 130,160 miles. More than 60,000 lakes dot the country which has a 4.7 million population.

The forerunners of modern Finland reached the land an estimated 2,000 years ago. There is evidence that the country has been inhabited for more than 9,000 years. The close association with Sweden began in 1154. In 1809 the country became a Grand Duchy in the Russian Empire. On December 6, 1917, after the Russian revolution, they declared their independence. The major language is Finish. In the monetary system 100 pennia is equal to one markka.

Suomen Tasavalta Republiken Finland are the most common names seen on the coinage of the country. The hearldy sign is the rampant lion with uplifted sword.

FRANCE

Paris is the capital of France. The 50.3 million Frenchmen live in an area of 213,000 square miles and it is the largest of the West European nations. French is a Romance language evolved from a vulgar Latin spoken many centuries ago in northern France.

Modern France emerged from the period of the Renaissance. The First French Republic was the result of the French Revolution in the late 1700s. The Third Republic was established in 1870 and lasted until 1940. The termination of WWII saw the Fourth Republic created which was then superceded by the Fifth Republic in 1958.

The coinage of "Republique Francaise" is varied and marked by changes in governments and monetary reforms. These are not mintmarks. They are privy marks.

PRIVY MARKS AND MINTMARKS

Most French coins have two small marks on them representing either the engraver general or the mint director who issued the coin. The mintmark is usually a letter. Since 1958 o mintmarks have been used.

ENGRAVER GENERALS

Engraver general privy marks appeared on coins of all mints.

1843-1855	Dog's Head	(d)
1855-1878	Anchor	(a)
1870-1871	M on Star (Bordeaux only)	(s)

LIGHTNING - POISSY

1922-1924	Cornecopia	

STAR - VARIOUS EUROPEAN MINTS

1916	Cornecopia	

With the new regular issues of 1897-8, both privy marks were removed. These were restored to the 5c. - 2 Fr. in 1901, to the gold in 1902, and never did appear on the 1c. & 2c.

GENERAL COMMENTS & EXPLANATION

1. The copper visitation commemoratives of 1853 and 1854 saw considerable circulation as 5 and 10 centime pieces, although no denomination appears on these coins.
2. New recut master dies were prepared during:

Date	Denom.	Side	Original	Recut (r)
1861	2 C.	Obv.	Large Bust	Small Bust
1931	50 C.	Rev.	Fuller Cornecopias	Less Full Cornecopias
1933	20 F.	Obv.	Shallow Relief	Deep Relief
1945-6	10 F.	Obv.	Large Head	Medium Size Head
1950	20 F.	Obv.	Georges Guirard	G. Guirard
1950	20 F.	Rev.	4 Minor Plumes In Tail	3 Plumes
1965	½ F.	Obv.	Small Letters	Large Letters

3. Each of the various R.F. 5¢ through 25¢ with center holes may come in one (or more) of four varieties. In some cases this variation is a positive identification of type:
   - With dash under mes of cmes.
   - With dots flanking the date.
   - With both dots and dash.
   - With neither dots nor dash.
4. Most of these metropolitan French issues also circulated in the colonies. Certain dates and types circulated primarily in Africa and are annotated Africa.
5. Minor variations in size, position, and style of date, mintmark, and privy mark are numerous. The major variation in the size of the 'D' mint mark for 1853 to 1857 two centimes is both noticeable and distinct.
6. The Vichy 5 Fr. 1941 never entered circulation and is therefore omitted from this list.
7. Essais, trial strikes, triple thick piedforts, fantisies, and emergency issues are omitted from this list. Many are both common and inexpensive.
8. Proofs exist of a few coins on this list, particularly Matte proofs of some 1897-1900 silver and polished proofs of the 1 Fr. 1852.

QUANTITIES MINTED AND SCARCITY

Many collectors have noted apparent discrepancies in the official mintage figures for some issues. Other references have made attempts at interpreting the reports, with mixed results.

Here, I have attempted first of all to indicate relative scarcity of issues through the price structure. If a coin is not known to exist, it is not priced, and a question mark is placed before it in the listing. Most such coins may be considered uncommon, yet some may not be. Sometimes it is no more difficult to find fifty of one coin, than it is to find one. Many coins marked '?' may not exist at all, nor did they ever.

Where a coin is very uncommon and its official mintage seems too high, the mintage figure is flagged by a question mark. If it seems likely that the coins were dated another year, the quantities for the other year is adjusted and only a '?' will appear for the year in question. For periods where the mintage record is inadequate, only a '?' will appear for quantity minted.

Errors of omission may occur in this text, but if a French coin is listed (with no question mark before it) then it positively does exist as a circulation issue.

FRENCH COCHIN CHINA

Cochin-China was one of the five states of French Indo-China. It was the most progressive as well as the richest and the smallest. It is now a part of South Vietnam. The area it covered was 24,981 square miles and had a population of about 5 million. Saigon was the capital city.

For the first 17 centuries of the Christian era Cochin-China was known as the Kingdom of Fou-nan. French interest in area dates from 1610. A Franco-Spanish expedition in 1859 took Saigon and French rule was established after more battles in 1861. Cochin-China joined the Federation of Indo-China in 1887. The Japanese used Saigon as the jumping off spot for their invasion of Thailand, Malaya, Netherlands Indies and Burma in the 1941-42 portion of WWII.

The coins issued for the area use the name Cochinchine Francaise which is the French version. 100 centimes equaled 1 piastre and the coinage is obsolete.

FRENCH EQUATORIAL AFRICA

French Equatorial Africa was a French territory in Central Africa which at the time had the status of a French Colony. The Capital was Brazzaville (which is the current capital of the Republic of Congo). It had an area of 961,200 square miles and a population of 3.5 million.

Right after WWII, in 1946, the French established a new constitution. They changed the names of the various French Overseas Territories. The former French notations of colonies and Empire were abolished. French Equatorial Africa under the new Union consisted of Gabon, Middle Congo, Ubangi-Shari and Chad. History of the area prior to the French is almost unknown. The coastal region on the Atlantic Ocean was visited but the interior was not.

The coins issued by the French contain the French legend "Afrique Equatoriale Francaise."

FRENCH INDO CHINA

These former French colonies made up French Indo-China; Annam, Tongking, Cambodia, Cochin-China and part of Laos. The area was 286,194 square miles and had a population of 24 million. Chief towns were Saigon, Cholon, Hue, Pnom-Penh, and Hanoi.

In July of 1941 the Japanese occupied southern Indo-China from which they attack Thailand and Malaya. In 1946 the French resumed control on March 6. When the French troops landed they fought with the Chinese and it wasn't until August that they ousted the Chinese. The area has been noted for the constant upheaval. The French quit the area in 1953 when the Geneva Conference partitioned off North Vietnam (Communist), Cambodia, Laos and South Vietnam.

The French coin issues featured the name in French of "Indo-Chine Francaise."

FRENCH OCEANIA

French settlements in Oceania or "Etablissements Francais De l'Oceanie" was the name first given to this eastern Pacific island group by King Louis Philippe (1830-48) of France. The islands became a single colony in 1903.

The French first laid claim to this group of islands in 1768 when they took possession of Tahiti in the Society Islands.

In 1949 the first of the coins issues for French Oceania were issued by France. Three years later the last issue was made for "Etablissements Francais De l'Oceanie" as the island group was renamed to French Polynesia. The monetary unit is the C.F.P. or Colonies Francaises du Pacifique with the franc divided into 100 centimes.

FRENCH POLYNESIA

The former name of this eastern Pacific island group ruled as an Overseas Territory within the new French Community was French Oceania. The possessions consist of widely scattered islands in the Pacific. They are: Mangareva, Makatea, Marquesas Islands, Rapa, Rurutu, Rimatara, Society Islands, Tuamotu Archipelago, Tubuai and Raivavae. The capital, Papeete, is on the Island of Tahiti in the Society group. The islands cover a land area of 1,544 square miles and have 100,00 population.

In March of 1957 the French National Assembly approved a new statute for the islands. The title of French Oceania was changed to French Polynesia, "Polynesie Francaise."

The franc C.F.P. (Colonies Francaises du Pacifique) was not changed as this denomination is used by all of the French possessions in the Pacific. Coinage with the new name was first issued in 1965.

FRENCH SOMALILAND

French Somaliland is the old name for the French Territory of Afars and Issas. It is located in northeast Africa with an area of 9,000 square miles, a population of 125,000, and the capital city of Djibouti.

More than half of the population lives in the capital and the rest of the population are nomadic herdsmen. French interest in the territory came in 1839-42. In 1884-85 they called the area French Somaliland. The administration capital was moved from Obok to Djibouti in 1896. A railway was built to connect with Ethiopia starting in 1897 and completed in 1917. In 1957 the colony was reorganized to give the people more self-government. In 1958 they voted to stay in the French Community as an Overseas Territory. On July 5, 1967 a directive from Paris officially changed the name to French Territory of Afars and Issas.

The coinage carries "Cote Francaise Des Somalis" with "Union Francaise" now being omitted. 100 centimes equal 1 franc. Paris Mint.

FRENCH WEST AFRICA

French West Africa consisted of a group of eight west African territories of the French Union. They had a total area of 1,777,553 square miles with a total population of 18 million. Dakar was the capital of the A. O. F. which is the French "Afrique Occidentale Francaise."

The countries involved were Mauitania, Senegal, Sudan, Upper Volta, Niger, Ivory Coast, French Guinea and Dahomey. The history of the territory ended with the independence of the states involved. The languages spoken were a great mixture with Sudanese, Arabic and French the major ones. The monetary unit used was the Franc C. F. A. or the "Colonies Francaises d'Afrique" which, when issued, was valued at 2 metropolitan Francs, (metropolitan being the franc used in France).

100 centimes was equal to 1 franc for their denominations.

GABON

Republique Gabonaise or Gabon straddles the Equator on the West Coast of Africa with 103,346 square miles and a population of 500,000. The capital is Libreville.

The Portuguese were the first Europeans to arrive in the area in the 15th century. The name of the country comes from a Portuguese word "Gabao" which is a coat with sleeves and a hood. France assumed protection by treaty in 1839 and 1841. The name of the capital city, Libreville, means "place of liberation." This was named by some slaves released by the French after the French had captured a slave ship on the Como River in Gabon. The area was administered by the French from 1903 to 1910 when it became French Equatorial Africa. In 1960, Gabon became one of the Central African States. That was also the year for independence.

The monetary unit is the CFA franc, "Colonies Francaises d'Afrique," French African Colonies.

THE GAMBIA

The Gambia is an independent country within the British Commonwealth and is located on the western bulge of West Africa. The total area of this narrow country is 4,003 square miles with a population of 325,000 ruled from the capital city of Bathhurst.

Most of the population live in rural areas and they are a mixture of several ethnic groups. The Portuguese first visited in the 15th century. England and France put claims on the country in the 17th and 18th centuries. England gained The Gambia by the Treaty of Versailles in 1783. Self-government came about in 1963.

The monetary unit is the Gambian pound which is at par with the British denomination. The coinage carries English legends as the official language is English. The everyday monetary unit is the four-shilling piece, or dirhem.

GERMAN EAST AFRICA

This was a German protectorate from 1885 to 1916. This extended over most of the area of Tanganyika, Rwanda and Burundi. The headquarters for this protectorate was Dar es Salaam. The end of the German rule came with the end of WWI.

Control of the territory went into British hands at the conclusion of WWI through a mandate from the League of Nations and this continued until WWII. The area has since been divided.

The first of the coinage issues were from the German East African Company which was first incorporated in 1887. The first coins were issued in 1890 with the legend "Deutsch Ostafrika." The last coinage was made in 1916. This obsolete monetary system first used 64 pesa equal to 1 rupie. In 1902 this was changed to 100 heller equal to 1 rupie.

GERMAN NEW GUINEA

"Neu Guinea" was part of the German colonial empire which lasted until the end of WWI. New Guinea in the 1900 period was divided into three segments, one part ruled by the Netherlands, one part by the British and one part by the Germans. Germany held the northeastern part of the island. Their capital was Herbertshoehe, the area was 93,000 square miles with an estimated 250,00 persons.

Germany became interested in the colonial field in later part of the 19th century. New Guinea became their possession in 1894. After WWI, in 1920, northeastern New Guinea was classed as a "C" mandate by the League of Nations and turned over to Australia for administration. On December 13, 1946 the United Nations took over the trusteeship of the area.

The obsolete coinage was based on the 100 pfennig being equal to 1 mark.

GERMAN STATES

When mention is made of German States it is usually in terms of Germany prior to unification in 1871. Until that time a great number of independent states made up the area we now identify as Germany.

In the period from 1519 to 1648 there were more than 50 imperial cities and 60 principalities which would include the archbishoprics, bishoprics and abbacies many of which were coin issuing units. On January 18, 1871 in the hall of mirrors in the Versailles Palace in France William I was proclaimed Emperor of Germany. German Reich came into being and it consisted of 25 German states, the four kingdoms of Prussia, Bavaria, Saxony and Wurttemberg. Five grand-duchies, 13 dutchies, and the free cities of Hamburg, Bremen and Lubeck. Alsace-Lorranine was common property and called "Reichsland."

GERMANY

The Federal Republic of Germany has a total population of 58 million, 60 million if West Berlin is included. It is a long narrow country of 96,000 square miles and Bonn is the capital.

Upon the unconditional surrender of Germany in WWII (May 8, 1945) the United States, Great Britain, France and the U.S.S.R. occupied the country and assumed the government. The London and Paris agreements of 1954 gave the FRG full sovereignty. Withdrawal of the U.S.S.R. as part of the four power governing parties in 1947 divided Germany into West and East.

The current denomination used in the FRG is 100 pfennig being equal to 1 Deutsche Mark. Current mint marks are those of Hamburg-J, Munich-D, Stuttgart-F, Karlsruhe-G. Older mint marks used were Berlin-A, Hanover-B, Frankfort-C, Dresden-D and Darmstadt-H.

MINT MARKS AND MINTAGES

The following mint marks appear on the coinage of Germany, and are appropriately indicated in the dated listings:

A — Berlin
B — Hanover (until 1878)
B — Vienna (1938-1945 period)
C — Frankfort (until 1879)
D — Munich
E — Dresden
F — Stuttgart
G — Karlsruhe
H — Darmstadt (until 1882)
J — Hamburg

The mintage figures are stated in millions of pieces, rounded off to the nearest ten thousandth for the convenience of readers.

GHANA

Ghana is on the Gulf of Guinea on the west coast of Africa a few degrees north of the Equator. It has an area of 91,843 square miles with a population of 8.6 million ruled from the city of Accra. English is the official and commercial language.

This is the famous Gold Coast of Africa. The Portuguese were the first in the land in 1470. An English private trading company was operating the Gold Coast settlements when the British government took over the area in 1821. Ghana became an independent state on March 6, 1957 from the United Kingdom.

The coinage of British West Africa was used prior to the independence of Ghana. The first monetary system had 12 pence equal to 1 shilling and then in 1965 changed to 100 pesewas equal to 1 cedi. Monetary changes, military coups are factors that make the Ghana coinage history.

GHURFAH

Tarim and Ghurfah are cities in the Hadhramaut, which was in the former British East Aden Protectorate and now in the country of Southern Yemen. Many of the cities in the Hadhramaut such as Shibam, Seiyun are not typical of any of the world's towns. These are villages and towns which are not connected with paved highways.

The places were developed by wandering tribes and are normally a cluster of houses made of mud bricks. Some of them are built as high as six stories. These places are surrounded by gardens and date palms. Most of the buildings are simple and austere decorated, with a simple pattern of white plasterwork. Usually the places have a number of mosques with white towers and blue laticce bands along with white domed tombs of saints. The towns are similar in nature.

All Coins were struck at the Mint, Birmingham, England in 1926 & 1927.

GIBRALTAR

Gibraltar is a free port on the rocky coast of the Iberian Penninsula commanding an entrance to the Mediterranean Sea. The British use the port as a naval base and a coaling station. It is only 2 square miles in area with a total population of 25,000.

Gibraltar has been a key piece of territory since the Arabs captured it in AD 711. In the 15th century it was in the hands of the Moors and later went to Spanish rule. It has been a British colony since the Treaty of Utrecht in 1713. Spain made an attempt to regain the "Rock" in 1967 but the citizens voted to retain the link with Britain.

The coinage of the colony has always reflected the idea that the port is a "key" and a "fortress" by the use of those designs. The monetary system is the same as that used in Great Britain.

GREAT BRITAIN

The United Kingdom of Great Britain (England, Scotland, Wales) and Northern Ireland is located off the northwest coast of Europe. The United Kingdom occupies a land area of 93,025 square miles, has a population or 56.1 million with London as the capital.

Britain was brought closer to Europe by the invasion of the Romans in 55 BC. Norman rule started in 1066. Wales was an independent kingdom in 1282 when it was taken by the British. Scotland was united into England in 1603. In 1707 England and Scotland agreed to be a union under the name of Great Britain. The Anglo-Irish treaty of 1921 established the Irish Free State. In the 19th century the United Kingom became a world power. The first world war in the 20th century depleted resources and it began to loosen control of its Empire. WWII caused almost complete dismantling of power. Coinage system was entirely different and it was imposed on the many colonies. Now it has been converted to a decimal system.

GREECE

The kingdom of Greece is on the southeastern portion of Europe at the end of the Balkan Peninsula. Many islands such as Crete and Dodecanese are included within the boundary of Greece. The land area is estimated to be 51,182 square miles with a population of 8.8 million. The capital is Athens.

The Greeks won their freedom from the Ottoman Turks in 1821-30. A monarchy was established in 1833 under the eyes of Great Britain, France and Russia. Greece was proclaimed a republic in 1925. A monarchy was reestablished in 1946. Upheaval is now current in the political operation of Greece and it has been a dominant factor for the last twenty years.

The coinage of Greece has the 1 drachma divided into 100 lepta. The Greek language on the coinage makes use of alphabet characters which are foreign to the English alphabet.

GREENLAND

Godthaab is the capital city of Greenland which is the largest island in the world (excluding Australia). The total area of 840,000 square miles supports a population of 43,000. More than 80% of the total island surface is icecap. Greenland is the only source in the world for cryolite which is used in the manufacture of aluminum.

The island became an integral part of Denmark under the Constitution of June 5, 1953. They send two of their representatives to the Danish Folketing. Eric the Red first colonized the island in 985-86. The modern history of Greenland began in 1721 under the influence of Danish missionaries. The islanders speak Danish and Greenlandic.

The coins of Denmark have always been used on the island. The krone is the monetary unit which is equal to 100 ore. Modern coinage was first issued for Greenland in 1926 with the name of "Groland."

GRENADA

This island in the Caribbean is a member of the West Indies Association of States under the British Commonwealth of Nations. The population of the island is 103,000 in an area of 133 square miles. The capital is St. George. Another of the British territories with a built-in option for independence.

Grenada is often called "Isle of Spice" and when it was first discovered by Columbus in 1498 was named Conception. The French bought the island from the natives for a few knives, glass beads, hatchets and two bottles of Brandy in 1629. The island became a British colony by the treaty of Versailles, September 3, 1783.

The early coinage is similar to most of the Caribbean islands in the area. The original coins were designed for other places but the use of countermarks and cut pieces made a coinage for Grenada in the late 1700s.

GUADELOUPE

This is an Overseas Department of France in the Caribbean Sea southeast of Puerto Rico. It is one of the Leeward Islands which is part of the chain of the Lesser Antilles. Guadeloupe is a pair of islands, one is called Basse-Terre and the other is Grande-Terre. The area is 687 square miles with a population of 324,000 with Basse-Terre as the capital or Prefecture.

Columbus discovered Guadeloupe in 1493 on his second voyage. Frenchmen arrived in 1635 to make permanent settlements and to take the island. It remained a colony of France until 1946 when it voted to become an Overseas Department.

The coinage that has been issued for Guadeloupe is now obsolete but followed the French monetary system of 100 centimes equal to 1 franc.

GUATEMALA

The northernmost and most populous of the five Central American Republics is Guatemala. It has a total of 5.2 million persons in the 42,000 square miles. The capital is Guatemala City.

Much of Guatemala was taken up by the Mayan civilization before the Spanish conquest. Under the Spanish rule the Captaincy-General of Guatemala extended throughout all of Central America. The capital of this government was Antigua. At that time the name of the city was "The Most Noble and Loyal City of the Knights of St. James of Guatemala." Since gaining independence from Spain in 1821 the country has had a turbulent history. After being a member of the Central American Federation from 1821 to 1840 a series of dictatorships were experienced by the country. The third legal transfer of power took place in July 1970 with a new president.

The Spanish language is shown on the coin issues of the country.

GUERNSEY

Guernsey is an island in the English Channel close to the coast of France and is a British crown dependency. It has 30 square miles of area with a population of 48,000. The capital of the island is St. Peter Port.

The origin of Guernsey is obscure, but the island is rich in megalithic monuments. In the 11th century most of the land was Norman. In the 17th and 18th centuries a big occupation was privateering for the English kings against the French. When peace came in 1815 it actually brought a crisis to Guernsey. The Bailiwick of Guernsey consists of Guernsey, Alderney, Sark and Herm islands. The island is very famous for the Guernsey cow.

The past denominations were 8 doubles equal to a penny and 12 pence equal to 1 shilling. With conversion to the decimal system 100 new pence equal 1 pound.

GUINEA

Guinea is located on the "bulge" of West Africa with an area of 95,000 square miles and a population of 3.7 million. The capital is Conakry.

French military penetration began in Guinea in the middle of the 19th century. The leader of Guinea allied himself with the Toucouleur Empire and the Kingdom of Sikasso. Then he tried to expel the French from the Sudan. He was defeated in 1898 and France gained control of Guinea. The present boundaries were fixed in the 19th and early part of the 20th centuries. Guinea became an independent Republic on October 2, 1958. It was the only French colony to register a negative vote against the Constitution of the 5th French Republic and the French Community.

The French language is displayed on the coinage of Guinea, which is the official language of the country, 100 centimes equal 1 franc.

GUYANA

This country located on the northeast coast of South America covers an area of 83,000 square miles with a population of 735,000. The capital is Georgetown which is located on the Atlantic Ocean.

The original Guyana covered present day Surinam, French Guiana, Guyana, parts of Brazil and Venezuela. It was sighted by Columbus in 1498 and Sir Walter Raleigh helped the European interest in 1595. The Dutch made the first European settlement in the 16th century. The area was ceded to the United Kingdom in 1814. Guyana became the first South American country to be given independence by a colonial power on May 26, 1966. It became a Republic on February 23, 1970.

The earlier issues of coinage were those minted for the British Caribbean Territories. The Bank of Guyana issued the first coinage of the country in 1967.

All struck at the Royal Mint, London

HAITI

The Republic of Haiti occupies the western one-third of the island of Hispaniola in the Caribbean Sea between Puerto Rico and Cuba. It has an area of 10,714 square miles and a population of 4.5 million. The capital is Port-au-Prince.

Columbus discovered the island in 1492. It was a jumping off spot for Spain on its quest of the Western Hemisphere. In 1697 Spain ceded the western one-third to France. At one time it was the richest colony of the French Empire. At that time it was called Sanit-Domingue. The slaves of France revolted in 1791 and by 1804 the French had lost control of the island. Thus Haiti became the world's oldest Negro republic and the second oldest republic in the Western Hemisphere. U.S. occupied it in 1915 and left in 1934.

Official French is the language spoken by only 10% of the people. Coinage is 100 centimes equal to 1 gourde.

The suffix letter to the date indicates where the coin was minted. The letters do not appear on the coin.

HAWAII

The name of the major island and the group of islands in the Pacific which is now the 50th state of the United States. The group is about 6,500 square miles in area with a population of 635,000 and the capital city is Honolulu.

Captain Cook discovered the islands on his third voyage in 1778 and named the group as Sandwich Islands. He returned to the islands in 1779 and lost his life on February 14, 1779 in a skirmish with the natives. Hawaii was a kingdom from 1791 to 1894 at which time a republic was established on the fourth of July. The Territory of Hawaii was established by the U.S. on June 14, 1900.

The obsolete coinage of Hawaii was sporadic with a single issue in 1847 and another issue in 1883. The bulk of their coinage has been coins of the U.S.

HEJAZ

Hejaz is now part of Saudi Arabia but was, prior to 1916, a vilayet or division of the old Ottoman Empire. It is located along the coast of the Red Sea in the Arabian Peninsula. The area was about 150,000 square miles and Mecca was the headquarters.

The Moslem Holy Cities of Mecca, the birth of the Prophet Mohammed; Medina, the tomb of the Prophet and Jidda the commercial center of Saudi Arabia are located in Hejaz. In 1258 the area was under the Egyptians, in 1517 it went to the Turks. Religious upheavals in the 19th century gave way to peace in 1817 and the section was under Egyptian control until 1845. Turkish control again was to exert itself and by 1908 was in command. The British had advisors in the area in WWI. In 1932 Nejd and Hejaz became Saudi Arabia.

The coinage is dated using AH dating system and is now obsolete.

COUNTERSTAMPED (c/s) COINS

Between 1916 and 1923 various coins of Turkey, Egypt and also Maria Theresa Talers were counterstamped AL - HEJAZ in Arabic for circulation in the Hejaz.

HONDURAS

Honduras is one of the largest of the Central American Republics. It has an area of 42,300 square miles for a population of 2.5 million. The capital is Tegucigalpa.

Honduras was claimed for the Spanish crown in 1502. It was part of the Captaincy-General of Guatemala in the colonial period. In 1821 the Central American colonies declared their independence and formed a federal republic of Central America which lasted until 1838. Then the five states set up independent governments. Frequent revolutions have marked the history of Honduras. In recent years stability has been achieved through the past four presidents. U.S. and Honduras have for the past forty years had a dispute over Swan Islands—100 miles off the coast of Honduras—each country claims sovereignty over the islands.

100 centavos equal 1 lempira. Recent coinage has been released by the Central Bank of Honduras.

HONG KONG

Hong Kong is a British Crown Colony on the southeast coast of the China mainland. It has a total land area of 398 square miles with a population of 4 million. Victoria is the capital.

The first settlement on the coast of China was Macao settled by the Portuguese in 1557. The first successful venture by the British came in 1699 by the British East India Company. Until 1834 the East India Company had a monopoly of British trade with China. In 1839 the opium trade was a problem and the British tried to abolish the trade. The Opium War (1839-42) was the first Anglo-Chinese conflict and ended with capitulation of the Manchu government. The Treaty of Nanking opened five ports to British trade and granted Hong Kong Island to the United Kingdom in perpetuity. Hong Kong developed after the second WW.

Cantonese is the Chinese dialect spoken and seen on the coinage, although English is the official language. 100 cents equal 1 dollar.

HUNGARY

The Hungarian People's Republic shares a border with U.S.S.R., Czechoslovakia, Romania, Yugoslavia and Austria, in Europe. It has 36,000 square miles of area for a population of 10.3 million. The capital is Budapest.

Hungary, with one interruption, was a monarchy for nearly 1,000 years. Hungary lost a major portion of its territory at the end of WWI. A Communist dictatorship followed and then a counter-revolution in 1919 set up a twenty five year reign. Hungary entered WWII as an ally of Germany, it was under German occupation and a pro-nazi dictatorship in 1944. In 1945 the Germans were driven out by the Soviet Armies. A peace treaty was signed February 10, 1947 and it went into effect on September 15, 1947. In the meantime in June of 1947 the Communist supported power came into being. August 20, 1949 the Communist Constitution was put into effect.

ICELAND

An island of 39,709 square miles in the North Atlantic Ocean. The capital city is Reykjavik which has almost one-third of the total population of 201,-975. Three-quarters of the area is wasteland with the balance being used for grazing. The language is the closest of the Nordic languages to the Old Norse and has remained unchanged since the 12th century.

Iceland was a republic in 930 but in 1262 the Norwegian King extended his sovereignty to Iceland. Denmark took over the island in the 14th century. It became a sovereign state united with Denmark in 1918. It was again established as a Republic on June 17, 1944.

Most of the coinage issues of Iceland are pure coin types of Denmark with the name of the country "Island" on the coin. The current coins of Iceland, after independence show the name of the country and their coat of arms.

These pieces are not listed in many coin catalogs because of their questionable legal tender status. The edges are lettered, however, with the appropriate indication of value, and an act of the Althing (Parliament) authorized their issue.

INDIA

Republic of India has 1.3 million square miles and a population of 537 million. The capital of the country is New Delhi.

The first British outpost was established in India in 1619. Later trading stations were opened up in Madras, Bombay and Calcutta by the East India Company. The parliament withdrew political support of its territories from the Company and put them in the hands of a Governor-General in 1783. The East India Company retained the economic and social domination. Violence in 1857 caused the dissolution of the East India Company and direct administration of India was taken over by the British Government through a Viceroy. This was the start of the British Indian Empire. Independence came in 1947 with full independence in 1950.

This catalogue lists the coins of British India from the reign of Queen Victoria to the reign of George VI. The issues are divided into two main parts:

Coins struck under the authority of the East India Company (E.I.C.) from 1840 to 1858 (1862).

Coins struck under the authority of the Crown (Regal Issues) from 1862 to 1947.

Only the portrait coins showing the effigy of the ruling British monarch are listed for the E.I.C.

The first regal issues bear the date 1862 and were struck with the date unchanged until 1874. From then onward all coins bear the year date. The copper coins dated 1862 have not yet been fully attributed and therefore are not listed by the mint of issue.

In 1877 Queen Victoria was proclaimed Empress of India and the title of the obverse legend was changed accordingly.

The silver coinage of George VI is a very complex series with numerous obverse and reverse die varieties.

Two different designs of the head appear on the obverse of most denominations struck for George VI. The "First Head" shows the Kings effigy in high relief, the "Second Head" in low relief. In 1941-42 the "Second Head" was slightly reduced in size and this type continued to be used on the silver coins and on some of the smaller denominations.

1st Head

2nd Head (small)

2nd Head (large)

From 1942 to 1945 the reverse designs of the silver coins change slightly every year. However, a distinct reverse variety occurs on rupees and ¼ rupees dated 1943-44 and on the half rupee dated 1944, all struck at Bombay. This variety may be distinguished from the other coins by the design of the center bottom flower as illustrated, and is designated as Rev. B.

On the normal common varieties dated 1943-44 the three "scalloped circles" are not connected to each other and the bead in the center is not attached to the nearest circle.

Rev. B

The fineness of both gold and silver coins was .916.66, but in 1940 the standard of the silver coins was reduced to .500. Finally, in 1946, the coinage of silver was suspended and the three high denominations of the new design were struck in pure nickel.

The coins of British India were struck at the following mints, indicated in the catalogue by capital letters after the date.

C - Calcutta, 1840-1947
B - Bombay, 1841-1947
M - Madras, 1841-1869 (closed Sept. 1869)
R.M. - Royal Mint, Bombay Branch, 1918
L - Lahore, 1943-1945
P - Pretoria, South Africa, 1943-1944

In 1947 British rule came to an end and India was divided into two self-governing countries, India and Pakistan. Both are now independent republics and although they are still members of the British Commonwealth of Nations, their coinages do not belong to the British India series.

The monetary unit of British India from 1835-1947 was the rupee.

3 Pies = 1 Pice	16 Annas = 1 Rupee
4 Pice = 1 Anna	15 Rupees = 1 Mohur

The portrait coins issued by the India Company for Victoria show two different head designs on the obverse, which are called Type I and Type II. The coins with the Type I head have a continuous obverse legend and were struck from 1840 to 1851. The coins with the Type II head have a divided obverse legend and were struck from 1850 (Calcutta) until 1862. The date on the coins remained unchanged, Rupee, ½ Rupee and ¼ Rupee are dated 1840, the 2 Annas and the Mohur are dated 1841. Both issues were struck at the Calcutta, Bombay and Madras Mint.

Type I coins have on the reverse a dot after the date, those of Type II have no dot, except for some rare ¼ Rupees and Two Annas. The latter are mules, struck from reverse dies of the preceding issue.

The following initials appear on the obverse on the truncation of the head:

S incuse (Type I)
WW raised or incuse (Type II)
WWS or SWW (Type II)
WWB raised (Type II)

On both issues, the "S" is the initial of Major, later Lt. Col., J.T. Smith (mintmaster at Madras 1840-1855). The "B" which occurs only on Rupees of Type II, is the initial of Major, later Lt. Col. J. H. Bell (mintmaster at Madras, 1855-1859). The initials WW which appear on all coins of Type II, are those of William Wyon, Chief Engraver of the Royal Mint, London who prepared this obverse design in 1849.

ONE RUPEE

SILVER

Two major reverse varieties occur on the "Type I" rupees of all three mints. The "1st Rev." has 19 berries in the wreath, the "2nd Rev." has 34 berries (Calcutta) and 35 berries (Bombay and Madras). There are several minor varieties of the 1st Rev., but these are not listed. Type I rupees are attributed to the mint of issue as follows: Calcutta, 1st Rev. 31.5mm; 2nd Rev. 31, 1-3mm, mintmark "crescent" on left ribbon bow on Rev. Bombay, 31, 7-8mm; Madras, 31, 9-32.2mm. Madras specimens of type I with the 1st Rev. also have a small, raised "V" on the lower part of the right ribbon bow. Type II, Calcutta 30.5mm; Bombay 30.8mm; Madras, W.W.S. raised and W.W.B. raised.

		—	4.00	7.50	12.50

ONE MOHUR

GOLD

The Type I Mohur was struck at all three East India Company mints, the Type II Mohur was struck only at Calcutta and Bombay. So far, it has not been possible to distinguish between the issues of the Calcutta and Bombay Mint but the coins are listed separately below as the Bombay issue eventually will be identified. Only a very small number of pieces were struck at the Bombay Mint of Type II.

REGAL ISSUES

1/12 ANNA

COPPER

VICTORIA

The coins dated 1862 were struck at Calcutta, Bombay and Madras but have not yet been attributed to the mint of issue. Calcutta Mint issues 1874-76 are 17.3mm in diameter. From 1877 the coins have a diameter of 17.5mm and the obverse legend at the lower right is distant from the bust. The issues dated 1882 and 1886 have a small incuse "C" on a bead of the circle below the date.

Bombay issues 1874-76 have a diameter of 17.9mm. From 1877 the obverse legend at the lower right is close to the bust.

1/2 PICE

COPPER

VICTORIA

The ½ Pice dated 1862 was struck at all three Indian Government mints i.e. Calcutta, Bombay and Madras but a correct attribution to the mint of issue has not yet been possible. Two different busts and two reverses have been noted so far. It is hoped that these pieces can be listed correctly by mint of issue in future editions of this catalogue. All later issues were struck at the Calcutta Mint.

ONE QUARTER ANNA

COPPER

VICTORIA

The One Quarter Anna dated 1862 was struck at Calcutta, Bombay and Madras but the coins have not yet been correctly attirbuted to the mint of issue. From 1874 onward the issues from the Calcutta and Bombay have a distinctive type of reverse and the coins are identified as follows:

On Calcutta Mint issues the floral design has a leaf below the center of the date. Some specimens dated 1879-1887 have also as a mintmark a tiny incuse "C" on a bead of the beaded circle, below the center of the date.

On Bombay Mint issues the floral design has a leaf below the first and the last numeral of the date.

HALF ANNA

COPPER

VICTORIA

The Half Anna dated 1862 was struck at all three Indian Government mints, i.e. Calcutta, Bombay and Madras but a correct attribution to the mint of issue has not yet been possible. The coins dated 1875-76 were struck at the Calcutta Mint, those dated 1877 were struck at Calcutta and Bombay. Two different bust occur on the 1877 issue.

Bust A - The bottom section of the front dress panel has a small flower in the upper left corner, and a large flower at right of center.

Bust C - The bottom section of the front dress panel has a five — dotted flower at right of center.

NOTE: Bust B is the common obverse on 1862 issues and is not described here.

The Bombay issue dated 1877 was identified by the type of the date figure "7" which has a short horizontal stroke and a long downstroke. This type of "7" appears on most Bombay issues but not on any denomination of the Calcutta Mint.

Y #	Date	Mintage	Fine	VF	EF

TWO ANNAS

SILVER

VICTORIA

The distinguishing features of the two busts and two reverses are:

Bust A - The front dress panel has four sections. The last section has at left, three leaves, and a small indistinct flower in the upper right corner.

Bust B - The front dress panel has 3-1/2 sections. The last, incomplete section shows only three small leaf tops.

Rev. I - Large top flower; the two large petals above the whorl are long and curved downward.

Rev. II - Small top flower; the two large petals above the whorl are short and horizontal.

The Two Annas dated 1862-76 have been re-attributed as a result of latest studies. The 1877 2 Annas with a bead in the tip of the top flower is now attributed to Calcutta!

Calcutta issues dated 1862-78 have no mintmark. The diameter of the coins is 15.25mm, except for the 1877 issue with the bead in the top flower which is 15.4 mm. From 1879 the mintmark is a small incuse "C" in the whorl below the center of the bottom flower. Calcutta coins dated 1874 have not yet been verified.

Bombay issues until 1877 are without mintmark and have a diameter of 15.8mm. From 1877-1883 the mintmark is a small raised bead directly above the bottom flower. From 1884 the coins have a small "B" raised or incuse, above the whorl of the top flower. Madras issues (1862 only) are 16mm in diameter.

(All have Bust "A" and Rev. I)

GEORGE V

Calcutta Mint issues have no mintmark. Bombay Mint issues have a small raised bead or dot below the lotus flower at the bottom of the reverse. The 2 Annas dated 1911, like the other coins with the same date, has the "Pig" elephant. On these pieces like on the 1/4 rupee, the King's bust is slightly smaller and has a higher relief than the later issues with the redesigned elephant.

Y #	Date	Mintage	Fine	EF	Unc.
42	1911C	16.76	.75	1.75	3.25
	1912C	7.72	.50	1.50	2.50

1/4 RUPEE

SILVER

VICTORIA

The distinguishing features of the three busts and two reverses are as following:

Bust A - The front dress panel is divided into four sections. The last section has a five-dotted flower at right.

Bust B - The front dress panel is divided into four sections. The last section, which is incomplete has a five-petalled flower in the center.

Bust C - The front dress panel is divided into three sections. The last section has a five-dotted flower at left.

Rev. I - The two large petals above the base of the top flower are long and curved downward; long stroke between "1/4".

Rev. II - The two large petals above the base of the top flower are short and horizontal; short stroke between "1/4".

As a result of recent studies, the 1/4 Rupees dated 1862-1876 have been re-attributed.

Calcutta Mint issues dated 1862-1878 have no mintmark. The diameter of the coins is 19-19.2mm and the milling is coarse. From 1879 the mintmark is a small incuse "C" which is in the whorl below the center of the bottom flower.

Bombay issues dated 1862, 1875 and 1876 have no mintmark. These have a diameter of 19.7-8mm and the milling is narrow. The coins dated 1874, 1877-1883 have as mintmark a small bead directly above the bottom flower. From 1884 the mintmark is a small "B" raised or incuse, which is above the whorl, in the top flower.

Madras issues (1862 only) have a diameter of 20mm.

(All have Bust A and Rev. I)

GEORGE V

Calcutta Mint issues have no mintmark. Bombay Mint issues have a small raised bead or dot in the space below the lotus flower at the bottom of the reverse. The 1/4 Rupee dated 1911, like the other coins with the same date, has the "Pig" elephant. On these pieces the King's bust is slightly smaller and has a higher relief than later issues with the re-designed elephant.

HALF RUPEE

SILVER

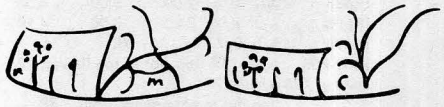
VICTORIA

The distinguishing features of the busts and reverses are:

Bust A - The front dress panel has four sections. The last section has a round flower at left and right.

Bust B - The dress panel has 4-1/2 or 4-2/3 sections. The last, incomplete section has a five-petaled flower at left of center.

Bust C - The dress panel is the same as on Bust B but the floral design of the dress differs.



Bust B Bust C

Rev. I - The top flower is open and the two large petals above the whorl are short and horizontal.

Rev. II - The top flower is closed and the two petals above the whorl are long and curved downward.

Calcutta issues have Bust A and Rev. I. Coins dated 1862-1878 have no mintmark. From 1879 the mintmark is a small incuse "C" located in the whorl, below the center of the bottom flower.

Bombay issues dated 1862 have no mintmark. From 1874-1884 the mintmark is a small bead directly above the center of the bottom flower. From 1885 the mintmark is a "B" raised or incuse, in the top flower.

Madras issues (1862 only) have Bust "C" and Rev. II.

SILVER

Calcutta Mint issues have no mintmark. Bombay coins dated 1938-43 and 1945 have a bead below the lotus flower at the bottom of the reverse. Specimens dated 1944 with Rev. B have a diamond in the same position. Those dated 1944 with the normal common reverse have either a bead or a diamond. Lahore Mint issues have a small raised "L" in the same position as the Bombay coins.

The nickel pieces of the last issue have a diamond below the date on the reverse.

ONE RUPEE

SILVER

VICTORIA

The rupees dated 1862 were struck with the date unchanged until 1874. However, in 1863 the Bombay Mint adopted a method of adding dots or beads to its dies to indicate the exact year of minting. The beads occur in the following positions:

1. Below the base or whorl of the top flower.
2. Above or around the top of the bottom flower.
3. In both positions together.

The different busts are identified as follows:

Bust A - The front dress panel has 3-3/4 sections with two dividing lines below the lowest string of pearls.

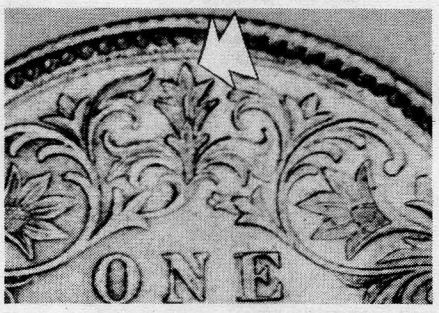
Bust B - The front dress panel has 4-1/4 sections with three dividing lines below the lowest string of pearls.

Bust C - Like bust A, but shorter at the bottom. The front panel has only 3-1/3 sections.

The reverses are identified by the design of the top center flower as illustrated.

Rev. I

Rev. II



Rev. III

A variety of Rev. II, designated as IIa, shows the flower buds with a pineapple-like pattern above "ONE" and above right of the second "E" of "Rupee". In the listing of 1862 rupees, the date column indicates the year in which the coins are believed to have been struck. The variety column lists the Obv./Rev. combination and the bead position. For example, A/I 0/0 means Bust A, Rev. I and no beads. A/II 1/2 means Bust A, Rev. II, and one bead at the top and two beads at the bottom.

The mintage figures for the 1862 dated rupees are:
Calcutta 269,427,222
Bombay 408,003,034
Madras 29,481,923

The B/II 0/0 coins are attributed to the mint of issue as follows: Calcutta, 30.3mm, round pearls in crown arch.

Bombay, 30.5mm, elongated pearls in crown arch. The scroll-like floral design of the dress is in flat relief and has a depression around it. Madras, 30.5mm elongated pearls in crown arch. The floral design is in high relief and shows no depression.

	1874B	C/I, 1/2		RR	
	1874B	C/II, 1/2	2.25	3.75	5.75

From 1874 onward the coins show the year date. The designs are similar to those on the 1862 rupees but only Bust "A" and the reverses I and II were used.

Calcutta Mint issues dated 1874-78 have no mintmark. From 1879 the mintmark is a small incuse "C" on the whorl below the center of the bottom lotus flower on the reverse. All Calcutta issues have Rev. I.

Bombay Mint issues dated 1875-1883 have as mintmark a small bead directly above the center of the bottom lotus flower. From 1883 the mintmark is a small "B" raised or incuse above the whorl or base of the top flower. Both mintmarks occur on the coins dated 1883. The issues dated 1874-76 have Rev. II only, those dated 1877-85 have both reverses I and II. Rev. II distinguishes the 1874 coins which have no mintmark from those of Calcutta.

EDWARD VII

Calcutta Mint issues have no mintmark. Bombay Mint issues have a small incuse "B" in the space below the cross pattée of the crown on the reverse.

GEORGE V

Calcutta Mint issues have no mintmark. Bombay Mint issues have a small raised bead or dot in the space below the lotus flower at the bottom of the reverse.

The rupees dated 1911 were rejected by the public as the elephant of the Order of the Indian Empire shown on the King's robe supposedly resembled a pig, an animal considered to be unclean by Indians. These coins were withdrawn from circulation. Out of a total of 9.4 million pieces struck at both mints, only 700,000 were issued. The remainder and the withdrawn pieces were melted down. The issues dated 1912 and later have a re-designed elephant.

GEORGE VI

SILVER

No rupees with the "First Head" were struck for circulation. Those dated 1938-39 were struck in 1940 before the fineness of the silver coins was reduced to .500.

The pieces struck at Calcutta have no mintmark. Bombay issues dated 1938-41 and 1944-45 have a bead below the lotus flower at the bottom of the reverse while those dated 1942-43 have a small diamond mark in the same position. On the specimens dated 1944 with Rev. B the mintmark appears to be a "bead over a diamond". Lahore Mint issues have a small raised "L" in the same position as the Bombay coins. The last issue nickel rupees struck at Bombay have a small diamond below the date on the reverse.

The rupees dated 1943 occur with large and small "Second Head" and with large and small date figure "3".

REGAL GOLD COINS
VICTORIA

Three denominations of gold were struck for currency: Five Rupees, Ten Rupees and One Mohur (15 Rupees). Two different busts occur on the coins which are designated as "Young Bust" and "Mature Bust".

The One Mohur dated 1882 has as a mintmark a small raised "C" below the date (= Calcutta). The coins listed here are those for which currency specimens have been recorded. Other dates probably exist.

GEORGE V

Two denominations of gold coins were struck. The first was a 15 Rupees piece, struck in a reduced standard equal in weight and size to the British Sovereign. The second a British-type sovereign with the distinguishing mintmark "I" (= India) on the ground below the dragon of the St. George reverse. This coin was struck at the Bombay branch of the Royal Mint which was established for the minting of the sovereign in India.

INDIA NATIVE STATES

The native states of India took into consideration all of the states and principalities of India administration by native rulers under the suzerainty of the British Indian Government. Of the 675 Native States, 175 were under the supervision of the general government while the remainder were under the provincial government. A British resident was in each of the larger states and in each group of the smaller states. His powers varied according to the size of the state. Mugal emperors ruled India in the 18th century but the foreign powers added to the weakness of their rule. India then was divided into many sections. The Native States occupied one-third of the area of India or about 824,000 square miles with a population of 100 million. The divisions under the direct control of the British India Government included Haidarabad, Mysore, Baroda, Kashmir, Baluchistan Agency (3 states), Rajputana Agency (20 states), Central India Agency (153 states including Gwalior, Indore and Bhopal), Sikkim (transferred from Bengal in 1906), and the Northwest Provinces. The Provincial Government controlled Bengal, Bombay (controlled more than 377), Central Provinces, Eastern Bengal with Assam, Madras, United Provinces and Punjab. More than 500 states were supervised by the provincial governments, 377 by Bombay.

The coinage was irregular in shape. This is the most difficult area of numismatics to master.

Silver Rupee Weight = 10.7 - 11.6 grams

Note: The "dump coinage" of this series in choice condition demand high premiums due to the type of dies used and the method of striking.

Many "as struck" specimens actually only grade from F-VF even though no wear is evident.

INDONESIA

Indonesia is the former territory of the Netherlands East Indies along the Equator from the mainland of Southeast Asia to Australia. The more than 2,500 islands form a natural barrier between the Indian and the Pacific Oceans. It has a population of 115 million and the capital is Djakarta. Indonesian—a developed form of Malay—is the language of the island group which covers 575,000 square miles.

This is the land Columbus was trying to find when he sailed from Spain in 1492. An advanced civilization had existed for almost 1,000 years on Java and Sumatra. In the 17th century the entire area was brought progressively under Dutch control, it became one of their richest colonial possessions. In the first decade of the 20th century the idea of independence was started. Under Japanese occupation in WWII the movement was encouraged. Three days after the Japanese surrender a group declared independence. They gained it in 1949.

100 sen equal 1 rupiah.

IRAN

Iran is a constitutional monarchy of western Asia. The area is 636, 292 square miles and the population is 32 million. The capital of the country is Teheran. The development of constitutional government started in 1906. In 1921 the government was taken over and by 1925 the Pahlavi dynasty had been created. After the start of WWII the Shah abdicated in favor of his son. At the end of the war the Soviet troops in the northern provinces refused to withdraw and backed the Communist revolts which then set up the pro-Soviet government in the area. The Soviets were finally forced out of the area backed by the United Nations. The puppet governments collapsed. Iran has always been used by the Persians to describe their country, it became popular western usage in 1927 for Persia.

100 rials equal 1 toman, 1000 rials =1 Pahlavi, 1000 dinars =1 Kran, 20 shahis =1 Kran.

Numbering System

The numbering of Persian coins is that of — Steve Album — who is responsible for compiling this section. It is the first public use of this numbering system.

IRAQ

Iraq is the historic Mesopotamia. It is on the Persian Gulf in the Middle East. The country has a population of 8.7 million and an area of 170,000. The capital is famous Baghdad.

Iraq had been the site of several civilizations, including Sumerians—who had one of the earlist writing systems—Babylonians and the Parthians. Baghdad in the eighth century was a famous center for learning and the arts. Baghdad was also the outpost of the Ottoman Empire. Iraq became a British mandated territory at the end of WWI. Independence was obtained in 1932. A revolution in 1958 was followed by a coup in 1963, and another in 1968. Political upheaval has been current in Iraq, since 1968 most of the power has been in the hands of the military.

The language is Arabic reflected on the coinage, by the use of Arabic numbers and inscriptions.

IRELAND

Ireland is an island in the Atlantic Ocean, It has an area of 27,173 square miles with Dublin as the capital for the population of 2.9 million. Northern Ireland is still a part of the United Kingdom but the Irish Republic is a sovereign, independent, democratic state.

From 1800 to 1921 Ireland was an integral part of the United Kingdom. The Anglo-Irish treaty of 1921 established the Irish Free State of 26 counties. The six counties of northeast Ulster chose to remain with the United Kingdom. Ireland does not use the term "Republic of Ireland" but refers to the country as Ireland.

The Irish coins are famous for the animals they use in place of heros or rulers. Gaelic legends are used on the coins of Eire. Decimal coinage was started in 1969 with 100 pence being equal to 1 pound.

ISLE OF MAN

The Isle of Man is a possession of the crown of England in the Irish Sea. It has an area of 220 square miles and a population of 50,000. The capital is Douglas.

The Isle of Man dates back to prehistoric times with many megalithic monuments. The Vikings came to the Isle of Man in the 800 to 1000 period. In the 13th century the island fell into the hands of the Scots. In 1290 the islands went to England. In 1333 it was granted to Montacute the 1st Earl of Salisbury. In 1392 his son sold the island and the crown to a Le Scroppe. In 1399 Henry IV beheaded Le Scroppe and the island passed back to the crown. In 1406 it was granted to Sir Stanley by Henry IV. Thirteen members of the family ruled the island, then England took it back. After 1866 they received home rule. They have the oldest legislative assemblies in the world in the House of Keys.

The Manx language (Celtic) lingers but English is the common language. British and Irish coins are now used.

ISRAEL

State of Israel is located in the middle east with an area of 7,993 square miles for a total population of 2.85 million persons. The official languages are Hebrew and Arabic. An alternate language is English. Israel proclaimed Jerusalem as the capital in 1950. The U.S. and most other countries do not recognize Jerusalem as the capital and maintain embassies in Tel Aviv.

This modern state was created in 1948, but was preceded by more than a half a century of efforts by Zionist leaders to create a nation as a Jewish homeland. Turbulence has marked the short history of the country. The State of Israel is a republic.

The coinage issues from the State of Israel have been prolific. The first coinage system made 1000 mils equal to 1 pound. This was changed in 1949 to 1000 pruta equal to 1 pound. Currently 100 agora equal 1 pound.

ITALIAN SOMALILAND

Italian Somaliland was part of Italy's colonial empire in northeast Africa. It had an area of 194,000 square miles but since has been broken up into other territories as Italy lost control in the period after WWII. Modadiscio was the capital of Italian Somaliland and that city is now the capital of Somali Democratic Republic.

Moslem influence was felt early on the Somali coast. In the 16th century it was conquered by the Portuguese, by the country of Muscat in the 17th century and the Sultans of Zanzibar in the 19th century. By the use of treaty the area came under Italian influence in 1889. In 1905 Italy had direct administration of the major ports in the area. Italian attacks on Ethiopia came from Italian Somaliland in 1935. Italy lost the territory to Britain in 1941, eventually the United Nations trusteeship created the Somali Democratic Republic and Libya, independent states from former Italian Somaliland. Coinage of I.S. is obsolete.

ITALY

The "boot shape" of Italy is a 700 mile-long peninsula extending into the Mediterranean Sea. It has an area of 116,303 square miles for the total population of 53.8 million who call Rome their capital.

Modern Italy dates back to 1870 when, under King Emmanual II of the House of Savoy, they unified the country. Prior to unification Italy was a series of independent states. Napoleon was a dominant factor, in the latter part of the 18th and the early part of the 19th century, in the political maneuvers. After the collapse of Napoleon's rule a general shift of power and territories took place. The result being a unified Italy. From 1870 to 1922 it was a constitutional monarchy. In 1922 Mussolini created a dictatorship. In WWII (1940) Italy allied with Germany. In 1943 they were anti-Germany. In 1946, after WWII they became a republic.

"Repubblica Italiana" has 100 centesimi equal 1 lira.

THE RARE ITALIAN CROWNS HAVE BEEN COUNTERFEITED.

JAMAICA

Jamaica is one of the newer independent countries in the Caribbean Sea. The turtle shaped island covers an area of 4,411 square miles for the population of 2 million. The capital is Kingston.

Jamaica was "discovered" by Columbus in 1494 and then settled by the Spanish in the 16th century. In 1655 British forces occupied the island and by 1670 had gained possession of the island. Sugar and slavery made Jamaica one of the most valuable possessions in the world for more than 150 years. Slavery was abolished in 1838. In the late 1930s Jamaica began to take political control of their island. In 1958 Jamaica joined nine other British territories in the formation of West Indies Federation but withdrew in 1961. Jamaica gained independence August 6, 1962.

Decimal coinage came to Jamaica in 1969 when 100 cents were made equal to 1 dollar.

All struck at Royal Mint (except as noted).

JAPAN

Japan is a chain of islands lying in a 2,000 mile arc off the coast of Asia. The population of 102 million live in an area of 147,000 square miles. The capital city is Tokyo.

Traditional Japanese records use the legend that Japan was founded in 660 BC. In 405 BC they adopted the Chinese script and in the 6th century took Buddhism. The first fixed capital was in Nara from 710 to 1867 the Yamato Dynasty were nominal rulers but the power was held by the court nobles, regents or shoguns. First contact with the west occurred in 1542 by the Portuguese. Their ship had blown off course. In 1638 they expelled all foreigners due to fear of military conquest. In 1854 Commodore Perry again "opened" Japan. After WWII Japan retained its sovereignty after the treaty of April 28, 1952 went into effect.

100 sen equal 1 yen.

1-YEN

SILVER

"GIN" STAMPED

In 1897 Japan counterstamped her 1-Yen pieces and traded them as Bullion with other countries in the Orient. Each coin so traded was counter stamped with the Chinese-Japanese charactor for silver. Actual size of circle 6mm. It resembled the Japanese charactor for Silver "GIN" and the coin carries this nickname. Price of these coins is about 80% that price for a 1-Yen of the same date and grade.

JERSEY

The Bailiwick of Jersey is one of the channel islands controlled by the British. They are located off the coast of France in the English Channel. Jersey has about 45 square miles of area and the chief town is St. Helier.

Jersey along with the Bailiwick of Guernsey are the only portions which belonged to the Duchy of Normandy (France) that are still controlled by the English Crown. Prehistoric traces have been found along with Roman ruins and other artifacts a few hundred years old on all of the channel islands. The islands have been under English rule since their conquest in 1066 with the exception of German occupation in WWII. The governments of Jersey and Guernsey differ but the official language is still French. The English language is used for commercial purposes.

Decimal coinage came to use in 1968 when 100 new pence were made equal to 1 pound.

JORDAN

The Hashimite Kingdom of Jordan is an eastern arab state. It has an area of 37,100 square miles for the 2.1 million people. The capital is Amman.

Jordan was part of the Ottoman Empire from the 16th century until WWI. At that time regions now called Israel and Jordan were awarded to the United Kingdom as the mandate for Palestine and Transjordan, League of Nations mandates. In 1922 the British divided the adminstration establishing Emirate of Transjordan ruled by a prince and continued Palestine under British High Commissioner. On May 22, 1946 the mandate over Transjordan ended and on the 25th the independent Hashimite Kingdom of Transjordan. The country was renamed "Jordan" in 1950. Arabic is the official language but English is the commercial language.

The coinage of Jordan usually carries an English inscription. The system is 1000 fils equal to 1 dinar.

All coins 1949 to 1964 scarce to rare in UNC.

KATANGA

Katanga is a province of the Democratic Republic of the Congo (Kinshasa). Belgium gave the D.R.C. its independence on June 30, 1960. Within five days the Congolese army mutinied and on July 10, 1960 Belgium troops intervened. On July 11, 1960 the provincial governor of Katanga, Moise Tschombe, declared his province an independent country.

A coin issue was made in 1961 by Katanga under the name of the Banque Nationale or National Bank. As the capital of the province was Elizabethville it is assumed that the National Bank was in the same city. Elizabethville has since been changed to Lubumbashi.

The UN intervened in 1960 and supported troops in the area. In 1963 Moise Tshombe ended his resistance to the UN and the Democratic Republic of the Congo.

KENYA

Nairobi is the capital of Kenya which is a country of 10.9 million with an area of 224,960 square miles. It is on the east coast of Africa and Nairobi is the hub for many of the safaris.

The Arabs came to Kenya in the 8th century who were followed by the Portuguese and then the British. Much of the coast of East Africa was under the Sultan of Zanzibar until 1885. In 1895 it became the East Africa Protectorate and the name was changed in 1920 to Kenya Colony and Protectorate. Independence came on December 12, 1963.

Kenya, Uganda and Tanganyika entered into a treaty on December 1, 1967 which gives the three countries common service. The East African Development Bank is in Kampala, Uganda. The currency of Kenya is 100 cents to a shilling. Gold issues in 1966 remain in doubt as to their actual monetary usage.

KIAO CHAU

Kiao Chau or Kiaochow or Kiautschow are the various names for this section of the Shantung province of China which is on the Yellow Sea. The port on the Kiaochow Bay is Tsingtao which was the capital city of the German rule in 1897. Germany leased 117 square miles of the area with an agreement that all points within 32 miles of any point on the Bay were not to be affected by Chinese ordinances.

Germans occupied the Kiaochow Bay in 1897 after two missionaries were murdered in Shantung. The negotiations that followed resulted in the leasing of the area for 99 years. Germany created a free port in 1899. Japan took over in 1914, held the area until 1922, then it was given back to China. Japan took it back in 1938 and lost it to China after WWII.

Germany managed to issue two coins in 1909 based on 100 cents to a dollar. Their coinage is now obsolete.

KOREA

Korea is a mountainous peninsula, 600 miles long and about 135 miles wide located in northeastern Asia. Its area is 86,000 square miles. The present country is now divided into a North and South Korea which are also entries as they each issued coinage.

Korea was first unified in the 7th century and it was a semi-independent state associated with China until the latter part of the 19th century. Japan annexed Korea in 1910, lands, homes and other possessions were taken with out redress in courts as the Korean government was non-existent at the time. Korean is the national language, but during the Japanese occupation from 1910 to 1945, Japanese was supposed to replace the native language and script. English is now a second language. Japan did introduce a banking system in Korea in 1901 and the Bank of Korea came into being in 1909.

Many monetary systems have existed, 1000 mun = 1 warn (prior to 1892). 100 fun = 1 yang & 5 yan = 1 whan (1892-1902). 100 chon = 1 won (1902 to 1920). See North and South Korea.

KUWAIT

In the northeastern corner of the Arabian Peninsula lies the state of Kuwait near Iraq and Saudi Arabia. It has 6,000 square miles and a population of 534,000. The capital city is the same name as the country—Kuwait.

The founding of the present city—Kuwait—in 1740 is the start of the modern history of the country. It was founded by the Uteiba section of the Anaiza tribe who came from Qatar. The first contact with other states occurred in the 1775-1779 when the British-operated Persian Gulf-Aleppo Mail Service was diverted to Kuwait. In 1899 an agreement was signed with Britain. From that time until 1961 Kuwait enjoyed special treaty relations with Great Britain. Oil became a big factor after WWII and Kuwait is now the third largest oil producer in the Middle East. On June 16, 1961 Kuwait became fully independent from the United Kingdom.

LAHEJ

Lahej is a former state of Aden, which was part of the former British Eastern Protectorate and which is currently the new country of Southern Yemen. The capital city and the state carried the same name. No official census has ever been taken in the peripheral states of the Arabian Peninsula.

Lahej had the population of one of the major tribal groupings which are around the capital of Aden in Southern Yemen. The Abdali tribe occupied the former state and they were agriculturalists. The area is one of the most fertile areas of the country and the tribe is one of the wealthier groups in the country. Prior to independence their Sultan ranked as one of the most important of the Protectorate.

The current government has abolished shaykhdoms, sultanates and amirates, which once composed the Protectorates, in favor of six administrative regions.

The date 1291 (1874) appears on these coins and refers to the date the Sultan began his reign.

LAOS

Located in the heart of the southeast Asian peninsula the Kingdom of Laos contains 91,000 square miles with a population estimated at 2.9 million—no accurate census has ever been taken. The administrative capital is Vientiane while the Royal capital is Luang Prabang.

France took over the country from Siam in 1893. The Franco-Siamese Treaty of 1907 set up the present day borders which make it a land locked nation. In 1945 the prime minister of the "independent government" set up a kingdom. Troubles occurred and in 1946 French troops occupied Laos and recognized the sovereignty of the king. Laos gained independence from France in 1949 but France did not recognize the country until 1953. The underdeveloped country is still in upheaval.

Coins issues are based on the denominations of 100 centimes equal to 1 kip and are sporadic.

LATVIA

"Latvijas Republika" was an independent republic from November 18, 1918 to August 5, 1940 when the country was annexed to Russia. The area is 25,390 square miles with a population of more than 2 million. The capital city was Riga and the official language was Lettish.

The independence of Latvia came about at the end of WWI. In the 1920s they signed various commercial treaties with other countries. The depression of the '30s didn't cause too great a change in the country as agriculture was prime product. In 1934 the diet was suspended and in 1936 the prime minister assumed the office of president. In 1938 a return to constitutional democracy was in progress. Russia took over in 1940 and in 1944 Latvia became a part of the U.S.S.R. which the U.S. does not recognize.

The obsolete coinage was based on 100 santimu being equal to 1 lats.

LEBANON

Lebanon is on the eastern shore of the Mediterranean Sea. It has an area of 4,000 square miles and a population of 2.6 million. The capital city is Beirut.

Lebanon is the historical home of the Phoenicians. The Crusaders established strong defenses in Lebanon. At the end of WWI five of the Ottoman provinces making up Lebanon became a French mandate. The official language is Arabic but French and English are secondary languages. The current history of Lebanon has been centered around the terms of its presidents. Political turmoil has marked the end of each of the last presidents with an insurrection in 1958. The present Chamber of Deputies was brought into being after the elections of 1968. The country gained its independence in 1943 and French troops were withdrawn in 1946.

LIBERIA

The Republic of Liberia lies at the southwestern end of the western bulge of Africa. The estimated area is 43,000 square miles populated by 1.2 million whose capital is Monrovia which is on the 370 mile Atlantic Ocean coastline.

The country had its origin in 1816 when the American Colonization Society was given a charter by the U.S. Congress to send freed slaves to the west coast of Africa. The country was settled in 1822 with the U.S. furnishing funds for the cession of land from the native chiefs. In 1847 the country became the first independent country in Africa. Only Negroes or people of Negro descent may become citizens of Liberia and only citizens can own land.

Liberian coinage is the dollar divided into 100 cents. In recent years proof sets have been issued by Liberia plus some coins listed as "controversial." Typical coin design is a native girl on the obverse with value on reverse.

Through the years the coins of Liberia have been produced at several mints. Although mint marks generally do not appear on the issues, the following designations have been used to identify the mints of issue in the listings:

B—Brussels (Belgium)
D—Denver (U.S. Mint)
G—Gibbs (Belleville, N.J.)
H—Heaton (Birmingham, England)
L—London (Royal Mint)
P—Philadelphia (U.S. Mint)
S—San Francisco (U.S. Mint)
Sw—Swiss Federal Mint (Bern)

Most of the Liberian pattern series, particularly of the 1888-90 period are acknowledged to have been "unofficial" privately sponsored issues, but they are without exception avidly collected by most collectors of Liberian coins. The "K" number designations on these pieces refer to a listing of Liberian patterns compiled and published by Ernst Kraus.

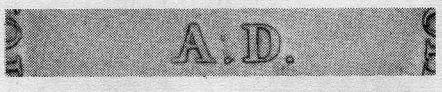
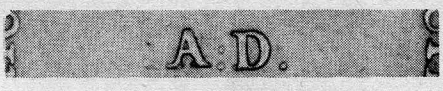
1	1833	G	—	4.00	12.00	40.00

This piece has been attributed in six distinctive varieties by Charles G. Colver and Dan Harley, who have designated them in their order of incidence in a large hoard examined.

CH-1—Obverse; 1 in date left of tree trunk, small ship, 15 rays, 13 palm tree leaves, bush top at water line—Reverse; wide spaced A D, single period between.



CH-2—Obverse; 1 in date under tree trunk, large ship, 14 rays, 12 palm tree leaves, bush top above water—Reverse; narrow spaced A D, double periods between.



CH-3—Obverse; 1 in date under tree trunk, large ship, 14 rays with second touching ship, 10 palm tree leaves with leaf between L I, bush top at water line—Reverse; narrow spaced A D, double periods between.

CH-4—Obverse; 1 in date left of tree trunk, large ship, 11 rays, 12 palm tree leaves with leaf between B E, bush top above water—Reverse; wide spaced A D, single period between, and first "N" in "COLONIZATION" tilted upward.

CH-5—Obverse; as CH-1—Reverse; very narrow A D.

CH-6—Obverse, as CH-2—Reverse; as CH-4.

LIBYA

The Libyan Arab Republic was formed in 1969. The country is on the north-central coast of Africa which has an area of 680,000 square miles. Co-capitals exist, one is Tripoli and the other is Benghazi, both on the Mediterranean Sea. Nine-tenths of the 1.9 million pople live in less than 10% of the total area.

For centuries Libya was under foreign rule. After WWII Italy relinquished title to Libya. In November of 1949 the United Nations passed a resolution that Libya should be independent prior to 1952. December 24, 1951 marked the independence day and Libya was proclaimed to be a constitutional and hereditary monarchy under King Idris. An overthrow of the government was made on September 1, 1969 which abolished the monarchy and proclaimed the Libyan Arab Republic.

Nothing spectacular has been noted in any of the Libyan coinage issues, 10 milliemes equal 1 piastre.

LIECHTENSTEIN

Liechtenstein is an independent principality between Switzerland and Austria. It is a principality of 62 square miles with a population of 22,000. The capital is Vaduz.

Along with Monaco and San Marino it rates as one of the smallest independent sovereign states of Europe. It was founded in 1719 and formed part of the Holy Roman Empire. From 1806-15 it was included in the Rhine confederation and from 1815-66 in the German confederation. Since 1866 it has been an independent country. The standing army was abolished in 1868. Until 1918 Liechtenstein was associated with Austria. In 1921 it adopted the Swiss Customs Unit. Switzerland also administers the telegraph and postal services. The language of the country is German.

Several monetary units have been used such as 1.5 florins equal to 1 vereinsthaler, 100 heller = 1 krone (1892-1923). 100 rappen = 1 frank (1924). Controversial issues have been issued in recent years.

LITHUANIA

"Lietua" or Lithuania S. S. R. is the southern most of the Baltic states. It is an area of 25,174 square miles with a population of 2.7 million from the capital city of Vilnius. The language is Lithuanian.

Lithuania is one of the Baltic states which the Western countries consider not to be part of the Soviet Union. First independence was gained in 1918 at the conslusion of WWI. It was occupied by the Soviet Union in 1939 and taken outright in 1940. From the latter part of 1940 to 1944 it was occupied by German troops and then was retaken by Russia.

The coinage of Lithuania as a republic is obsolete. It existed as pure Lithuanian issues from 1925 to 1938 with issues only in 1925, 1936 and 1938. The last issue by Lithuania was one that commemorated the 20th Anniversary of the founding of the country.

LUNDY

An island off the west coast of the southern part of England at the entrance to the Bristol channel. It is 12 miles northwest of Devonshire, England. Other than the Marisco castle no other place name is used by the 32 persons that live on the 1,150 acres.

Recorded history of the island tells of prehistoric remains and the ruins of an ancient castle of St. Helen. In the 17th century the island became a hiding place for French privateers. In 1925 a London business man, Martin Coles Harman purchased the island for an estimated $25,000.

Harman issued "coins" for his island struck by the private mint in Birmingham, England. They carried his portrait and were dated 1929. In April of 1930 he was fined by the British government for the illegal coinage under the Coinage Act of 1850. Another controversial issue was made in 1965.

LUXEMBOURG

Luxembourg or Letzeburg is a Grand Duchy with 999 square miles of area, it has a population of 336,000 and the capital has the same name as the country—Luxembourg.

Luxembourg was created as a Grand Duchy in 1815 by the Congress of Vienna. It was granted political autonomy in 1839 by King William I of the Netherlands, who was also the Grand Duke of Luxembourg. In London in 1867 the powers in the world recognized the Grand Duchy as an independent state and guaranteed it perpetual neutrality. It was overrun by Germany in both world wars and then in 1949 abandoned its neutrality by joining the North Atlantic Treaty Organization (NATO). After a 45 year reign the Grand Duchess voluntarily abdicated in favor of her son Grand Duke Jean on November 12, 1964.

Luxembourgish and French are the official languages with German being a secondary language. 100 centimes = 1 frang (franc).

MACAO

The Portuguese spelling is Macau and the Chinese name is Ao-men. It is an Overseas Province of Portugal on the southern coast of Communist China with a population of 292,000 in a six square mile area. Macao consists of the municipality of Macao and two islands, Taipa and Coloane.

Macao is the oldest European settlement in the Far East. It was used by the Portuguese traders as early as 1516. China agreed to Portuguese settlement in 1557 but not the sovereign right of Portugal. On March 26, 1887 the Manchu government gave Portugal the right of "perpetual occupation." Communist China has rejected the treaty and Portugal does not recognize the People's Republic of China. Status quo is maintained by both parties.

The coinage carries the Portuguese name of Macau on the obverse and Republic of Portugal on the reverse for a typical issue of provincial coinage. 100 avos equal 1 pataca.

MADAGASCAR

Madagascar is 228,000 square miles of island located in the Indian Ocean. It is the fourth largest island in the world and is located 250 miles from the southeast coast of Africa. The current population of 7 million call Tananarive the capital city.

Madagascar has a language which is Malagasy and of Malayo-Polynesian origin, it is universal through out the island. There are 18 separate ethnic groups on the island which first saw the Arabs make settlements in the 7th century. The island was sighted by the Portuguese in 1500 and the French established trading posts in the 17th century. The French took over as protectorate in 1885 and the island remained under their influence.

The first coinage for exclusive use of the island came in 1943 under the "Free French." It carried the French name as well as that of Madagascar. 100 centimes equal 1 franc.

MALAGASY REPUBLIC

The Malagasy Republic is the new political name for the island of Madagascar. After the fall of France in 1942. Madagascar was administered first by the Vichy Government and then by the British who had taken over the island to keep it from the Japanese. The Free French received it from the British in 1943. Uprisings occured in 1947 which made the French establish reforms in 1956. On October 14, 1958 the Malagasy Republic was proclaimed and became an autonomous state within the French Community. A period of provisional government ended on April 28, 1959 with the adoption of a constitution. Full independence was attained on June 26, 1960.

The coinage is the same as the old French issues, 100 centimes being equal to 1 franc. Complete issues of coinage for each year of independence has not been made. The outstanding coin being the issue for the FAO in 1970.

MALAWI

Malawi was known as Nyasaland before independence. It has a total land area of 37,000 square miles for the 4.2 million population. The capital of Malawi is Zomba.

The explorer David Livingston "discovered" Lake Malawi on September 16, 1859 and that began the western contact for Malawi. After his death many missions were established by the Scotch in Malawi (in honor of his missionary service) and business men from Glasgow established the African Lakes Company to cooperate with the missions and to trade and transport for them. That company is now the African Lakes Corporation. In 1883 a British consul came on the scene and by 1889 had a protectorate of Nyasaland established. From 1953 to December 31, 1963 Malawi was joined with Northern and Southern Rhodesia as the Federation of Rhodesia and Nyasaland. On July 6, 1964 Malawi became independent, as the Republic of Malawi. English and Chi-Chewa are the official languages. Decimal currency in 1971.

MALAYA

Malaya is a peninsula of land extending from Thailand into the China Sea and being terminated by the tiny island of Singapore. The area is 50,600 square miles with a population of more than 5 million. The capital of Malaya was Kuala Lumpur which is the capital of the current political division of Malaysia including the former eleven states of Malaya.

The Union of Malaya was formed on April 1, 1946. On February 1, 1948 this was changed to the Federation of Malaya and eleven years later the federation achieved independence from Great Britain on August 31, 1957.

Name changes are almost routine on the coinage for the area. First the East India Company, then India Straits, later the Straits Settlements then the issues of Commissioners of Currency Malaya followed by Malaya and British Borneo.

MALAYA & BRITISH BORNEO

Malaya was made up of eleven states consisting of the Federated Malay states of Negri Sembilan, Pahang, Perak and Selangor along with the Unfederated States of Johore, Kedah, Kelantan, Perlis, and Trengganu combined with two Straits Settlements of Malacca and Penang. Later in 1957 these units combined to become the Federation of Malaya.

British Borneo consisted of the British colonies of North Borneo, Sarawak and the protected sultanate of Brunei.

The coinage issued in this South China Sea area by the British carried the inscription "Malaya & British Borneo" from 1953 to 1962. The monetary unit was the Malayan dollar divided into 100 cents. This made it a legal currency in Singapore. For earlier coins see Malaya, for later issues see Singapore, Malaysia and Brunei.

MALAYSIA

Malaysia is a member of the Commonwealth of Nations. It has an area of 128,000 square miles with a population of more than 10 million (45% are under 15 years of age). The capital city is Kuala Lumpur.

The East and West parts of Malaysia are separated by 400 miles of the South China Sea. East Malaysia being Sarawak and Sabah (North Borneo) and the West section is the Malaya peninsula. Sinapore was included in the formation of Malaysia on September 16, 1963 but later withdrew due to friction and became an independent Republic.

More than 60% of the population speak the official language, Malay, but with wide differences in facility. The monetary unit is the Malaysian dollar which is divided into 100 cents.

MALDIVE ISLANDS

In the North Indian Ocean, 417 miles from Ceylon, lie the Maldive Islands of 12 coral atolls. The land area is only 115 square miles and the population is 110,000. The capital is Male.

The official name of the Maldive Islands is now the Maldives a republic. The early history of the country is obscure. Rule of the islands can be traced back more than eight centuries. Islamic conversion came in 1153 when Arab traders visited the group. In time the island came under the rule of the Portuguese, then the Dutch and finally the British. In 1887 they became internally self governing British protectorate. Current unrest started in 1959 and 1963. The British ceased to be responsible for the defense of the island but continued to hold bases until 1986. Independence came September 21, 1965.

100 lari = 1 rupee on the Maldivian language coinage.

MALI

The Republic of Mali with its 465,000 square miles of area takes up part of the interior section of West Africa. The capital is Bamako and the population of the country is 4.9 million. French is the official language of government and schools.

Mali traces its history back to ancient African empires. The original Malinke Kingdom which lends its name to the present Republic had its origins in the 12th century. French military moved into the Sudan area (Mali) in 1880. By 1904 it was French territory and in 1946 became part of the French Union. The Sudanese Republic was formed in 1959 and in 1960 joined with Senegal to make the Mali Federation. By the end of 1960 Senegal seceded and Sudan proclaimed itself the Republic of Mali (September 22, 1960).

100 centimes are equal to 1 franc.

MALTA

Malta consists of two islands, Malta and Gozo, in the Mediterranean Sea. They are 60 miles from Sicily and 180 miles from the coast of North Africa. The area is 121 square miles which has a population of 317,000 (population density of 2,600 persons per square mile) ruled from the capital city of Valletta.

Maltese (a Semitic language) and English are the official languages. The history of Malta starts prior to the Christian era. Phoenicians, Arabs, Italians and English have influenced the islands. The "Knights of Malta" ruled the island from 1530 to 1798. They elected to become part of the British Empire in 1814 and by September 21, 1964 had gained full independence.

The monetary unit is the Maltese pound (paper money) with coins of British issue. Up until early 1971 no coins have ever been officially issued with the Malta name.

MANCHUKUO

Manchukuo came into existence in 1934 when the Japanese declared the former Chinese Manchuria to be the "Empire of Manchukuo." Three Eastern Provinces of China, Liaoning, Kirin and Heilungkiang along with a fourth by the name of Jehol made up an area of 503,143 square miles with a population of 43.3 million. Prior to 1931 the capital was Mukden then in 1932 the Japanese made Changchun the capital and renamed it Hsinking.

Japan invaded the territory in 1931 and took Jehol in 1933. They declared their "Empire" in 1934 and placed a former deposed Chinese Emperor (1911) as a puppet ruler. Actual rule was by the commander in chief of the Japanese occupation forces who was concurrently the ambassador. Manchukuo was returned to China in 1945.

The coinage of 10 li equal to 1 fen and 10 fen equal to 1 chiao is now obsolete.

MARTINIQUE

An Overseas Department of France. One of the Windward Islands with an area of 425 square miles in the Lesser Antilles in the Caribbean Sea. The 331,000 population call their capital Fort-de-France.

Columbus discovered Madinina (land of the flowers), named by the Carib Indians, in 1493 or 1502. The legend on the island claims that the mixed dates are due to Columbus and his gout. When the islands were sighted in 1493 his gout and temperament got the best of him so he told his aides to ask the Carib Indians. It was never recorded. The conventional version has the landing in 1503 and named after St. Martin. First settled by the French under Chevalier Belan d'Esnambuc in 1635. In 1946 Martinique became part of the French Republic, equivalent of statehood.

The coinage of "Colonie de la Martinique" (1897-1922) is now obsolete.

MAURITIUS

Mauritius is an island about 500 miles off the coast of Malagasy Republic, in the Indian Ocean. It has a total area of 720 square miles with a population of 810,000 and the capital is Port Louis. Its dependencies are the Island of Rodrigues (40 square miles) and the Agalega and Cargados Carojos shoals.

Portuguese sailors were the first westerners to visit the island in the 16th century. The Arabs and Malays had been there prior to that time. The Dutch named the island in honor of Prince Maurice of Nassau and established a colony in 1638, but left it in 1710. French claims on the island were made in 1715 and they renamed it the Ile de France. Under the French East India Company it became prosperous. France took control in 1767. In 1810 it was captured by the British and confirmed by the treaty of Paris in 1810. Independence came on March 12, 1968.

MEXICAN COINS

Technically the history of Mexican coinage commences with the inauguration of the mint at Mexico City by the Spanish in 1536. The Spanish colonial empire in Mexico fell and the Mexican Empire was established on September 28, 1821, with the first distinctive coinage following in 1822. Mexico's modern coinage era, with which this listing is concerned, was launched with the institution of a monetary reform carried out in 1905.

The revised laws were published to correct an inequity in the balance of bullion values between silver and gold coins, and in so doing providing an useful coinage. This was accomplished by reducing the fine gold content of gold coins by nearly fifty percent, while reducing slightly both the weight and fine silver content of fractional silver coins and suspending issue of the silver peso. The anticipated result was realized, and Mexico soon had an active and effective coinage system again.

The inauguration of new coinage designs was carried out to emphasize the change. This held true not only for the silver values — 10, 20 and 50 centavos — but also for the 5 centavos, which was switched from silver to nickel, and the bronze 1 and 2 centavo issues. In the years which followed the sizes and metallic contents of Mexico's coinage were to be reduced, and in one instance increased, as the value of the nation's peso depreciated and the value of silver appreciated.

These variations — the .800 fine silver 10, 20 and 50 peso coins were reduced in size in 1918, and in fineness to .720 in 1919, with companion bronze coins being introduced for the 10 and 20 centavos being introduced — led to the creation of a diversity of coinage types. Silver was abandoned in the 10 centavos in 1936, and in the 20 centavos in 1943.

The 50 centavos coin, which had not been issued since 1925, was offered in 1935 as a .420 fine silver issue, then revived to the .720 fine standard with its next issue in 1937. Suspended after 1945, the denomination was again revived in 1950-51 as a .300 fine silver issue, before being switched to a base metal content in 1955.

Although the silver peso was to enjoy a longer life by about 20 years, after introduction in 1910 as a .9027 fine coin it was to decline in size and fineness to .800 in 1918, in fineness again to .720 in 1920, to .500 in 1947, to .300 in 1950 (one year issue) and to .100 fine in 1957, before being abandoned in favor of a cupronickel issue in 1970.

The falling intrinsic value of the peso led to the introduction of higher denomination .900 fine silver coins, the five pesos issue in 1947, which was knocked down to .720 fine in 1950 and abandoned after 1959, and the ten pesos issue of 1955, which was reduced in standard to .720 fine in 1957 (one year issue) although it was to be restored for a one year special issue in 1960 before being suspended. In 1968 a .720 fine 25 pesos issue was introduced.

Through all this time the standard of all Mexican gold coins — .900 fine — was maintained, although the changing economic conditions converted them into bullion issues after the 1920s, with the bullion content advancing beyond the face value. In recognition of this fact the 50 pesos issue of 1921-31 at reintroduction in 1943-47 omitted any mark of value.

The monetary reform carried out in 1905 resulted in the closing of the last of the 13 branch mints which had operated in the country since independence, and all minting functions were consolidated at the Mexico City Mint, the first mint in the Americas. Mexican coins are graded on standards similar to those used for the U.S. series. The point of definition is generally the eagle and the feathers of his wings.

MOMBASA

Mombasa is the chief port of the Republic of Kenya on the east coast of Africa. It is a city built on a coralline island.

Mombasa takes its name from the Mombasa in Oman. A settlement was made there in the 11th century. At the time of Vasco de Gama in 1498 it was a center of commerce. From the time of de Gama to the early 18th century it became a center for battles between the Portuguese and the various sultans. In December of 1823 the rulers of Mombasa placed the city under British protection. The protectorate was repudiated by the British in 1825 and left it to be harassed by Seyyid Said of Oman who took possession by treachery in 1837. Said then made Zanzibar the capital. In 1887 the city was handed over by the Sultan of Zanzibar to the British for administration. It became the capital of Kenya colony. In 1907 the central government was shifted to Nairobi.

Coinage of Mombasa issued in 1888 and 1890 is now obsolete. 16 annas = 1 rupee.

MONACO

Monaco is a sovereign principality on the Mediterranean Coast bounded on all sides by the French department of Alpes-Maritimes. The area is .579 square mile and has a population of 24,000. The capital is Monaco-Ville.

The Phoenicians and the Greeks had temples in Monaco, to Heracles and the Greek surname is the basis of the name of Monaco. In 968 Genoese Grimaldi family had possession of Monaco and allied themselves with France until 1524. At that time it allied with Spain. In 1641 they re-allied with France. In 1793 (French Revolution period) the National Convention dispossessed the family and annexed Monaco to France. The Treaty of Paris in 1814 gave Monaco back to the family. In 1815 the Treaty of Vienna put Monaco under Sardinia. In 1861 it went back to French protection. In 1911 Prince Albert granted the principality a constitution, Rainier III is the grandson.

100 centimes equal 1 franc, coin issues since 1891.

MONGOLIA

The M.P.R. or Mongolian People's Republic is a land-locked area of 600,000 square miles in Central Asia. It has 1.3 million population and Ulan Bator is the capital.

The area roughly coincides to the "Outer Mongolia" known to the Manchus as distinguished from "Inner Mongolia," in northern China. In the 12th and 13th centuries parts of Russia and China were brought under the control of the Mongols. By the year 1227 some Mongols had traveled as far west as central Europe. With the overthrow of their dynasty in 1368 by China their power declined. The Manchus conquered China in 1644 and brought Outer Mongolia under their wing in 1691. The Mongol rulers had autonomy under the Manchu rule and all of China's claims to Outer Mongolia following the overthrow of the Manchu dynasty and the establishment of the Republic have rested on the Manchu oath. Claimed independence as M.P.R. in 1924.

Mongolia script as well as Russian script on the coinage.

MONTENEGRO

A former kingdom in the northwest Balkan peninsula was Montenegro. It had an area of 5,880 square miles and the population of more than .5 million considered the capital of Montenegro, Cetinje.

On November 25, 1918 the country of Montenegro voted to join Serbia in the newly formed kingdom of Serbs, Croats, Slovenes and named Yugoslavia. The last king was Nicholas I whose daughter had married the king of Italy. In 1930, Yugoslavia, made Cetinje the capital of Zetska province. Under German aggression in 1941 the fate of the country remained undetermined. The territory came under Italian military occupation. In October 1941 the borders were established between Croatia and Montenegro returning them to the 1918 frontier. In 1944, after WWII, the Yugoslavia idea was again revived, a country of Serbs, Croats and Slovenes re-united. Montenegro is now a part of Yugoslavia.

The coinage of 100 para equal to 1 perper is obsolete.

MONTSERRAT

Montserrat is a leeward island with 77 square miles of area for a population of 14,000. The capital city is Plymouth. This island along with the British Virgin Islands did not become a member of the West Indies Associated States in the British Commonwealth.

Montserrat like the rest of the West Indies islands was discovered by Columbus in 1493 who named it for a mountain in Spain, Monserrado. This island has been under British control since 1783. English is the official language but an Irish brogue can still be detected due to an Irish settlement made in 1632. The only port of entry is the capital of Plymouth.

The coinage of the 1700s and the 1800s consisted of countermarked pieces which was the usual coinage for most of the islands in the West Indies.

MOROCCO

On the northwestern corner of Africa lies Morocco in a strategically situated position. It has a 1,700 mile coastline on the Atlantic and Mediterranean Seas. The area is 175,000 square miles with a population of 15 million. The capital is Rabat.

The location of Morocco has shaped its history. The Phoenicians were followed by the Romans, Vandals, Visigoths, Byzantine Greeks and then the Islamic Arab forces in the eighth century. The present dynasty, which has ruled from 1649, claims descent from the prophet Mohammed. France showed interest in 1830 and England recognized the "sphere of influence" in 1904. By 1912 France made Morocco a protectorate by the Treaty of Fez. Demands for independence were first made in 1944 and by 1956 had been met.

Morocco uses the AH dating system on their coinage. 100 centimes did equal 1 franc but the coinage reform in 1959 made 100 francs equal to 1 dirham.

Key to Rarity Scale Listed in Mintage Column
RRRR - RRR = —— ——
RR = Very Rare
R = Rare
S = Scarce
C = Common

The Hasani is a "name given to the money minted on the orders of Mawlay al-Hasan from 1299/1882-2 onwards."

The object was to replace the previous Moroccan coinage consisting of a multitude of bronze, copper or silver coins; the gold coins had practically disappeared a long time before.

The coins minted were the riyal or douro of a nominal value of 5 French francs, and the nuss (nist) riyal or half-douro, both of the standard of 900/1.000, then three other coins of the standard of 835/1,000: rub riyal (quarter of a douro), dirham hasani or hasani (tenth of a douro) and finally bilyun or gersh (kirsh) equal to a twentieth of a duoro. All of these coins were silver.

Thus is devised the names of all silver Moroccan coins since 1299 H.

Typical Inscription of Mint Marks on Coins.

MOZAMBIQUE

An Overseas Province of Portugal, Mozambique is also called Portuguese East Africa. It has 303,073 square miles of area and the capital, Lourenco Marques, oversees a population of 7.5 million.

The African tribal groups are divided and no extensive unity has ever existed among them. Portuguese is the single language of the territory with English being a second language. Vasco de Gama explored the region and in 1500 Portuguese trading posts and forts were scattered in Mozambique. In 1952 the colony became an Overseas Province of Portugal. A piece of German East Africa was added to the colony at the end of WWI.

First coinage of the colony was made in the 1700s by Portugal. The monetary system is the same as that of Portugal, 100 centavos being equal to 1 escudo. "Colonia de" was dropped from the coinage in 1952.

MUKALLA

Mukalla was formerly an independent Sultanate in the British East Protectorate, and is now a port city in Southern Yeman. It is located east of the city of Aden and is the only port city in the east of the country. It is the trading center for the Hadramaut with Aden and the Far East.

A topographic feature in the eastern part of Southern Yeman, a country that came into being in 1967, is the Wadi Hadhramaut. This is a wide valley running parallel to the coast but 100 to 120 miles inland. It is a relatively fertile valley surrounded by desolate hills and desert. The farming population of the country inhabit the valley. The small harbor of Mukalla is surrounded by white washed houses while the steep cliffs behind the town protect it from the landward side.

In the time of the British administration Mukalla was the capital of the Quaiti Sultanate and the seat of the British resident.

MUSCAT & OMAN

On the southeastern part of the Arabian Peninsula lies the 82,000 square miles of the Sultanate of Muscat and Oman. It faces the Gulf of Oman (northeast) and the Arabian Sea (south). The capital is Muscat for the 750,000 people.

Prior to 1970 Muscat and Oman was the least known and least visited country in the world as the Sultan kept outside contact with the world to a minimum. In 1970 a coup replaced the previous sultan and opened the country up to foreign visitors, and announced the new name of the country would be Oman. Portuguese made inroads in 1508 but were thrown out in 1650. Great Britain recognized it as a free state in 1951.

The coinage is dated by use of the Mohammedan Era dating (AH) and the monetary system is based on the Persian Gulf Rupee (official) and Maria Theresa dollar. 200 baizah equal 1 ryal.

NEJD

Nejd is currently a province of Saudi Arabia which is a vice-royalty. It consists of 450,000 square miles and the population is estimated at 4 million. The capital is Riyadh.

It was formerly a country of Arabia and took up the core of that ancient land. Nejd became a dependency of the Turkish Empire in 1871. The real independence of the area wasn't affected and the western and eastern portions of Nejd were ruled by individual amirs. In 1892 it came under the control of a single amir. In a war in 1905 the Turks suffered a defeat and by 1914, Abd-al-Aziz had his power extended to the Persian Gulf. He consolidated his control over the whole area by 1925 and the end result of his conquests is the Kingdom of Saudi Arabia of which Nejd is now a province.

Counterstamped coins of the Ottoman Turks, Egypt and Maria Theresa thalers are those of Nejd with the Arabic counterstamp which indicates Nejd.

All coins are counterstamped (c/s) "NEJD" in Arabic.

NEPAL

The Kingdom of Nepal lies along the southern slopes of the Himalayas and is a landlocked country of 500 miles long and 100 miles wide. The total area is about 54,360 square miles and the population is 10.6 million. The capital is Kathmandu.

Nepal was founded in the latter half of the 18th century. A number of mountain states were unified by the ruler of Gurkha. The country was formerly called the Gurkha Kingdom and the Nepal troops in the British Indian Army were called "Gurkhas." Today Nepal permits both India and Britain to recruit Nepalese nationals in their armies. After 1800 the heirs of the previous ruler couldn't keep Nepal under control until the 1840s. In the 1950s the kingdom was restored.

The dating system of Nepal uses the Samvat dates which uses 57 BC as the base date. 100 paisa equal 1 rupee.

Some small coins have only the last two digits of the date (18) 18 is used to show complete date.

NETHERLANDS

The kingdom of the Netherlands is in Western Europe with an area of 13,000 square miles. The population is 12.9 million and the capital is Amsterdam but the seat of the government is at The Hague.

Julius Caesar found the Netherlands inhabited by Germanic tribes. Later in the eighth century it was a part of Charlemagne's empire and from there to the House of Burgundy and the Austrian Hapsburgs. In the 16th century it was under Spanish rule which caused a revolt in 1568 and by 1579 the seven northern provinces became the Republic of the United Netherlands. In the 17th century it became a great power but declined in the 18th century because of wars with Spain and France. Belgium and the Netherlands joined and became the Kingdom of the United Netherlands. In 1830 the Belgians withdrew. The country was overrun by the Germans in WWII but restored on May 5, 1945.

100 cents = 1 gulden.

NETHERLANDS ANTILLES

Two groups of islands in the Caribbean about 550 miles apart make up the Netherlands Antilles. The "windward islands" are St. Martin, St. Eustatius and Saba. The "leeward islands" are Curacao, Bonaire and Aruba. The total area is only 393 square miles with a population of 225,000. The capital of the group is on Curacao and is Willemstad.

The Spanish landed in Curacao in 1499 and by 1527 Spain had taken Curacao, Bonaire and Aruba. In 1834 the three islands passed from the Spanish to the Dutch. Since the beginning of the 19th century the windward islands have been in Dutch hands. By a charter signed on December 15, 1954 the Netherlands Antilles became an autonomous part of the Netherlands Kingdom. To avoid confusion remember that the British "leewards" are in the Netherlands "windwards" area and the Netherlands "leewards" are in the British "windwards," which is a local joke.

Nederlandse Antillen uses 100 cents equal to 1 gulden.

NETHERLANDS EAST INDIES

Prior to WWI the Netherlands East Indies was an integral part of the Netherlands kingdom. Indonesia was another name in use and in 1945 the area involved became the Republic of Indonesia. The area of 575,000 square miles is spread around more than 2,500 islands which extend more than 3,000 miles along the Equator from southwest Asia to Australia.

The Dutch had the area divided into six provinces: Sumatra, West Java, Middle Java, East Java, Borneo and the Great East. The provinces were headed by Dutch governors while further difisions were headed by controleurs. In the local governments the powers were limited and under the supervision of a Dutch official.

The obsolete coinage carried the legend "Nederlandsch Indie" and the gulden was divided by 100 cents.

NEW CALEDONIA

This is an overseas territory of the French in the Pacific. The total area is about 7,336 square miles which covers New Caledonia and the Isles of Pines, Loyalty Islands, Chesterfield Islands, Walpole, the Huon Islands and Alofi. The latter are dependencies of New Caledonia. The capital city is Noumea and the total population is 96,000.

This group is about 1,100 miles off the northeast coast of Australia and was discovered by Captain James Cook, in 1774. It was annexed by France in 1853. In 1958 New Caledonia chose to remain as an Overseas Territory within the new French Community. The natives are Melanesians and speak French and Melanesian dialects.

"Nouvelle Caledonie" mark the coinage of the islands and 100 centimes are equal to 1 franc. "Republique Francaise" indicates it is a territory of France.

NEW GUINEA

The territory of New Guinea and Papua were joined in an administrative union by the Australian parliament on July 1, 1949. The area of New Guinea is 92,100 square miles with a population of 1.7 million. The provisional capital is Port Moresby.

In 1919 the League of Nations mandated the territory of New Guinea to Australia along with several outlying islands and territories. The other half of the island of New Guinea is part of the Republic of Indonesia. The mandated section of New Guinea was in the hands of Japan from 1942 to 1945. On December 13, 1946 it came under the trusteeship of the United Nations and once again the country of Australia became the administrating power.

The interesting part of the New Guinea coinage are the issues made in the 1942-1945 war time period.

NEW HEBRIDES

This is a Pacific Island group which lies northeast of New Caledonia in the Pacific Ocean. It is a group of islands which has been under the joint Anglo-French administration since 1906. The small group of islands is ruled from the capital of Vila on Efate Island by a British and French Commissioners. The area takes in 5,700 square miles with a population of 78,000.

The status of the island is officially an Anglo-French Condominium. In 1940 the islands joined the "Free French" movement after the capitulation of France. The islands in WWII were of importance for defense and offensive purposes.

The coinage is marked with "Nouvelle Herbrides" on the one side and "Reupublique Francaise" on the opposite. The coin issues of the condominium have been those of France and the French mint.

NEW ZEALAND

New Zealand is located in the southwest Pacific about 1,200 miles southeast of Australia. It has an area of 103,736 square miles for the population of 2.8 million. The capital is Wellington.

Although Europeans had known of New Zealand since 1642, it wasn't until the end of the 18th century that settlers came to New Zealand. In 1840 the United Kingdom annexed the country and signed a treaty with the native tribes, then established British sovereignty over the country. The first efforts to colonize the country also came in 1840 and continued until 1870 with resistance from the Maori tribes. By 1890 parliamentary government was well established. New Zealand was declared a Dominion on September 26, 1907 (Dominion Day) by royal decree. In 1947 it received full internal and external autonomy by the Statute of Westminster Adoption Act.

Decimal coinage was started in 1967 with 100 cents equal to 1 dollar.

NICARAGUA

The Republic of Nicaragua is the largest of the Central American countries with 57,100 square miles and it is located in the south-central part of Central America. Managua is the capital city of a country which has 1.8 million persons. Spanish influence being dominant.

Columbus sailed the coast in 1502, the Spanish arrived in 1519. Independence was declared on September 15, 1821. In 1822 the Cenral American provinces joined with Mexico but this lasted less than a year when the United Provinces of Central America was organized in 1823. In 1838 Nicaragua declared itself an independent republic.

The monetary unit is the cordoba divided into 100 centavos. Coins have been struck in Nicaragua since the 17th century. The early types being of the standard Spanish colonial designs. The outstanding feature of the coinage is the design of the mountain peaks with sun rising behind them.

NIGERIA

On the west coast of Africa along the Gulf of Guinea is Nigeria. It occupies 357,000 square miles with a population of 55 million. English is often the common communication among the 250 tribes.

Following the Napoleonic wars the British expanded their trade with the interior of Nigeria. In 1885 at an international conference in Berlin, Britain received recognition of their claims of "sphere of influence," in Nigeria. In 1886 the Royal Niger Company was chartered. In 1899 the charter of the company was revoked and the company's territory came under British Government control. In 1914 the colony was formally united as the Colony and Protectorate of Nigeria. It was still divided into Northern and Southern Provinces and Lagos Colony. Nigeria was granted full independence on October 1, 1960 as a federation of three regions (Northern, Western and Eastern).

NORTH KOREA

The Democratic People's Republic of Korea, North Korea, has a total area of 46,557 square miles with an estimated population of 13.8 million. It is located in northeastern Asia and has Pyongyang as the capital city.

This country of Korea was first unified in the seventh century AD and was a semi-independent state associated with China until the late 19th century. Japan took over the country in 1910. After the capitulation of Japan in 1945, the United States and U. S. S. R. agreed at Yalta to the temporary division of the Korean peninsula at the 38th parallel for Japanese surrender. Since that time the U. S. S. R. has treated the division as a frontier.

The monetary unit of the communist state is 100 chon equal to 1 won. All of the coins collected from North Korea are those that were issued in 1959.

NORTH VIETNAM

North Vietnam is the Democratic Republic of Vietnam. It has a land area of 61,300 square miles and an estimated population of more than 20 million. The capital is Hanoi.

In the first half of the 19th century French traders and missionaries attempted to expand their influence in Indo-China (Laos, Cambodia and Viet-nam). The countries at the time were isolationist and resisted the effort. Under the religious idea that the Christians were being persecuted by the Vietnamese the French attacked in 1858 and occupied Da Nang. Cochin China (southern third of Vietnam) was made a French colony in 1867. In 1884 more of Vietnam came under French control. In WWII from 1940 to 1945 the area was under Japan. The French returned after the war and in March 1946 the French recognized the Democratic Republic of Vietnam as a free state within the French Union. A Geneva conference set the 17th parallel as the partition of the country into North and South Vietnam.

100 xu equal 1 dong, for this communist country.

NORWAY

"Norge" is a Scandinavian country in northwestern Europe. The population of 3.8 million is ruled from the capital city of Oslo by a Parliament and a king. Less than 30% of the entire 125,000 square miles is usable land.

The Viking period (8th to 11th centuries) was one of national unification. In 1319 the Norwegian royal line died out which caused a "union" with Denmark. In 1536 Norway became a part of the Danish Kingdom. In 1814 Norway was forced to join with Sweden. Independence came in 1905.

The Scandinavian monetary convention of 1872 established the krone as the basic unit divided into 100 ore. When Norway became independent it retained this system. Germany issued occupation coinage in WWII (1941-45) or iron and zinc while the exiled government in London issued coins made of nickel-brass.

PAKISTAN

Pakistan is a country of two sections, the Western section being separated from the Eastern section by 1,000 miles of India. The Western part of Pakistan is 310,403 square miles with a population of more than 60 million. The capital of Western Pakistan is Lahore. The Eastern part of Pakistan has an area of 55,126 square miles and a population of 70 million. Dacca is the capital city for Eastern Pakistan. The capital of the central government is Islamabad. The actual name of the country is Islamic Republic of Pakistan.

Urdu and Bengali are the official languages of the country but English is the commercial language. More than 85% of the country is Muslim. The Muslim settlement being an idea conceived from developments in British India in the last century. Pakistan became a self-governing dominion within the British Commonwealth on August 14, 1947.

The decimal system was introduced in 1961 and in 1964 the English legends were deleted from the coinage. 100 paisa equal 1 rupee.

PALESTINE

A territory on the western edge of Asia in the Middle East, the major portion of which is now Israel. It consisted of 10,159 square miles with a population estimated at 1.9 million in its last year of existence. The capital was Jerusalem, which in 1950 was also declared to be the capital of Israel but is not recognized as such by most countries.

Palestine has been conquered and occupied by almost all of the foreign invaders in the Middle East. It has a 4,000 year old history. The last portion was the mandate given to Great Britain by the League of Nations on July 24, 1922 and terminated on May 14, 1948. Britain was to have established a national home for the Jewish in the area. Part of Palestine went to the Arabs for a small state while the largest portion was made into the State of Israel.

The obsolete coinage was based on 1000 mils being equal to 1 pound. The legends on the Palestinian coinage are in Hebrew, English and Arabic.

PANAMA

The connecting link between North and South America is Panama. An isthmus consisting of 29,208 square miles which is bisected by the 10 mile wide strip called the Canal Zone. The total population is 1.4 million and the capital is Panama City on the Gulf of Panama on the Pacific side of the country.

This country was discovered by Columbus in 1501 and 12 years later Vasco Nunez de Balboa crossed the isthmus and "discovered" the Pacific Ocean. Panama declared independence from Spain in 1821 and joined the Confederation of Great Colombia. In 1903 Panama claimed independence after Colombia rejected the U.S. Canal Zone idea.

The coinage of Panama is 100 centesimos equal to 1 balboa with the most famous Panamanian coin being the 2½ centesimos of 1904 called the "Panama Pill." Balboa in his Spanish helmet still appears on the coinage.

PARAGUAY

Paraguay is a landlocked semi-tropical country in the heart of South America. The 157,000 square miles of area supports the population of 2.2 million. The capital city is Asuncion.

On August 15, 1537, Asuncion, the capital city was established on the Feast Day of the Assumption by the Spanish explorer Juan de Salazar. Paraguay was one of the many colonies established by the Jesuits and fell into decay when the Jesuits were expelled in 1767. The overthrow of Spain in 1811 gave the country independence. It was under a dictatorship from 1814 to 1840. War against Brazil carried a loss of half of the population in the 1860-70 period. From 1880 to 1904 a series of presidents were in command. Political stability has yet to be achieved in the country.

The official language of Spanish shows on the coinage of Republica Del Paraguay where 100 centimos = 1 guarani.

PEMBA
(CLOVE) ISLAND

The North Island of the former Zanzibar Sultanate, located off the east coast of Africa in the Indian Ocean. The island is famous for its cloves which are the major export product, and is called "Clove Island". The major center is the town of Chake. The coinage consists of counterstamped (c/s) coins of the area, marked with a clove bud in which is inscribed "PEMBA" in Persian-Arabic.

PERU

The Republic of Peru is on the west coast of South America and takes up an area of 496,000 square miles. The population is 13.2 million and the capital is Lima.

The country is divided into three sections due to the topography; the coastal area, the Andes Mountains take up more than 25% of the total area. More than half of the land area is in the eastern lowlands. All of the uncharted hills, forests and jungles are in the eastern lowlands. When the Spanish first arrived in 1531 they found Peru was part of the Inca Empire. They were able to conquer the present area of Peru due to two claimants to the Inca throne. Peru was the principle source of wealth for Spain due to the gold and silver. Peru declared their independence from Spain on July 18, 1821 and the act became complete in 1824. In 1879 Spain finally recognized Peru's independence.

Official Spanish appears on the coinage which has 100 centavos equal to 1 sol.

PHILIPPINES

The Philippine archipelago consists of a chain of 7,100 islands between the Pacific Ocean and the South China Sea. The land area is 115,707 square miles with a total population of 37 million. The capital is Quezon City located on the island of Luzon but most of the government activities remain in the older capital city of Manila.

The history of the islands is broken into phases. The pre-Spanish, Spanish period (1521-1898), American period (1898-1941) and independence (1946-present). July 4, 1946 is the independence day of the Republic of the Philippines. In 1962 this independence day was changed to July 12, commemorating the day independence from Spain was declared in 1898.

English, Spanish and Tagalog appear on the coinage of the island which finds 100 centavos equal to 1 peso.

POLAND

The Polish People's Republic lies in eastern Europe. The postwar area of Poland is 120,000 square miles. Pre-war areas of 70,000 square miles went to the Soviet Union after WWII and 40,000 square miles are still waiting for border settlements. The population is 32.4 million and the capital is Warsaw.

At the end of WWI in 1919 Poland reappeared as an independent state. This came after more than 100 years of foreign rule and partition by Austria, Prussia and Russia in the late 18th century. Poland had been a state as far back as the latter part of the 10th century. In 1939 the invasion of Poland by Germany and a few days later by Russia made the Polish government go into exile, first in Paris, and then after the fall of France in London. Russia broke with the exile government and on July 22, 1944 installed a communist controlled government, after political upheaval the government is now communist again.

Poland has a long history and presently 100 groszy equal 1 zloty, on their coinage.

PORTUGAL

The Republic of Portugal is on the Iberian Peninsula in western Europe. The area is about 35,000 square miles for the population of 23 million (which includes the Portugal Overseas Provinces). The capital city is Lisbon.

Portugal is one of the oldest states in Europe. It traces its modern history back to the 12th century. It is a country which has been ruled by the Romans, Visigoths and the Moors. By the year 1250 all of Portugal had been liberated from the Moorish rule. Early in the 1300s Portuguese explorers had begun to search the world. Vasco de Gama, Dias and Cabral brought knowledge, power and wealth to Portugal in the 15th and 16th centuries. Spain ruled Portugal in the 1580-1640 period. From that point onward the power of Portugal declined. Overthrow of the monarchy in 1910 converted Portugal to a republic.

Portuguese, the official language appears on the legends of the coins which have been issued for a great number of years. 100 centavos = 1 escudo.

PORTUGUESE GUINEA

Portuguese Guinea is an overseas Province located on the west coast of Africa. It has 14,000 square miles of area and the population is 545,000. The capital is Bissau.

This area was discovered by the Portuguese in 1446. Very few trading posts appeared before the end of the 16th century. Bissau, the capital, was founded as a fort in 1765 and later became the chief commercial center of Portuguese Guinea. In the 19th century Portugal was in competition with France and Great Britain. By 1905 the borders had been settled. In 1941 the capital of the territory was moved to Bissau from the previous capital Bolama which is located on one of the islands off the coast of the country. Nationalist uprisings began in 1962 and have continued since that time.

The coinage reflects the country of Portugal and the country "Guine" on each side of the coin. 100 centavos = 1 escudo.

PORTUGUESE INDIA

Portuguese India consisted of several small areas off of the west coast of India. In 1954 India took the enclaves of Dadra and Nagar-Aveli which amounted to 188 square miles and they have been under their administration since 1960. The other areas of Portuguese India were Goa (1,394 square miles), Damao (211 square miles) and Diu (14 square miles). The population was last estimated at 700,000. The capital city of Portuguese India was Nova Goa (Panjim).

In 1960 Portugal made an appeal to the International Court of Justice in connection with the dispute with India over the enclaves of Dadra and Nagar-Aveli. The court then recognized Portugal's sovereignty over the two areas. In August of 1961 the Indian parliament integrated into India the two enclaves. India then took the other three enclaves in late 1961. Portugal claimed "agression" and India claimed "collapsing colonial government" allowed a quick fall and lack of resistance.

Past coinage from Portugal listed "Estado da India" on the coins and 100 centavos equal to 1 escudo.

PUERTO RICO

The Commonwealth of Puerto Rico is an island in the northeastern end of the Caribbean Sea. It is a self-governing commonwealth but is voluntarily associated with the U.S. The capital is San Juan and the total size of the island is 3,421 square miles with a population of 2.4 million.

The commonwealth was established in 1952. Prior to that time it was an unincorporated territory of the United States. It was ceded to the U.S. by Spain as a result of the Spanish-American War. This is another island that was "discovered" by Columbus on his second voyage in 1493.

The original coin issues for the island were under Spanish rule made in 1895. At that time 100 centavos were equal to 1 peso which is now obsolete coinage. Coins of the U.S. are now in use on the island. In fact many of the new issues of U.S. paper money are first distributed in Puerto Rico.

QATAR & DUBAI

The Amirate of Qatar (pronounced guttar) is a Peninsula attached to Arabia and is adjacent to Saudi Arabia and just northward into the Persian Gulf. The area is about 6,000 square miles with a population of 80,000 ruled from the capital of Al Dawhah (Doha). Dubai is one of the seven Trucial Shaikhdoms on the Arabian Penninsula. The capital of all of the shaikhdoms is the same as the Shaikhdom. Foreign relations are conducted by Great Britain for all of the area.

The countries occupy the area that was named the "Pirate Coast" because of the pirate activity for more than 300 years. Until recently the area was considered to be an economic backwater. In 1958 off shore oil was struck and now oil has been found on the mainland. Boundary problems now take on a new light. Qatar and Dubai appear in English on the coinage. 100 dirhems = one Qatar Riyal.

QUAITI STATE

Quaiti State was a part of the former British Eastern Aden Protectorate and it is now a part of the new country of Southern Yemen. The capital of the Quaiti State was Mukalla, which housed the British resident and the Sultan of Quaiti. Two large buildings at the western entrance of the harbor of Mukalla recall the former era.

The most important piece of property in the area is the Hadhramaut. The Hadhramaut is a relatively feritle valley running paralleled with the coast of Southern Yeman about 100 to 120 miles inland. In 1934 the British were forced to study the political conditions of the Hadhramaut. They sent an officer of the Colonial Administration to the area. The end result was the appointment of British advisors to the Sultans of Kathiri and Quaiti.

Counterstamped on copper and silver coins of East Africa, British East India Company and Austrian Maria Theresa Talers. Counterstamps are in two sizes about 10mm and 15mm.

REUNION

Reunion is an island located in the Indian Ocean about 450 miles from the eastern shores of Madagascar. It is a French Overseas Department and covers 970 square miles. It has a population of 426,000 and the capital is Saint-Denis.

The island was discovered by the Portuguese in the 16th century. When the French took over the island in 1643 it had the name Mascarenhas and was uninhabited. The French named it Bourbon in honor of the ruling house in France. In 1793 (French revolution period) a decree of the Convention changed the name from Bourbon to Reunion. In the period of the French Empire the name was changed to Ile Bonaparte. Upon restoration of a French king the name was again changed back to Bourbon. In 1848 with the start of the Second French Republic the name was officially changed to Reunion.

The coinage carries the name Reunion and 100 centimes equal 1 franc.

RHODESIA

Rhodesia is a self governing country located in south-central Africa. The 5.2 million people look to Salisbury as the capital of the 150,333 square mile area.

Southern Rhodesia was the name of the British Colony prior to the Federation of Rhodesia and Nyasaland which came to an end on December 31, 1963. Rhodesia declared its independence from Great Britain in 1965. They adopted a new constitution, replaced the Queen of England as their sovereign and severed their ties with Great Britain on March 2, 1970. Rhodesia is the common name of the country. The British Parliament however claims they have never legally changed the name from Southern Rhodesia. African nationalists call the country Zimbabwe.

In February 1970 Rhodesia converted to a decimal currency with 100 cents being equal to 1 Rhodesian dollar. The coins were struck in South Africa.

RHODESIA & NYASALAND

The Federation of Rhodesia and Nyasaland was a federation of three British central African territories, Northern Rhodesia, Nyasaland and Southern Rhodesia. The total area was 489,100 square miles with a population of 6.7 million ruled from the capital of Salisbury. Southern Rhodesia was a self governing country while the other two were protectorates of Great Britain.

On August 1, 1953 the new federation came into being after the proposals had been discussed for a number of years. The Central African Federation lasted ten years. In June of 1963 the decision was made to dissolve the federation on December 31, 1963. Nyasaland and Northern Rhodesia again became protectorates and Southern Rhodesia was to become a colony of Great Britian.

The obsolete coinage of Rhodesia & Nyasaland has one interesting coin, the ½ penny dated 1964.

ROMANIA

The Socialist Republic of Romania takes up 91,000 square miles in southeast Europe and extends inland across the Balkan peninsula. It has a population of 20.3 million and the capital is Bucharest.

Since the country was first colonized in 400 BC the history of Romania has been one of violence. The Romanian language has elements of Slavic, Germanic, Spanish, French and Italian. Romania was an independent kingdom from 1881 to 1947. Upheaval in politics turned out to be a Communist rule in the country. The name of the country was changed in 1965. The old, "Romanian People's Republic" was replaced with "Socialist Republic of Romania," in a new constitution.

The coinage of Romania, as such, dates back to the 1860s but other coinages such as issues under Austria for Transylvania and Balkan issues of Moldavia and Wallachia pre-date current coins. 100 bani = 1 leu.

RUSSIA

Russia, or more formally the Union of Soviet Socialist Republic, extends over 8.6 million square miles of Europe and Asia from the Baltic Sea to the Bering Strait. Its 15 republics encompass a population of about 242 million, or one-fifteenth of the world's population, spread over one-sixth of the world's land surface.

The first Russian state centered on Kiev in the 9th century, was overran by the Mongols in the 13th century, and reemerged centered on the present capital at Moscow in 1480. Under the domination of the Czars from the time of Ivan the Terrible (1547) to the overthrow of Nicholas II during the revolution (1917), Russia is today a Communist state. It enjoyed a short lived democratic government from the downfall of the imperial government in March, 1917, until the installation of the Communists in a coup on November 7 of the same year led by Vladimir Lenin.

100 kopecks = 1 rouble. Coinage history dates to the 10th century. Legends are in Cyrillic letters.

NOTE: Mintage figures for years after 1885 are for fiscal years and may or may not reflect actual rarity, the commemorative and 1917 silver figures being exceptions.

Abbreviations:
Mint marks —

ЕМ — Ekaterinburg
СПБ — St. Petersburg
ВМ — Warsaw
МШ — Warsaw
МШВ — Warsaw
Star (or rim) — Paris
2 Stars (or rim) — Brussels

RWANDA

The Republic of Rwanda is the northern half of the former U. N. Trust Territory of Ruanda-Urundi is in the heart of central Africa. The more than 3 million people live in an area of 10,169 square miles and call the capital Kigali.

The area was populated more than four centuries ago but the first European was a German Lieutenant Count von Goetzen in 1894. It became a German protectorate in 1899 and was then occupied by Belgian troops in WWI (1916). After WWI the territory was mandated to Belgium. At the end of WWII the territory became a U. N. Trust Territory. It became a republic on July 1, 1962. The constitution of the country was adopted on September 24, 1962.

The financial situation of Rwanda is precarious. It has maintained a stable currency which is the Rwanda franc. The coinage uses French inscriptions.

RWANDA & BURUNDI

Ruanda-Urundi was a U. N. Trust Territory administered by Belgium. The republic of Ruanda and the kingdom of Urundi are in the central African highlands. The total area was 20,916 square miles with 4.8 million persons with the seat of trustee government as Usumbura. The capital of Ruanda is Kigali and the capital of Urundi is Kitega.

On July 1, 1962 Ruanda-Urundi achieved independence as two sovereign states, the Republic of Rwanda and the Kingdom of Burundi. The local names of the countries were Rwanda and Burundi.

The coinage of Rwanda and Burundi features French legends. After the Republic of Congo became independent a Central Bank was established for their currency. It was established at Usumbura and the initials B.E.R.B. on the coinage indicate the "Banque d'Emission du Rwanda et du Burundi."

SAARLAND

The Saar is a strip of land between Germany and France and touching Luxembourg. It consists of 991 square miles with a million population. The capital of the area is Saarbrucken.

After WWI the League of Nations took the Saar from Germany on February 26, 1920. For more than a thousand years France and Germany had struggled for the area and Germany lost it in WWI. France occupied the Saar and declared their money was the official legal tender in 1923. When the League of Nations took it over it was promised that a vote to the people would come in fifteen years so they could select their future. On January 13, 1935 they voted to return to Germany. After WWII France again took it under her protection. In 1947 it became an independent state. In 1957 it voted to return to Germany.

The Saarland issued their own coinage in 1954-55 now obsolete.

SAINT KITTS

St. Kitts along with Nevis and Anguilla are part of the West Indies Associated States of the British Commonwealth of Nations with option for independence. St. Kitts covers 138 square miles in the Caribbean with 56,000 persons who call Basserterre the capital.

The island was first named St. Christopher by Columbus when he discovered it in 1493. The British, first European settlers arrived in 1623 and the French landed almost at the same time. Both ruled the island with Ha-Way Tree marking the boundary on the island. In 1783 it was ceded to the British, under the terms of the Versailles Treaty. Alexander Hamilton was born on January 11, 1757 on Nevis island.

The only coinage made for the island was that used in the 1700s which were countermarked pieces of French origin, sou marque called "black dog" on the island.

SAINT LUCIA

St. Lucia is the second largest island of the British Windward group. It has an area of 238 square miles for a population of 108,000 ruled from the capital of Castries. This island is now part of the West Indies Associated States in the British Commonwealth of Nations.

This Caribbean island was discovered by Columbus on June 15, 1502, without historical evidence, which is Saint Lucy's day. England made the first settlement in 1605 but for more than 150 years the Carib Indians resisted colonization while the British and French exchanged the island more than fourteen times. It was ceded to the British by the Treaty of Paris in 1814. One of the wonders of the island is the active volcano which last erupted in 1776.

Countermarked coins in the 1700s and 1800s were issued by France and England for use on the island.

ST. PIERRE & MIQUELON

Saint Pierre & Miquelon are a couple of islands 10 miles off the south coast of Newfoundland. They cover 93 square miles and have a population of 6,000 with the capital in Saint Pierre.

These islands have very thin soil with little vegetation and are to be taken for granite, which they are. They were occupied by the French in 1660, fortified in 1700, captured by the British in 1702, held until 1763, and then given back to the French. In 1778 they were taken by the British and restored to France in 1783. In 1793 they were captured and depopulated by the British recovered by France in 1802 and lost again in 1803. By the treaty of Paris they have been retained by the French since 1814. They are the last of the French Colonies in North America. Being near the great Banks makes them important for fishing fleets.

100 centimes equals 1 franc.

ST. THOMAS & PRINCE ISLANDS

St. Thomas and Prince Islands are off the west coast of Africa. An Overseas Province spelled-Sao Tome e Principe-in Portuguese, they have an area of 372 miles and a population of 66,000. The capital is Sao Tome on the island of Sao Tome.

When the Portuguese first discovered the island in 1470 it was uninhabited. It was first colonized in 1485 but with very little fortune. In 1493 a number of Jews and a band of criminals were put on the island. The capital was founded in 1500. In the 1500s the island did prosper but in the latter part of the century various attacks from outside and from inside just about did away with the colony. In the last half of the 19th century the past prosperity started to return.

The coinage carries Portuguese legends and is typical of Portuguese provincial coinage. 100 centavos = 1 escudo.

SAINT VINCENT

St. Vincent in the Caribbean has 150 square miles for a population of 95,000 ruled from the city of Kingstown. This "Breadfruit Isle" is part of the West Indies Associated States under the British Commonwealth of Nations.

This island was discovered by Columbus on St. Vincent's day, January 22, 1498. The Carib Indians fought against any colonization for almost 300 years before they were defeated. Captain Bligh brought the breadfruit tree to St. Vincent in 1792 from the South Seas. This island was one of the last of the West Indian group to be settled by Europeans. The British gained permanent possession of the island, from the French, due to the Treaty of Versailles in 1783.

As with most of the islands in the West Indies the coinage used on the islands was usually made up of countermarked pieces with no coinage being specifically struck.

SALVADOR

The Republic of El Salvador is located in Central America on the Pacific Ocean. It is the smallest of the countries in Central America with 8,000 square miles of area. The population is 3.4 million and the capital city is San Salvador.

Before the Spanish conquest the area was part of large Indian states, the Nahoa race. Spain tried to get the area in 1523 and failed but they returned in 1525 and retained control until 1821. El Salvador united with Mexico at the time but the union failed. In 1823 the Federal Republic of Central America was formed and in 1829 this dissolved. Since 1829 El Salvador has been an independent republic. Revolutions have marked the history of the country as an independent. Uneasy relations now exist with Honduras.

Spanish, the official language, shows on the coinage of Republica de El Salvador where 100 centavos equal 1 colon.

SAN MARINO

San Marino is a small republic in northeastern Italy, in the Apennines near Remini, Italy. It has an area of 24 square miles and a population of 18,000—mostly Italians—and the capital is San Marino.

San Marino is noted more for its postage stamps than for their coinage. Although the coin issues were made first in 1864 and the stamps were first issued in 1877. San Marino signed a customs unit treaty with Italy whereby they ceased to issue coinage—except gold pieces—and let Italian coinage be current in the country. The stamps continue in two issues, one for domestic use and one for foreign collectors. It is reported to be one of the oldest and smallest countries in the world. It was supposed to have been founded by a stone cutter, Marinus, a native of Arbe, back in AD 350. Independence was recognized by the papacy in 1631 more than 200 years before the unification of Italy.

SARAWAK

Sarawak was a British colony in northwest Borneo. It had 50,000 square miles and a population of more than half-a-million. Sarawak was originally part of the dominion of the Sultan of Brunei. Kuching was the capital.

James Brooke, an Englishman, halped put down an insurrection against the Sultan of Brunei. For his help he was given 7,000 square miles of land (Sarawak) and the title of Rajah, on September 24, 1841. The first coinage of Sarawak indicates this event. Brooke nearly lost his life in a Chinese uprising in 1857. From the time he became Rajah his deeds continued to bring him bits and pieces of new land to add to the original 7,000 square miles. He died in 1868 and his nephew Charles Johnson Brooke carried on until 1917. In 1904 the King of England recognized the title of Rajah. In 1917 Charles was succeeded by his son Charles Vyner Brooke. In 1946 the rajah ceded the country to the British crown. In 1963 it became independent and then joined the Federation of Malaysia.

SAUDI ARABIA

The Kingdom of Saudi Arabia takes up most of the Arabian Peninsula in the Near East. It has an area of 873,000 square miles and a population of 7 to 8 million. The capital is Riyadh but the foreign ministry and the diplomatic corps are located at Jidda.

Prior to the 20th century the country of Saudi Arabia was one of nomadic families and income from the Moslem pilgrims visiting the Holy City of Mecca. In the mid 19th century the Ottoman Turks forced the Wahhabi tribe to surrender. The leaders of the Nejd sultanate went into exile and were then exposed to western ideas. In 1902 the desert warriors were led back and at the end of WWI Ibn Saud was recognized as the Arab leader. In 1932 he was proclaimed the King of Saudi Arabia. Oil was discovered in 1938 and the current king now has $400 million a year from oil.

Arabic legends and numbers are used as well as the AH dating system on the coinage of Saudi Arabia.

SERBIA

Serbia, formerly an inland kingdom of southeastern Europe in the north of the Balkan peninsula. According to a survey carried out in 1884 by the Serbian general staff the area was 18,782 square miles. Belgrade was the capital city.

The first mention of Serbia was found in the era of the ninth century. The first founding of the Serb Kingdom was in 1159. The dynasty of Nemanyich ruled for 200 years, until the last king was killed in battle on September 16, 1371. For more than 345 years Serbia remained a Turkish pashalik or province. Once again in 1882 Serbia became a kingdom. Political problems plagued the kingdom in the late 19th and early 20th century. After WWI the Serbs joined the Croats and Slavs to form Yugoslavia.

The obsolete coinage carried the Cyrillic letters of the Serbian alphabet. 100 para = 1 dinar.

SEYCHELLES

The British Crown colony of the Seychelles is located in the Indian Ocean. It is an archipelago of 85 islands with 100 square miles of land area. It is largely isolated from the rest of the world and is 1,000 miles east of the coast of Africa. The population is 50,000 and the capital is Victoria on Mahe Island.

After the islands were known to exist by western explorers they remained uninhabited for more than a century and a half. They appeared on Portuguese charts in 1505. In 1742 a group from Mauritius went to the island to explore. In 1756 they again went to the island and made them the possession of France. Seychelles was named in honor of the French Finance Minister under King Louis XV. The French had control for more than 50 years. The islands went by treaty to the British in 1814. They were a dependency of Mauritius up until 1903; then in August of that year they became a British Crown Colony. Self government came in 1970.

SIERRA LEONE

Sierra Leone became an independent constitutional monarchy in the British Commonwealth of Nations in 1961. It is located in West Africa with an area of 27,925 square miles and has a population of 2.5 million. The capital city is Freetown.

Sierra Leone or "Lion mountain" received its name from the Portuguese explorer Pedro de Cinta in 1460. The first English arrived in 1562, Francis Drake arrived in 1580. The first settlements were planned as a haven for freed slaves within the British Empire. In 1791 a group arrived from the Sierra Leone Company (British) and in 1808 the unit was annexed as a British Crown Colony. The British at Freetown ruled over The Gambia and the Gold Coast settlements in the early part of the 19th century. Independence came after many years of planning on April 27, 1961.

SINGAPORE

A small island with an area of 225 square miles and a population of more than 2 million at the tip of the Malay peninsula describes Singapore.

The history of the island dates back to the 11th century. It was an important foreign port up until the 14th century. The modern Singapore was founded by Sir Thomas Raffles who arrived in 1819 as an agent of the British East India Co. In 1824 the British purchased the island. In 1826 Singapore, Penang and Malacca combined to make the straits settlements. In 1867 they were made a Crown Colony. In 1946 Singapore remained a Crown Colony while the Malay States were made into a federation. In 1959 it became self-governing. In 1963 it joined the Federation of Malaysia. On August 9, 1965 it separated from Malaysia and became an independent republic.

The Singapore dollar is divided into 100 cents.

SLOVAKIA

Slovakia is the eastern part of Czechoslovakia a country which was constituted in 1918. Slovakia has an area of 18,895 square miles and at the time it became a republic under the protection of the German Reich the population was more than 3 million.

Slovakia was a province of Czechoslovakia from 1918 to 1939. As an independent state it came into being in 1939 through German help. It signed a treaty with Germany which was to last for 25 years and this treaty then gave Germany the right to occupy Slovakia at any time for military purposes. The reign of Slovakia came to an end in 1945 when it was occupied by Russian troops. The government in exile for Czechoslovakia then took over in 1945 when once again Slovakia became an autonomous part of the reconstituted Czechoslovak republic.

SOMALIA

Somali Democratic Republic is part of the former Italian Trust Territory and part of the former British Protectorate of Somaliland. It is on the east coast of Africa in the area called "The Horn of Africa." It has 246,000 square miles with 2.7 million people and the capital is Mogadiscio.

Modern history of the country began in the late 19th century when the Europeans started to trade in the area. Italy obtained commerical advantages in 1885 and they had control of the area until after WWII. Italy lost Italian Somaliland by article 23 of the peace treaty in 1947. The United Kingdom let the protectorate of British Somaliland become independent in 1960. Independence of Italian Somaliland also occured in 1960. They formed the Somali Republic on July 1, 1960. In 1969 it was renamed to Somali Democratic Republic.

SOUTH AFRICA

South Africa is on the southern tip of Africa. It has an area of 472,494 square miles. The population is 21.3 million and the administrative capital is Pretoria while the legislative capital is Cape Town.

Africaans and English are the two languages used in the country. The Portuguese discovered the country in 1486. The Dutch East India Company established a station in the 17th century. British military occupation came at the end of the 18th century. Their influence sparked conflict between the two white groups (Afrikaner & British) early in the 19th century. The Union of South Africa came into being on May 31, 1910. It achieved sovereign state status in 1934. The Republic of South Africa came into being May 31, 1961. The current government advocates the "separate development" of the races or "apartheid policy."

Africaans is "Suid Afrika" and English is "South Africa" in either event the coins reflect both and with the new decimal system 100 cents = 1 rand.

SOUTH ARABIA

The Federation of South Arabia consisted of 16 of the 20 small British Protectorates in the Arabian peninsula, plus the former Crown Colony of Aden. The area was 60,000 square miles ruled from the capital of Al Ittihad and had a million population.

Arabic is the common tongue with English being understood. In 1959 six of the small protectorates formed the federation. and from 1959 to 1965 most of the others had joined. The name Federation of South Arabia was adopted in 1962. Three of the largest states didn't join and with a fourth state formed Southern Yemen. Great Britain granted independence to the Federation of South Arabia on November 30, 1967. At the time the name was changed to The People's Republic of Southern Yemen. Violence and riots continued into 1968 and 1969 until the National Liberation Front became the only legal political party.

1000 fils equaled 1 dinar.

SOUTH KOREA

South Korea or the Republic of Korea (ROK) has an area of 38,000 square miles and a population of 31.2 million. The capital is Seoul.

The two areas of Korea, North and South, were unified in the 7th century. It was a semi-independent state with China until the 19th century. Japan took over in 1910. After the defeat of Japan in WWII the Korean peninsula was divided at the 38th parallel into two zones. The north was made a Soviet military zone. This zone contained most of the natural resources and two-thirds of the heavy industry in Korea. The south was made the U.S. military zone. Unification of Korea failed in 1946-47 and the UN then made the south zone the Republic of Korea on August 15, 1948. The Soviets established the "Democratic People's Republic of Korea the following month. The Korean conflict started in 1950 and lasted until 1953.

Coins are dated according to the Korean calendar. 100 jeon = 1 won.

SOUTH VIETNAM

A narrow strip of land along the southeastern tip of Asia on the South China Sea is the Republic of Viet-nam. It has 65,948 square miles with 17.5 million and the capital is Saigon.

Vietnam gained independence from China in 939 AD. The French established control over Vietnam, Laos and Cambodia in the mid 19th century. Nationalist activity started against the French back in 1905 when Japan beat Russia and Sun Yat-sen had success in China. In 1945 the Deomocratic Republic of Vietnam was formed with the capital in Hanoi. In 1954 France signed the agreement of Cessation of Hostilities which marked the end of their eight year war. In 1961 assistance was asked from the U.S. and it was granted. In 1964 military units were sent.

SOUTHERN RHODESIA

Southern Rhodesia is located in south-central Africa. It has 150,333 square miles of area and a population of 5.2 million. The capital is Salisbury.

This is a British colony in conflict with the British Government. They failed to agree with Britain on the issue of racial policies. The government continued their policy of minority rule for the white population, although the constitution of Rhodesia does provide for eventual majority rule by Africans. Failing to agree the government on November 11, 1965 issued a unilateral declaration of independence from the United Kingdom and they then declared the name of the country to be Rhodesia. The new name is in common usage but the British Parliament which claims to be the only legal authority to change the name of a territory, has not changed the name from Southern Rhodesia. The African nationalists call the country Zimbabwe.

New decimal system in 1970 made 100 cents equal 1 dollar.

SOVIET CENTRAL ASIA

Soviet Central Asia was in central Asia and at the time was considered to be Russian Turkistan, an area of Turkistan. This would amount to an area of roughly 1,537,200 square miles and at the time consisted of khanates of Bukhara and Khiva. Bukhara was an important town in the center of a fertile oasis and was a commercial area for Central Asia. Khiva was once a great kingdom in Central Asia and Russia established relations with Khiva in the 17th century. Areas in Asia annexed by Russia were Kazakhs the major portion taken between 1824-54; Uzbeks 1856-76; Turcomen part in 1873 and the rest in 1881-85; Pamir in 1895. Bukhara in 1868 and Khiva in 1873. In 1920 both of the khanates of Bukhara and Khiva were destroyed and a People's Soviet Republic replaced the former khan governments. In 1925 another redistribution took place and the current Union Republics of the U.S.S.R. were made: Kazakh, Turkmen, Uzbek, Kirghiz and Tadzhik. In the years that England was founding New England, Russia had reached the Pacific coast.

The coinage is obsolete.

SPAIN

The mainland of Spain is in Europe. Spanish territories comprise the mainland, Balearic Islands, the Canary Islands, the presidios of Ceuta and Melilla and other enclaves in Africa. Metropolitan Spain has 195,988 square miles with a population of 34 million and the capital is Madrid.

Spain has seen the Phoenicians, Greeks, Carthaginians and the Moors. Then came the Celts, Romans, Visigoths among others. The present Spanish language, religion and law stem from the Romans in the 8th century. When the Moors took Spain they held it for more than 700 years before Spain became free of Moors and unified. This came in 1492 the same year Columbus discovered the New World. Spain was a leading power in Europe from 1492 to 1588. It still was strong for another century. France ruled Spain from 1808 to 1814 and Spain lost most of her territories in the few years that followed. The last king of Spain fled in 1931. In 1947 Spain was declared to be a monarchy but no king is on the throne.

100 centimos = 1 peseta.

Dates appearing in ( ) are actual dates of issue and appear in the stars flanking the large date.

STRAITS SETTLEMENTS

The Straits Settlements ranked as a British colony in the Malay peninsula. The area covered 1,337 square miles in 1900 after Christmas Island and Cocos-Keeling Islands were added to the group. Singapore, Penang (Prince of Wales Island), Province Wellesley, Malacca, Labuan, Christmas Island and Cocos-Keeling were the Straits Settlements.

The governor of the Straits Settlements was also the high commissioner for the Federated Malay States, for North Borneo and Brunei and Sarawak in Borneo. Singapore was the headquarters of the governor and high commissioner. In 1946 the Straits Settlements, Federated Malay States and Unfederated Malay states of British Malaya were organized into two political divisions, the Malayan Union and Singapore. The Malayan Union was unpopular so on February 1, 1948 the Federation of Malaya was established. In September 1963 Singapore (after independence in 1959) joined the federation to make Malaysia. They withdrew in 1965 but Malaysia remains and Singapore is a republic.

SUDAN

Sudan is the largest country in Africa and is located in the northeast portion of the continent. The area is 967,500 square miles with a population of 15.6 million. The capital is Khartoum.

From the beginning of the Christian era until the early 1800s Sudan was a collection of small independent states. It was unified by Egypt in 1820-21. A revolt occurred in 1881 and Khartoum fell in 1885. Sudan was proclaimed a condominium in 1899 under joint British-Egyptian administration. The period of 1899 to 1954 was one of British domination but the appearance of joint rule was maintained. The first self government parliament was started January 9, 1954 and Sudan achieved independence on January 1, 1956. This period then started riots, strikes, coups and political unrest. At the present time there is no constitution in effect (1971).

1000 milliemes = 1 pound

Y numbers in this section refer to numbers used in the 10th edition of Catalog of Modern World Coins by R. S. Yeoman.

MOHAMMED AHMED

(The Mahdi)

AH 1298 - 1302 = 1881 - 1885 AD
( ) after Date indicates regnal year on coin.
(Khartoum Mint)

Translation of Arabic symbols on Mahdi Dollars.

بامر المهدى = By order of the Mahdi (in Tughra)

ضرب = Struck (5)

في = in (at)

الهجرة = hejira

١٣٠٢ = 1302

سنة = Sanat (year)

*Coin struck by the Mahdi which is a copy of Egyptian coin under Turkish Sultan (See Fr. #4 Egypt pg. 336—Gold Coins of the World—Robert Friedberg). This coin is more crude than the Egyptian type and crude edge milling. Coin states "Struck in Cairo" however struck in the Sudan about 1302 A.H.

ABDULLAH IBN MOHAMMED

(The Khalifa)

AH 1302 - 1316 = 1885 - 1898 AD
(OMDURMAN MINT)

JOB numbers refer to COINAGE of the MAHDI and the KHALIFA by H. S. Job.

Translation of Arabic symbols on Khalifa Dollars.

مقبول = accepted (money) i.e., legal (Tughra)

سنة ٥ = Sanat (year) 5

سنة ٤ = Sanat (year) 4

سنة ١١ = Sanat 11 (year)

ضرب = Struck

في = at

ام درمان = Omdurman

١٣٠٤ = 1304 (A.H.)

١٣٠٩ = 1309 (A.H)

٢٠ = 20

ش = قرش = guresh = piastres

عملة جلديه = new coinage (in Tughra)

جيد = good

عز نصره = May his victory be glorified

ش ٢٠ = 20 piastres

SURINAM

Surinam is located on the north central coast of South America. It is the former Dutch Guiana. The area is 55,000 square miles with a population of 361,000 and the capital is Paramaribo.

Spanish explorers sailed along the coast as early as 1529 but the first colony was established by the English in 1630. This colony failed and twenty years later another English colony was started which became permanent. The first synagogue in the Western Hemisphere was erected by the Jews in 1665. By a treaty of Breda in 1667 the British exchanged Surinam for the Dutch rights in Nieuw Amsterdam (Manhattan, New York). The 18th and 19th centuries were ones of turmoil. England, France and Netherlands had the country at this time with the Dutch getting it in 1815. Surinam became an autonomous part of the Netherlands in 1954.

SWEDEN

"Sverige" is the name of the country in the Swedish national language. It is a constitutional monarchy in northern Europe headed by a king. Stockholm, the capital, is the largest city in a country that has 176,000 square miles and extends into the Arctic Circle. The 8 million people can use only half of the land because of the northern location. Sweden is the largest of the Scandinavian countries.

Several centuries ago Sweden was a great power in Europe. It started to lose part of this power in the 18th century and in 1809 Russia took Finland from Sweden.

Coinage started in the 10th century and in the 18th century was in a bad state of affairs. A three way-money system was devised and used. This is the period that the famous "copper plate" money was produced. The Scandinavian monetary agreement of 1872 is the reason that the krona is equal to 100 ore.

SWITZERLAND

Switzerland has a total area of 15,943 square miles and is considered to be the crossroads of northern and southern Europe. The population is 6.1 million and the capital is Bern.

It was originally inhabited by the Helvetii or Helvetic Celts and the name is still used on the coinage as "Helvetica." The history of the early days of Switzerland is the same as most of the European countries. They were invaded by the various tribes of Europe. In 1291 they found and were freed from the Hapsburgs. In 1315 they defeated the Austrians and their independence was accomplished. At first they were comprised of 13 cantons but became 22 cantons in 1815, the same year that they obtained from the powers, permanent neutrality.

German, French and Italian are the three official Languages in Switzerland. Bern mint uses the "B" mint mark on the coinage, commemorative issues are outstanding and the working coinage uses plain designs adopted more than 100 years ago. 100 centimes = 1 franc.

SYRIA

Syria, or more formally, The Syrian Arab Republic is located in the Middle East. It has an area of 71,498 square miles with a population of 5.8 million and the capital is Damascus.

The area of Syria has a 4,000 year old history. The capital city, Damascus, is one of the oldest continuously inhabited cities in the world. It was first settled in 2500 BC. It is also the fourth holiest city to the Moslem people after Mecca, Medina and Jerusalem and the current nick-name of Damascus is "Pearl of the East." Syria is one of the few Arab countries that does not possess commercial quantities of oil. France was given a mandate over Syria in 1919. By 1939 independence was promised at a later date. In 1958 (after independence in 1941) it voted to form the United Arab Republic with Egypt, it withdrew in three years. Political instability is current.

TANZANIA

The United Republic of Tanzania is comprised of the former Tanganyika and the islands of Zanzibar and Pemba. It is located on the east coast of Africa on the Indian Ocean. 361,000 square miles is the area with 13.3 million population. The capital, on the Indian Ocean, is Dar es Salaam.

Pre-history includes some of the oldest fossil remains which date back 1¾ million years. Otherwise little is known of the early history of the area. Portuguese touched the coast in 1498 and by 1506 claimed control of the whole coast. The Arabs drove out the Portuguese in the early 18th century. Livingstone established his last mission at Ujiji where he was "found" by Henry Stanley. German colonization ended after WWI, control went to the United Kingdom. On April 26, 1964 the United Republic of Tanzania was formed, the new name adopted in October of 1964.

Recent issues have 100 senti equal to 1 shilingi.

F.A.O. VERSION

6	1972	—	—	—	—

TARIM

Tarim and Ghurfah were cities in the Hadhramaut, which was in the former British Protectorate of Aden and now in the country of Southern Yemen. Many of the cities in the Hadhramaut such as Shibam, Seiyun or Taburkum are not typical of any of the world's towns. These are villages and towns which are not connected with paved highways.

The places were developed by wandering tribes and are normally a cluster of houses made of mud bricks. Some of them are built as high as six stories. These places are surrounded by gardens and date palms. Most of the buildings are simple and austere decorated, with a simple pattern of white plaster-work. Usually the places have a number of mosques with white towers and blue laticce bands along with white domed tombs of saints. The towns are similar in nature.

THAILAND, SIAM

Thailand, formerly the Kingdom of Siam, is in the heart of South East Asia. It has an area of 200,000 square miles and a population of 35 million. The capital is Bangkok.

Thai is the basic language but English is taught as a second language. English texts are used in the universities.

A kingdom since the 13th century, a constitutional monarchy was declared in 1932. Renamed Thailand ("Land of the Free") in 1939. Never colonized by Europeans, but a reluctant ally of Japan during WWII. Principal religion is Theravada Buddhism.

Religious symbols appear on many coins, i.e. the **Chakra** (sharp edged discus) and the Erawan (elephant). Flat coins first issued in 1860, replacing **bullet** money. During the reign of Rama V (1868-1910) the government was reorganized along Western lines and a strong British influence can be seen in the coinage of the period.

Early coins: 64 att = 8 fuang = 1 baht = 15.244 grams Current: 100 satang = 1 baht

NOTE: Any coins not listed are patterns, trials, medals, religious tokens or spurious. Numerous examples exist.

TIBET

Tibet in Central Asia has autonomous status with the People's Republic of China. It has an area of 469,294 square miles and a population of about 4 million. The capital of the former country is Lhasa.

At one time it was the only country in the world entirely under ecclesiastical control (with the exception of Vatican City). On May 23, 1951 a treaty was signed in Peking, China providing for the establishment of a Chinese military and administrative mission in Tibet. The maintenance of the dalai lama's authority and the undertaking of Tibet to unite behind the Chinese people's policy of opposing "imperialism." A Chinese force of 3,000 then entered Lhasa on October 26, 1951. This marked the end of Tibetan independence.

The past issues of coinage from Tibet are in the Tibetan language and reflect the religion of Lamaistic Buddhist.

TIMOR

An island with a split personality. The eastern part belongs to Portugal and the western section to Indonesia. The Timor island is off the northern coast of Australia. It consists of 6,000 square miles on the Portuguese section with a population of 600,000 and the capital of Dili.

The western section is part of Indonesia which includes Sumatra, Java and the lesser Sunda Islands which Timor is the last in the string. Portugal has a fingergrip on the eastern portion of the island. It was first settled by the Portuguese in 1600 and in 1859 was divided into the two sections between Portugal and Netherlands. The Dutch territories were lost after WWII including the segement of Timor to the Republic of Indonesia. It has the status of Overseas Territory by Portugal.

The current coins issued for exclusive use of the island are the ones from Portugal, 100 centavos equal 1 escudo.

TOGO

The Republic of Togo is located on the Gulf of Guinea with only 31 miles of coast line but stretches out 360 miles into Africa. It has a total of 22,000 square miles for a population of 1.8 million and the capital, on the coast, is Lome.

Germany in 1884 was declared the protectorate of an area called Togoland. In 1914 this area was invaded by the French and British (WWI). After the war Togoland was declared a League of Nations mandate and divided between France and England for administration. After WWII the mandates became UN territories. In 1957 the British segement joined with the Gold Coast to form a new country, Ghana. On April 27, 1960 the French section severed its ties with France and became the independent Republic of Togo.

The individual coinage was issued by France in the French section. 100 centimes equaled 1 franc.

TONGA

Tonga, Captain Cook's Friendly Islands, are located east of the Fiji islands in the South Pacific. It was a protected state of the United Kingdom. It consists of hundreds of islands which cover 270 square miles with a total population of 87,000. The capital is Nukualofa.

The language of the island group is Tongan and English. Full membership was achieved in the Commonwealth in 1970 when Tonga became the third independent South Pacific microstate. Membership in the UN was too expensive at the time. June 4, 1970 is independence day and the first celebration lasted four days.

Discovery of off shore oil is the hope of Tonga and the counterstamped coins of 1969 show this hope. The outstanding issues from Tonga were the palladium pieces issued in 1967 for the coronation of the king. The monetary system is 100 seniti equal to 1 Pa'anga.

TONKIN

Tonkin or Tongking was the northeastern part of French Indo-China. It was a 44,672 square mile area and the population was less than 4 million at the time of the coinage. The capital was Hanoi.

Tonking is now part of the Communist Democratic Republic of Vietnam. The history of the area is one of turmoil. Throughout the first half of the 19th century the French attempted to expand their influence in Indo-China. They were actively resisted by the local leaders. In 1884 Tokin and Annam, which is now central and northern Vietnam, became French protectorates. French control over the country of Vietnam was weakened by Japan in WWII. Japan occupied the area in 1940 and took full control in 1945. The communist government was formed in August of 1945.

The zinc coinage of 1905 is a reminder of Tonkin.

TRINIDAD & TOBAGO

Trinidad and Tobago are the most southerly of the Lesser Antilles group in the Caribbean Sea. Together they cover a land area of 1,980 square miles and they have a combined population of 1 million. The capital of the pair of islands is Port-of-Spain, Trinidad.

Trinidad is the largest island in the Lesser Antilles with 1,864 square miles of area. It is separated from Venezuela, South America by a 7 mile strait. It also has the world's largest natural asphalt bog which measures over 100 acres. It was used in past centuries for the calking of sailing ships and never lessens in volume. Tobago is called "Robinson Crusoe Island" and has 116 square miles of area. Trinidad and Tobago obtained full independence on August 31, 1962 from the United Kingdom and remained in the British Commonwealth of Nations.

100 cents = 1 dollar; first coin issues in 1966.

TUNISIA-TUNIS

The Republic of Tunisia is on the northern coast of Africa. It has an area of 63,378 square miles and a coast line on the Mediterranean Sea of 1,000 miles. The population is 4.7 million and the capital is Tunis.

Written history of the country goes back to 12th century BC. Phoenician traders established permanent settlements and Carthage was the most famous. The area was conquered in the 7th century by the Arabs and became a center of Western Islamic culture. The Turks took the area in 1574 and the French in 1881. Full internal autonomy was gained on June 3, 1955. France recognized independence in 1956 and in 1957 the Tunisians voted to end the monarchy and establish the republic. Since 1968 after many disagreements with France the area has settled.

1000 millimes = 1 dinar on Arabic inscribed coinage.

FRENCH DENOMINATIONS

1891 - 1946

The Bey of Tunis signed a treaty with France which placed the beylik under French protection. After 1891 and until 1946, Tunisian coins were inscribed on one side in French and on the obverse in Tunisian. The Tunisian side bears the denomination, date, and name of the state ruler in Arabic:

Reading of Arab inscriptions on Tunisian coins struck 1891 1946, all have reverse in French.

TURKEY

Turkey is considered to be in Europe and Asia. The total area of the country is 296,184 square miles and 97% is in Asia Minor. The population is 34.4 million and the capital is Ankara.

After the collapse of the Ottoman Empire, which lasted 600 years, the present Republic of Turkey was established. The new republic turned on the age old ambitions of the former empire and modernized and westernized the country. Mustafa Kemal Ataturk died in 1938, the founder of modern Turkey, but he left behind "Ataturkism." The current constitution was approved by national referendum on July 9, 1961 and put into operation that same year. The languages are Turkish, Kurdish, Arabic and English. The country is divided into 67 provinces each headed by a governor.

100 kurus = 1 lira; for the coinage of Turkiye Cumhuriyeti.

100 kurus = 1 lira; for the coinage of Turkiye Cumhuriyeti.

Old Coinage (prior to 1923)
40 Para = 1 Piastre
100 Piastre = 1 Lira

TURKS & CAICOS ISLANDS

This British colony is a group of islands southeast of the Bahamas. There are two main groups and they are separated by a 22 mile strait. The Turks include eight islands and the Caicos comprise six main islands. The total land area is 166 square miles and the population is about 7,000. The chief town or capital is Grand Turk on Grand Turk Island.

The Turks and Caicos Islands were members of the West Indies Federation. This was a federation of 12 British colonies which came into existence January 3, 1958. It was to have been an independent group but it went out of business on the very day it was supposed to receive its independence, May 31, 1962. The breakup of the federation was started when Jamaica seceded in 1961. In 1962 Trinidad left the federation. The remaining members of the federation reverted to their status as separate colonies.

TUVA

Tuva Autonomous Region is now an administrative region of the southern Russian Soviet Federal Socialist Republic (R.S.F.S.R.). It has 66,100 square miles for a population of 180,000 and the center or capital is Kyzyl.

Tuva is called Tuninian or in Russian—Tuvinskaya—can be listed as Tannu Tuva and considered to be Urianghai. It is on the edge of Outer Mongolia. Russia assumed direct control of the area in 1911, but it was not annexed to Russia. In 1921 the Tuva People's Revolutionary party declared the area to be a state. The U.S.S.R. supported separation of Tuva from Mongolia so they recognized the state. The Republic of Tannu Tuva, with the capital at Kyzyl, was proclaimed in 1926 after Mongol factions tried to include it in Outer Mongolia. By the end of the year Outer Mongolia and Tuva recognized each others independence. In 1944 Tannu Tuva was incorporated into the R.S.F.S.R.

The only coinage of Tuva was produced in 1934 for no explainable reason.

UGANDA

Uganda in east central Africa is along the Equator. The area of the country is 91,000 square miles with a population of 9.5 million. The capital is Kampala located near Lake Victoria.

The interior of Uganda was first reached in the 1830s. These Arab traders were followed by British explorers in the 1860s. Captain John Speke first reached Lake Victoria in 1862. Missionaries followed and in 1888 a Royal Charter was given to the Imperial British East Africa Company. In 1896 a British protectorate was established in the area now Uganda. Self-government came about in 1962 and full independence on October 9, 1962.

Uganda is a partner with Kenya and Tanzania in the East African Community (EAC) which started the East African Development Bank. The only noteworthy issue has been the Food and Agriculture (FAO) coin in 1968. 100 cents equal 1 shilling.

REGULAR ISSUE U.S. COINS

HALF CENTS

Although it survived as a regular issue for 65 years, the half cent was never a popular issue with the public. In total face value less than $40,000 of half cents were issued from 1793 through 1857 when it was discontinued in accordance with an act dated February 21, 1857. In most years 100,000 or less examples were issued, and for 20 years, 1830 through 1849, excepting 1832-35, none were actually struck for circulation, while the coinage was suspended completely from 1812 through 1824, and in only two years did the production exceed one million examples ($5,000).

With approximately 85 percent of the production concentrated in no less than nine years — 1804, 1805, 1806, 1807, 1808, 1809, 1828, 1829 and 1835 — many half cent dates and varieties are extremely scarce. However, just as it was never a popular coin of issue, neither has it ever gained popularity in the collecting fraternity. Authorized as a 132 grain issue by the original coinage law of 1792, the half cent's weight was reduced to 104 grains by a January 14, 1793 law before coinage commenced, and further to 84 grains by an act of March 3, 1795.

Braided Hair

The so-called "original" and "restrike" half cent examples of the 1840-49 period in each case utilize the same obverse dies, the distinction between the two versions being evidenced by the size of the berries in the reverse wreath. Relatively large berries are present on the originals, small on the restrikes.

LARGE CENTS

The early years of our coinage found the mint concentrating on the minting of cents, the coin most needed for daily commercial transactions. Most mintages were substantial and varieties numerous. Like a number of coin issues which would follow, the original chain cent design was subjected to much criticism and abandoned in favor of the wreath reverse. Although the chain's 15 links were intended to represent the solidarity of the states then in the union, it was interpeted as representing the chains of bondage.

The large cent, at double the weight of the half cent, was subjected to the same weight changes as the latter, with mintages being produced in every year except 1815. The weight changes in both the cent and half cent during this period were necessitated by rising copper prices. The 1795 change was substantial enough to prevent the need for any more adjustments for more than 60 years, but ultimately the unprofitable nature of the large cent, coupled with its inconvenient, cumbersome size demanded the introduction of the small cent.

FLYING EAGLE CENTS

The short lived Flying Eagle cent was conceived as the replacement for the large cent, offering the public a more convenient, cleaner and durable coin than the old coppers. It was made of an alloy of 88 percent copper and 12 percent nickel, its 72 grain weight being less than half that of its predecessor, and 12 grains less than the half cent. In the strictest sense the 1856 issue is a pattern, produced in large numbers so that the then proposed new issue could be offered in sample form to legislators, a substantial quantity of which were ultimately released to circulation.

INDIAN HEAD CENTS

After just two years the flying eagle design on the small cent, which James B. Longacre had copied from the Gobrecht pattern dollars of 1836-39, was replaced by his Indian head design. Two major changes were instituted during the life of this type, the first being in 1860 when after one year of issue the laurel wreath reverse was replaced by an oak wreath and shield device, then in 1864 the metal composition in the cent was changed to bronze and the weight reduced to 48 grains in accordance with a law enacted on April 22, 1864, designed to halt the practice of hoarding which had set in as a result of the Civil War and which led to the Civil War token issues.

LINCOLN CENTS

On the occasion of the 100th anniversary of Abraham Lincoln's birth in 1909 the introduction of Victor D. Brenner's Lincoln cent ended the life of the Indian cent at 50 years. In another 50 years a new reverse featuring the Lincoln Memorial, engraved by Frank Gasparro, was mated to Brenner's obverse. In 1969 Mint artisans refurbished Brenner's Lincoln portrait which had deteriorated badly in 60 years of use.

Through the years the 95 percent copper, 5 percent tin and zinc cent alloy specified in the coinage law of April 22, 1864, was altered in its latter proportions, with tin being permanently eliminated after September 5, 1962. An order of the Secretary of the Treasury dated December 16, 1943, which carried through December 31, 1946, allowed the mint to produce its cents from salvaged shell cases. This action was taken after the zinc coated steel cent issue of 1943, which had lawful weights of both 41.5 and 42.5 grains, proved unsatisfactory.

TWO CENT

Authorized by the same law which provided for the change to a bronze composition for the cent, the two cent piece had a weight (96 grains) exactly twice that of the cent. It served to fill the vital need for small change in expediting the replacement of monetary substitutes then in circulation, but soon outlived its usefulness, and its issue was halted by the major revision in the nation's coinage laws instituted in 1873. This coin, at the instigation of the Reverend Mark R. Watkinson, with the support of Lincoln's Secrtary of the Treasury Salmon P. Chase, became the first to carry the motto "In God We Trust."

THREE CENT SILVER

The trime, as the silver three cent piece was originally known, was created as a direct result of a reduction in the nation's first class postage rates, from five to three cents in 1851, although the issue was actually conceived a year earlier as an exchange coin for the redemption of underweight foreign fractional silver coins which were then still recognized as legal tender in the U.S. It was also applied to the latter purpose, which is the reason why its content was specified as .750 fine silver in a 12 3/8 grain weight, the latter exactly proportionate with the .900 fine silver coins of the day.

Although the denomination seems today to be quite odd, it was a well conceived issue which gained immediate public popularity. During the first three years of issue it was produced at a then unbelievable rate of about a million examples per month (half dimes of the period were being produced at a rate of substantially less than a million pieces per year).

The silver content of the coin was raised to .900 fine and the weight reduced slightly to 11.52 grains by an act of March 3, 1853 (the coin had been

authorized on the same date three years earlier), which brought it into conformity with the minor adjustments made in the weight of the nation's other silver coins by a law of February 21, 1853. The chaotic economic conditions brought on by the Civil War drove the coin out of circulation, and although it survived in limited issue qualities until the nation's coinage laws were rewritten in 1873, circulation quantities were not struck after 1862.

THREE CENT NICKEL

Faced with the fact that the silver trime was not circulating, the Congress moved in an act dated March 3, 1865, to authorize the introduction of a nickel composition three cent piece. The series enjoyed an uneventful history stretching over 25 years, although the annual quantities of issue after 1874 were largely insignificant. When the series was closed out in 1889, the quantities produced in any of the last 13 years exceeded 41,200 only in 1881 when over a million examples were offered.

HALF DIMES

These were the silver predecessors of today's nickel. The basic history of this series throughout its 80 year mintage closely parallels that of its sister fractional silver issues of the period, excepting the fact that its coinage was suspended during the years 1806 through 1828. Although the first issue is dated 1794, it was not produced until early the following year.

Originally authorized, like the nation's other silver coins, as a .8924 fine issue with a proportionate weight of 20.8 grains, the fineness was increased to .900 and the grain weight reduced to 20 5/8 by a January 18, 1837, law which similarly influenced the other denominations. The weight of the coin was reduced more substantially to 19.2 grains by the February 21, 1853, coinage law. To emphasize this change arrows were placed either side of the date on the affected 1853 coins, and all issues of 1854 and 1855. The half dime series was terminated as a result of the coinage law revisions of 1873, eight years after the first nickel five cent piece was issued.

SHIELD NICKELS

Issue of the nickel was authorized by an act of May 16, 1866, as a companion coin to the nickel three cent piece authorized a little more than a year earlier. Originally approved as a substitute for the half dime during the period following the Civil War when specie payments were suspended, the issue ultimately brought on the demise of the silver coin. The shield nickel designs are the work of the Mint's chief engraver James B. Longacre.

LIBERTY HEAD NICKELS

Charles E. Barber executed the designs for the Liberty nickel introduced in 1883. His initial design offered only the large "V" inside the wreath as an indication of denomination. This was too much for those of deceitful intent, who, finding the coin so similar in size to the half eagle, gave them a reeded edge and gold plating so that they might be passed on the unsuspecting as $5 instead of 5¢. This fault was quickly corrected with the addition of the word "CENTS" below the wreath in place of "E PLURIBUS UNUM," which was incorporated above the wreath.

The Liberty nickel series also encompasses one of the most famous American coins, the clandestine 1913 nickel made famous in nationwide numismatic promotions conducted by B. Max Mehl, in which he offered to pay $50 for specimens of the issue. Mehl never owned one of the coins, but knowing that the only five produced rested in collections he could make the offer without fear of its being accepted. The originals were produced in secrecy at the instigation of Samuel Brown, a one time mint employee, and they later passed into the possession of the rich eccentric Col. E. H. R Green, the son of Hetty Green.

Untold thousands of 1903, 1910 and 1912 Liberty nickels have been industriously altered with varying degrees of skill through the years by those who would pass them as authentic issues. Mehl was undoubtedly on the receiving end of many such specimens. One which was authentic was owned for some twenty-five years by coin dealer J. V. McDermott of Milwaukee, Wis., who offered his $900 purchase for display at coin events throughout the country. Following his death, the coin was sold to another dealer, Aubrey E. Bebee of Omaha, for $46,000.

Authentic — Altered Date

The above enlargements of the date areas of authentic and altered date 1913 Liberty Head nickels illustrate the normal differences in the configuration of the 3.

BUFFALO NICKELS

The Buffalo or Indian head nickel designed by James E. Fraser features the profile of an Indian head on the obverse and a likeness of the American bison Black Diamond from the New York Zoological Gardens on the reverse. Through the years many Indians have claimed to have been one of the three models Fraser stated he used in forming the

obverse design, who were chiefs John Tree, Iron Tail and Two Moons.

One of only three overdates among the U. S. 20th century coins is included in this series. It also includes a "D" over "S" mint mark variety, and one of the most popular mint error coins, the three-legged buffalo of 1937 from the Denver Mint. This error was created when the die was over polished in the area of the buffalo's front right leg, making it disappear. This error is easily faked, but there are several distinguishing marks on authentic specimens, including an irregular row of raised dots arching to the ground below the belly of the buffalo.

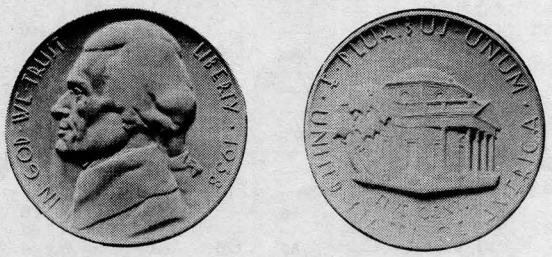
JEFFERSON NICKELS

The design of this issue resulted from a public competition in which Felix Schlag bested some 390 artists for a $1,000 cash award. Although Schlag's obverse design was largely retained in the production design, a completely new reverse was prepared by the Mint's engraving staff. The design went unsigned for nearly 30 years, until a small "FS" was added below the bust in 1966, in tribute to the last private artist to conceive a regular issue U.S. coin design.



Schlag's Jefferson Nickel Models

During the war years, the nickel composition for the nickel was abandoned in favor of a copper-silver-manganese alloy containing 35 percent silver. By the early 60's the bullion value of these coins exceeded their face value. To distinguish these issues from the nickel version large mint marks were placed above the dome of Monticello on the reverse, including a "P" for Philadelphia, the only time the U. S. mother mint has placed a mint mark on her domestic issues. Mint engravers prepared new master dies, sharpening the features on this coin for the 1971 edition.

DIMES

During the early years of U.S. coinage, the concentration on dime production was minimal, with only slightly more than a million pieces ($102,279.60) being struck up to 1820, as coins were issued in only 13 of 25 possible years. By the time the Liberty cap design was abandoned in 1837 the total had grown to only about 12.8 million pieces.

LIBERTY SEATED DIMES

Introduction of the Liberty seated dime series, and half dimes, quarters and halves as well, followed on the heels of the enactment of a January 18, 1837, law which reduced its weight to 41.25 grains from 41.6, in conformity with a 3.5 grain weight reduction for the silver dollar standard. This change in the law also provided for the fineness of silver coins to be increased from .8924 to .900.

An act of February 21, 1853, reduced the weight of all fractional silver coins by nearly seven percent, to 38.4 grains for the dime, so that they could be maintained in circulation in the face of the growing disparity between the relative values of silver and gold brought on by the California gold discoveries. Arrows were placed either side of the date on most 1853, and all 1854 and 1855 issues to note this change. A similar step was taken twenty years later when the weight of the dime, and the quarter and half proportionately, was increased slightly to 38.58 grains.

BARBER DIMES

After a run of more than half a century, the nation's Liberty seated silver coin designs were supplanted by the classical Liberty head designs prepared by Charles E. Barber in 1892. His signature, "B", appears at the truncation of the neck. The change was instituted, in large part, due to mounting public criticisms of the old designs.

MERCURY DIMES

The nation's fractional silver coin issues were redesigned in 1916 when the Barber designs were 25 years old. A.A. Weinman, whose monogram appears in the field behind the neck of the Mercury-winged head of Liberty on the obverse, designed this coin which carries a fasces on the reverse. This series offers one of the three overdates in 20th century U.S. coinage in the 1942/1 issue.

ROOSEVELT DIMES

National sentiment following the death of President Franklin D. Roosevelt on April 12, 1945, led to the creation of the Roosevelt dime which was introduced in 1946. It was fitting that the dime be used for the Roosevelt memorial issue, as the former President was so closely associated with the March of Dimes. The designs were executed by John R. Sinnock, whose initials "JS" appear at the base of the bust. On July 23, 1965, Congress authorized the introduction of a cupro-nickel clad copper dime to replace the silver standard composition whch had gone unchanged for more than 90 years.

TWENTY CENTS

This shortest lived of U. S. coins — it was actually issued in circulation quantities only in 1875 — was launched at the instigation of Western interests as the answer for change making problems in the West where cents and nickels did not circulate. Authorized by a law dated March 3, 1875, its close similarity in size and design to the quarter contributed to its demise. The coin was proportionate in weight to other silver coins being issued at the time. Congress revoked the authority for the issue on May 2, 1878.

Cleaning Coins

The subject of cleaning coins is a very touchy one, especially among advanced collectors. It is generally acknowledged, however, that a dirty or heavily tarnished coin is better cleaned than not, but only if the coin is properly cleaned, and not polished. A good rule to observe on the cleaning of coins is that a valuable piece should never be cleaned except by an expert, as its value can be greatly diminished through improper cleaning.

There are several good coin cleaners on the market today, some multi-purpose and others specifically suited for bronze, nickel or silver coins. Properly used, they can beautify a dirty or tarnished coin, but they should never be used on a coin held in one's collection until experimentation is first performed on a common coin. In cleaning coins they should never be rubbed or polished, as that removes the natural luster of the surface of the coin, and all abrasive cleaning elements should likewise be avoided.

The following two terms are basically descriptive of coining processes, not conditions of preservation, although they do imply conditions superior to uncirculated:

PROOF — Specially struck coins, generally with a mirror-like finish and sometimes with the highlight areas frosted, which mints sell direct to collectors at a premium. These coins are struck on specially selected planchets with highly polished dies.

PROOF-LIKE — This term was originally applied only to specially produced coins distributed by the Royal Canadian Mint — sets which are designated "uncirculated" by that institution. Struck from selected planchets, these coins have a brilliant surface, but are not as well detailed and perfect as proofs.

QUARTERS

If the production of dimes was minimal during the early years of U.S. coinage, the issue of quarters was infinitesimal. Introduced in 1796, as was the dime, the quarter was issued in only six years up to 1818, and in quantity only in 1805-07, to a combined total of some 650,000 pieces. The 1796 draped bust-small eagle type did not carry an indication of value, a trait the quarter shared with the draped bust half dime and dime issues, but the designation "25 C" was added at the base of the reverse with the introduction of the heraldic eagle design when the denomination was next minted in 1804.

LIBERTY SEATED QUARTERS

This design was adapted to the quarter in 1838, the year after it was adopted for the lesser fractional silver issues, following the enactment of the January 18, 1837, law which reduced the weight of the coin from 104 grains to 103 1/8. In conformity to the other statute changes for silver coins, the weight was again lowered to 96 grains in 1853, then increased slightly to 96.45 in 1873. Rays were added in the field around the eagle on the reverse, in addition to the arrows at the date, on the reduced weight 1853 issues. Although the arrows were retained for 1854 and 1855, the rays were dropped. Arrows were again added at the dates in 1873 - 74 to mark that weight change.

BARBER QUARTERS

Sticking with the tradition of the previous 100 years, during which time the same basic design was carried on all silver units, Barber's Liberty head design was also offered on the quarter in 1892. The larger size of this coin, coupled with the lawful requirement that an eagle be represented on all denominations above the dime, enabled the placement of an eagle on the reverse in substitution for the wreath on the new dime.

STANDING LIBERTY QUARTERS

In 1916 Hermon A. MacNeil's beautiful standing Liberty design for the quarter, which was unfortunately extremely susceptible to wear, was introduced. The devices for this coin were reworked several times in an effort to provide better wearing qualitites. The first version, minted in 1916 and early 1917, offers the date atop a raised pedestal below Liberty's feet and presents the eagle low in the field on the reverse. In 1917 the design was reworked for the first time, the most obvious change being in the positioning of the eagle with three stars beneath. This style was continued through 1924, then in 1925 a third version was created by recessing the date in the pedestal beneath Liberty's feet so that it would not wear so easily.

Specimens of the Variety II coinage featuring full head detail command substantial premiums over those of average uncirculated pieces.

WASHINGTON QUARTERS

Offered in 1932 as a commemorative of the 200th anniversary of Washington's birth, this John Flanagan design was perpetuated as a regular issue in 1934. Flanagan, whose initials appear on the base of the bust to the right of the date, holds the distinction of being the last private artist to author a design for a regular issue U.S. coin with a precious metal content. His work survives on the cupro-nickel clad copper quarter introduced in 1965 which has the dual distinction of being the first clad metal issue to be placed in production — August 23 — and in circulation — November 1.

HALF DOLLARS

The half dollar was an important product of the mint during its early years, primarily because during a period of more than thirty years beginning in 1805 it was the only coin which was available for large transactions. Aside from sporadic issues of $2.50 and $5 gold pieces during the period, no other large silver or gold coins were produced from 1804 to 1838. Half dollars were issued annually during this period, excepting 1816 when a disasterous fire at the Philadelphia Mint caused a suspension of all precious metal coinage, but most were used only to transfer funds from one bank to another.

The Liberty cap design first engraved by John Reich was introduced to U.S. coinage on the 1807 half. During the period of these issues, 1807-39, the annual production of halves was so substantial that the totals generally exceeded those of the next 35 years by a significant margin. As this was the day of hand engraved dies, the die varieties for most dates are quite numerous, and the series has been extensively collected according to these varieties. In the listing which follows we have enumerated only the most popular of the over 600 known varieties.

The closing years of this type were rather historic ones. First, in 1836 the coin was converted from a lettered edge type to one with reeded edges, at the time the mint was converting to steam power, with new obverse and reverse devices being adopted, with "50 CENTS" placed beneath the the eagle in place of "50 C." Second, in 1837 the weight of the coin was lawfully reduced from 208 grains to 206¼ and the fineness raised from .8924 to .900. Third, in 1838 the designation of value on the reverse was changed to "HALF DOL." The latter year also marked the inauguration of half dollar production at New Orleans, although the 20 specimens said to have been struck do not appear in the official mint report.

LIBERTY SEATED HALVES

The Liberty seated half dollar series followed the same course as did the quarter series of this type. The reduction of its weight from 206¼ grains to 192 in 1853 was marked by the placing of arrows at the date on the 1853-55 issues, while rays were also present on the reverse in 1853, then arrows were again used at the date in 1873-74 to mark a weight increase to 192.9 grains.

Although the 1861-O half has a total recorded mintage of 2,532,633, only a small fraction of that quantity actually constitute U.S. issues. The mint was seized by the government of secessionist Louisiana on January 31, after 330,000 halves had been struck under the U.S. government. From then until the mint was transferred to the Confederacy in April, another 1,240,000 halves are recorded as having been struck. Before the mint's operations were closed out on May 31, another 962,633 pieces were produced, plus four trial strikings of a distinctive Confederate half dollar design which was never placed in production.

BARBER HALVES

The Barber half is identical in design to the quarter, and was issued over the same period of time as it and the dime, excepting that none were minted in 1916.

WALKING LIBERTY HALVES

Designed, like the new dime introduced in 1916, by A. A. Weinman, whose monogram appears near the rim beneath the eagle's tail feathers on the reverse, this coin expresses the bold character of America in the early 1900s. Its only distinctive aspect is the fact that on the 1916, and some 1917 issues the mint mark appears on the obverse. From 1921 to 1934 its issue was sporadic and restricted to the branch mints.

FRANKLIN HALVES

The Franklin half, with its Liberty bell reverse reminiscent of the design carried on the sesquicentennial commemorative half of 1926, was designed by then chief mint engraver John R. Sinnock, whose initials appear on the truncation of the bust. The series was ended prematurely in 1963 when Congress called for a switch to an issue honoring President John F. Kennedy who was assassinated on November 22, 1963.

KENNEDY HALVES

This young series already has an interesting history. Thus far it has been issued in three metal varieties — .900 fine silver in 1964, .400 clad silver from 1965 through 1970, and cupro-nickel clad copper commencing 1971 — and with mint marks on both the reverse (1964) and the obverse (from 1968). It also offers a 1970-D issue produced only to satisfy the collector set demand. Still, in just eight years of issue the quantity minted has exceeded the total combined production for the previous 170 years. The obverse for the coin was designed by Gilroy Roberts, whose stylized initials appear on the base of the bust, and the reverse by Frank Gasparro, whose initials appear beneath the eagle's left leg.

SILVER DOLLARS

The silver dollar provided the base from which all other coins in the nation's currency system, as established by the act of April 2, 1792, was calculated, with gold coins provided for on a ratio of 15 to 1 from this standard. In name, our dollar's origins can be traced to the late 1400s when the first large silver coins — Joachimsthalers — were produced in Germany, while it was patterened after the Spanish milled dollar which predominated in the Western Hemisphere in the late 1700s.

The pure silver weight of the dollar coin was set at slightly more than 371 grains, with the total weight of the .8924 fine coin being 420 grains, or approximately the same as the prevalent standard for the Spanish milled dollar of the day. There was, however, enough of a differential to provide for a profitable trade in the export of U.S. silver dollars in favor of Spanish dollars, which could be turned into the mint for recoining at a profit.

This situation ultimately led to the suspension of silver dollar mintage in just ten years persuant to an order issued by President Thomas Jefferson on March 28, 1804. Prior to that time a quantity of 19,570 dollars had been struck using 1803 dies, but none dated 1804. The use of dies dated for the previous year early in the following year was a common practice at the time, as all dies were used until they were no longer serviceable.

Dollars dated 1804 do exist, however, there being a total of 15 known in three varieties. The first known specimen to surface was obtained from the mint by Matthew Stickney in 1843 in exchange for a coin needed for the mint cabinet. This was one of eight so-called "originals" produced in 1834-35 to insert in special presentation proof sets which had been requested by the Secretary of State. The seven so-called "restrikes," six of one variety and one of another, were produced around 1859 by mint officials intent on serving the needs of collectors who wanted specimens of the coin.

GOBRECHT PATTERNS

In anticipation of a reduction in standard for the silver dollar which would allow its reintroduction, as a similar move in 1834 had allowed the Mint to reintroduce the production of gold coins which would circulate, officials sanctioned the development of patterns for the issue. The preparation of the new designs was placed in the hands of Christian Gobrecht, who engraved the work of artists Thomas Sully (obverse) and Titian Peale (reverse).

Several patterns dated 1836 were prepared from Gobrecht's designs, in silver and copper, plain and reeded edges, with the engravers name both on and below the base of Liberty, and with the eagle both in a field of stars and plain, only one of which is normally encountered. About 1,000 examples in silver, plain edge, Gobrecht on base and with the eagle in a field of stars were struck. Several similar patterns were again prepared in 1838 and 1839 with an arc of 13 stars added to the obverse and the engravers name removed. These obverse designs are the same as were adopted for the other silver values in 1837 without the stars, and revised with stars added in 1838.

LIBERTY SEATED DOLLARS

With the lawful content of the silver having been reduced to 412½ grains from 416, in raising the fineness to .900 to facilitate fabrication, by the new coinage law of January 18, 1837, the minting of the dollar was renewed in 1840. Production of the coin remained nominal, however, until its issue was discontinued by the coinage law of February 12, 1873, in part because enactment of the February 21, 1853, law which reduced the relative bullion contents of the fractional silver issues left the dollar, at 412½ grains, worth more than its face value.

TRADE DOLLARS

The trade dollar is the only U.S. monetary obligation that has ever been, in effect, demonetized. Although this 420 grain, .900 fine silver coin was originally authorized by the act of February 12, 1873, to compete with other trade coins of the day in the Orient, it was also provided with legal tender status. The legal tender provision was erased by a June 22, 1876, law which restricted future production of the coin to export demand.

Enactment of the coinage act of February 28, 1878, authorizing the restoration of the standard silver dollar brought an end to the production of the trade dollar, except for proofs which were struck through 1885. An act of March 3, 1887, repealed the trade dollar provisions and provided for their redemption. Under the provisions of this law $7,689,-036 of the coins were redeemed at face value for recoinage into standard dollars and subsidiary coins, with all that remained outstanding reverting to bullion value.

MORGAN DOLLARS

A five year lapse in the minting of standard silver dollars was ended by enactment of a February 28, 1878, coinage law, which held the metallic content of the coin to its former standard. Issue of the standard dollar had been halted in favor of the trade dollar, a slightly heavier coin authorized on a standard designed to allow it to compete with the dollar size coins of other nations in the Orient trade.

The 1878 turn around, achieved by the silver interests who had witnessed a rapid decline in the value of their commodity, ushered in the era of the silver dollar. In the years that followed the Treasury was required to purchase and convert into dollar coins such large quantities of silver that the available

supplies far exceeded the demand, even for the Silver Certificate issues which they backed.

The initial mintages were authorized by the Bland-Allison Act, and that measure was followed in 1890 by the Sherman Act, and the War Revenue Act of 1898. With the exhaustion of the government's bullion stock in 1904 production of the silver dollar was again discontinued, to be renewed in 1921 under provisions of the Pittman Act of 1918. Under the provisions of this act over 270 million Morgan dollars were melted down for export and recoinage into subsidiary coins, accounting for the several scarce issues in the Morgan series which have coinage records of a million or more pieces.

PEACE DOLLARS

The new Peace dollar, featuring the word PEACE on the rocky crag upon which the eagle is perched and dedicated to a world thought to be at permanent peace as a result of the war to end all wars, was designed by Anthony De Francisci, whose signature appears below the truncated bust of Liberty. Credit for the release of this new design rests at least in part with the American Numismatic Association and Farran Zerbe, a veteran numismatist and frequent participant in government numismatic projects.

The new coin was placed in production in mid-December of 1921, with over a million pieces being produced by year end, and released on January 3, 1922. Its coinage continued uninterrupted until 1928 when the slackening of demand for the coin for circulation purposes and as backing for Silver Certificates demanded a suspension. An Agricultural Adjustment Act of May 12, 1933, and a subsequent Silver Purchase Act of 1934, calling for the receipt

of silver on a war-debt account and requiring its conversion into silver dollars, caused a renewal of coinage in 1934-35.

At this point the new Silver Certificate series of 1934 was launched which certified that "one dollar in silver" backed the issue, rather than "one silver dollar" as in the past. This ended any need for the silver dollar as currency backing. Treasury vaults bulged with the coins until the early 1960s, when the value of silver increased to a level where it became attractive for people to redeem their Silver Certificates for silver dollars.

A last issue of .900 fine silver dollars was authorized on August 3, 1964, but the projected 45 million example edition was never produced. The issue of this coin had been debated by the Treasury and White House for more than a year, before a permanent delay in its production was announced on May 25, 1965. Before that happened, however, dies were prepared (presumably of the Peace dollar design) with the 1964 date, and sample production runs were carried out at the Denver Mint. No examples are known to exist, Mint officials reporting they were all destroyed.

EISENHOWER DOLLARS

The new Eisenhower dollar was created to serve the immediate needs of the Nevada gaming industry, and the future needs of the vending industry. In addition to being minted for circulation in the cupro-nickel clad copper composition, silver interests were able to give the issue a tie to the dollar's historic past by providing for special limited issue uncirculated and proof editions of the coin to be offered, at premiums, in .400 fine silver. Designed by Frank Gasparro, the Eisenhower obverse is tied to an Apollo reverse which pays tribute to the nation's space program, and particularly the Apollo 11 moon landing of July 20, 1969, which commenced during the administration of President Eisenhower.

GOLD DOLLARS

The issue of a gold dollar unit was not authorized in the original national coinage law of 1792, although a legal tender ratio of 15 to 1 between silver and gold was specified therein. It was to materialize in 1849, under an act dated March 3, largely at the instigation of the influential gold lobby spawned by the general opposition to bank money and the California gold rush. During its 41 year life the issue was to be offered in three basic types, all of which were designed by James B. Longacre. The gold standard was .900 fine, with the first type being thicker and 2mm smaller in diameter than the others.

The gold dollar soon became a circulating coin, where the silver dollar had not, as the relative value of gold declined due to the large quantities being mined from the California fields. By the mid-1860s the ratio had begun to slide back and the issue of gold dollars abated. During the Civil War the issue was all but halted, as both silver and gold coins disappeared from circulation, a situation which prevailed until the resumption of specie payments in 1876. By that time the silver dollar was the coin of issue and the gold dollar was allowed to linger until its life was legislatively ended by an act of September 26, 1890.

QUARTER EAGLES

The quarter eagle or $2.50 gold piece, along with its sister multiples of $5 and $10, was authorized by the original coinage law of April 2, 1792. Its stipulated weight was 67½ grains of .916 2/3 fine gold, where it remained until the standard was changed to 64½ grains at .899225 fine by the act of June 28, 1834, the latter being subsequently revised to .900 fine by a law of January 18, 1837.

The Liberty cap type, which was designed by Robert Scot, did not carry a designation of value. The Turban head design of John Reich introduced in 1808 carried the designation "2½D." on the reverse below the eagle and proved to be the last issue for 13 years as the increasing value of gold was driving the coins from circulation as soon as they were released. A small coinage was resumed on a sporadic basis in 1821 with the coin reduced significantly in size, but maintained at the former weight and fineness standards.

The new standards specified by the law of 1834 led to the introduction of a new design featuring the Li-

berty band holding the hair, but with the turban removed, executed by William Kneass. This coin became a regular issue, with the quantities produced increasing significantly.

CORONET QTR. EAGLES

In 1840 the quarter eagle was redesigned by Christian Gobrecht to conform to the style of the half eagle and eagle. This design was to survive, largely unchanged, for 68 years. The series encompasses one of the more interesting regular issue U.S. coins, the 1848 CAL piece, an issue of 1,389 coins counterstamped after minting with the mark "CAL." on the reverse above the eagle to designate that they were struck from a 230 ounce shipment of gold sent to Secretary of War Marcy by Col. R. B. Mason, the military governor of California.

INDIAN HEAD QTR. EAGLES

This $2½ gold piece, and its sister $5 issue, has the distinction of presenting a design on which the relief is recessed below the surface of the field. It is the work of Bela Lyon Pratt.

THREE DOLLARS

Authorized on February 21, 1853, this unpopular issue survived 36 years despite the fact that more than 100,000 examples were produced only in the first year. The coin's only logical application was to purchase sheets of 3-cent stamps, the adoption of that postal rate having led to the introduction of the silver three cent piece two years earlier. The designs are by James B. Longacre.

STELLA

This coin, in reality simply a pattern coin, is one of the more intriguing products of the United States Mint. Its standing is much akin to that accorded the 1856 Flying Eagle cent, which was also nothing more than a pattern, although it ultimately enjoyed a short life of active issue. While the stella never emerged as a coin-of-the-realm issue, many collect it as an adjunct to the gold coinage series.

First envisioned by John A. Kasson, U.S. Minister to Austria, the stella was intended as an international coin issue which would tie our coinage to the Latin Monetary Union formed in Europe in 1865. The purpose of the LMU was to standardize coinage systems, and the stella was approximately equivalent in value to France's 20 francs, which was the base unit of the Union, along with Austria's 8 florins, Holland's 8 florins, Italy's 20 lire and Spain's 20 pesetas.

The issue — "stella" is Latin for "star," the latter being the central feature on the reverse of the coin — materialized through the efforts of Dr. W. W. Hubbell who held the patent on the "goloid" coinage metal (gold, silver and copper in combination) used in the coins. Two types of patterns were prepared in both 1879 and 1880, a flowing hair design by Charles E. Barber and a coiled hair type by George Morgan. Only the 1879 Barber flowing hair type was produced in quantity, with 400 examples being prepared for the review of Congress. A few examples of each were also struck in aluminum and copper, and in one case white metal.

Date Type	Mintage	Proof	Date Type	Mintage	Proof
1879 Flowing hair	415	$7,000	1880 Flowing hair	15	RARE
1879 Coiled hair	10	RARE	1880 Coiled hair	10	RARE

HALF EAGLES

The history of this denomination closely parallels that of the quarter eagle, with the legal specifications always being double those of the lesser value. The Turban head design was issued regularly, although in small quantities, however, from the time of its introduction in 1807 to 1834. The large issues of the 1830s are a direct result of the mining activities in the southeast during the period. Again, the major change in standard instituted in 1834 led to the introduction of a new design featuring the Liberty head without a turban.

CORONET HALF EAGLES

When this new design by Christian Gobrecht was introduced in 1839 the diameter of the coin was reduced by slightly less than 1mm. The basic design was to survive until 1908, with the motto "In God We Trust" being added above the eagle on the reverse in 1866.

INDIAN HEAD HALF EAGLES

This design by Bela L. Pratt, as was the case with the like design for the $2.50 gold piece, materialized as a direct result of President Theodore Roosevelt's interest in fathering the development of a more artistic coinage.

EAGLES

The highest denomination ($10) coin authorized by the original coinage act, this unit was not minted during the years 1805 through 1837 because it could not be maintained in circulation. The legal 15 to 1, silver to gold ratio at which it was minted had been exceeded in the world markets, meaning the nation's gold coins were undervalued in terms of silver, causing them to flow out of the country.

1804	3,757	600.00	800.00	1000.00	1400.00

CORONET EAGLES

Enactment of the 1834 law which significantly reduced the fine gold content of all U.S. gold coins enabled a resumption of eagle coinage in 1838. This signalled the first introduction of the Coronet design by Christian Gobrecht, which except for the addition of the motto "In God We Trust" over the eagle on the reverse survived until 1907.

INDIAN HEAD EAGLES

Another of the coin designs directly attributable to President Theodore Roosevelt's instigation, this issue was designed by Augustus Saint-Gaudens, America's leading sculptor of his day. The initial issues did not carry the motto "In God We Trust" because the President personally objected to its use on coins, but it was restored through Congressional pressure in 1908. Unlike the reeded edges carried on all other gold coins, excepting the Saint-Gaudens double eagle, this coin carries raised stars; 46 from 1907-11, then with the admission of Arizona and New Mexico to statehood, 48 commencing in 1912.

CORONET DOUBLE EAGLES

The largest regular issue U.S. coin, the $20 gold piece was born as a direct result of the economic realities of the development of the California gold fields. Its standard is exactly double that of the eagle, at 516 grains .900 fine, and it was authorized by the act of March 3, 1849.

Like the other Coronet designs, this one is the work of Longacre, with the motto again being added in 1866, then a switch to a fully spelled out denomination being made in 1877. The only issue of particular note in the series is the 1861 and 1861S offering with a distinctively different reverse, distinguished by its tall, slim letters, executed by A. C. Paquet but quickly withdrawn from production.

SAINT-GAUDENS $20

Perhaps America's most beautiful coin, the production issues of the Augustus Saint-Gaudens double eagle pale in comparison with his original models and the rare 1907 high relief strikes which could not be suitably struck up in production. The 1907 issue also includes varieties with Roman numeral dating, while the 1907 and some 1908 issues do not bear the motto "In God We Trust." The motto "E PLURIBUS UNUM" is carried on the edge.

COMMEMORATIVES

The following coin issues were specially produced to commemorate historic anniversaries, events and people, and to help finance civic memorial projects. The series was launched as one contribution to the nation's observance of the 400th anniversary of Columbus' discovery of the New World. Off to a sputtering start — the series encompassed only seven subjects by 1920 — in the 20s the series began to live with significant historical integrity, only to be killed through over expansion of a good thing in the 30s. As a result of various abuses, only two issues have been offered since 1938, the Iowa centennial issue of 1946 and the Booker T. Washington-George Washington Carver series of 1946-54.

A complete type set of commemorative halves comprises 48 pieces — date, mint mark and star varieties bring to 142 the number of pieces required for a complete collection — to which may be added one quarter and a silver dollar. In addition there are nine gold dollars in five issues (six distinctively different pieces), plus two quarter eagles and a pair of fifty dollar gold pieces.

The mintage figures provided in the following listing are net, with the melted examples of various issues having been deducted from the original mintage figures. All prices are for uncirculated specimens, excepting in the gold listings. Commemoratives which have been in circulation or mishandled, but which grade extremely fine, are usually valued at less than half the quoted figures, while specimens of most issues grading at a lower level command little premium.

NORSE AMERICAN CENTENNIAL MEDAL

This congressionally authorized silver medal is often collected as a part of the U.S. commemorative half dollar series. The issue was limited to 40,000 examples, which come in both thick and thin versions. Some examples with a silver finish were produced in a larger size, as were some smaller gold examples.

PROOF SETS

Proof sets are composed of specially minted coins representing the ultimate in the minter's art. Proof coins — the term relates to the method of manufacture, not the condition of the coin — are characterized by a sharpness of detail, a bold, squared-off edge and, generally, a mirror-like surface. This result is achieved through the utilization of specially selected and polished coinage blanks and dies, in combination with multiple striking (usually double) on special presses.

The scope of the listing which follows is limited to proof set issues of the modern era (i.e., commencing in 1936), although the U.S. Mint has annually offered proof sets and individual coins to the public since 1858. Those issues of the pre-1936 era are seldom encountered in sets, and when sold the individual coins are generally scaled from $100 sharply upward. Valuations for these individual coins (the regular issue of proof coins was suspended from 1916 to 1936) are incorporated in the regular date listings of this guide.

Proof examples of our earliest coin issues, of varying qualities, are known to exist. Commencing in the 1820s it is known that at least a few proof examples of most of the annual coin issues were produced for diplomatic presentation proof sets, while some also found their way into collector hands. Proof coins issued through 1906 have the characteristic of frosted surfaces on the raised design areas, set against a mirror-like background. During the next ten years the Mint experimented with a variety of effects, including satin, matte and sandblast finishes which offer dull surfaces.

The proofs issued since 1936 are generally termed "brilliant proofs," most of the individual coins possessing uniformly brilliant mirror-like surfaces. Sometimes one or more coins in a set may offer the raised surfaces with frosted features. These represent early strikes from new proof dies, and command a premium value in excess of that for the standard proof strikes. Proof coins have been sold only in sets since 1950; individually cellophane wrapped in cardboard boxes 1950-55, in sealed pliofilm packets 1955-64, and in sealed plastic cases since 1968.

During the years 1965-67 when the Mint was offering neither proof or mint sets, it offered Special Mint Sets. The quality of the 1965 sets in pliofilm packets was quite low, but an improvement was made in 1966-67 when the sets were offered in plastic cases, and possessed a proof-like appearance. Today these SMS Sets are widely collected with the proof set series. Proof set issue was also suspended during the years 1943-49 without substitution.

Prior to 1968 all regular proof coins were produced at the Philadelphia Mint, but since that time they have been offered as products of the San Francisco Assay Office minting facility. A score or so of proof coin issues, all unique or extremely rare, have also been attributed to the various branch mints where they were struck for special occasions.

MINT SETS

Mint sets consist of one coin of each denomination, from each mint, produced during a given year. These uncirculated quality coins may or may not have been assembled into a set by the Treasury's Bureau of the Mint. Treasury assembled sets through 1958 were packaged in die-cut cardboard holders with a high sulphur content, and as a result the coins usually tarnished badly. These sets actually contained two examples of each coin of regular issue. Commencing in 1959 the Treasury's sets, offering only one specimen of each coin struck for the year, are sealed in pliable cellophane packets variously identified as to their origin. Nicely preserved "Treasury" sets of 1946 through 1964 generally command a 15 to 20 percent premium above the listed prices. The Treasury did not offer mint sets during the 1965-67 years of the SMS Sets, but renewed the offering in 1968.

The mintage figures listed above document only the Treasury produced sets, while the valuations are strictly tied to the combined values of the individual coins contained in a given set. For this reason in some instances valuations are often at considerable variance with the quantities of issue listed. When an asterisk (*) appears in the mintage column no sets were reported as produced by the Treasury, all existent sets having been privately assembled. The official production figure reported for 1949 undoubtedly represents the combined Treasury issue of mint sets for the years 1946-49.

URUGUAY

Uruguay is on the east coast of South America and is officially called the Oriental Republic of Uruguay. It takes in 72,172 square miles and has a population of 2.9 million. The capital is Montevideo on the Atlantic Ocean.

The name of the country is due to the Spanish language and the location on the eastern side of the Uruguay River. It is on the "banda oriential" or eastern shore as in the Spanish language "oriential" indicates eastern. The early history of Uruguay is not much different from histories of other South American countries taken by the Spanish or the Portuguese. It was a constant struggle for control. In 1820 Jose Cervasio Artigas a national hero led an unsuccessful attempt to gain autonomy. It was in 1828 that independence was finally achieved.

100 centesimos = 1 peso.

VATICAN CITY

Vatican City occupies 109 acres in the city of Rome, Italy. It is the smallest state in the world according to some sources. The population of Vatican City is about 1,000. Citizenship usually goes to such persons who are normally resident in Vatican City for reason of office or employment, and, with certain restrictions, to their families. Italian is the official language, but official acts are written in Latin for the Holy See.

Pope Paul was the 263d Pope who took office in 1963. For many years, prior to Italian unification, the Popes held sway over Papal States in Italy. In 1861 at the general unification, all of the territories were acquired by the kingdom. The Pope was confined to Rome. In 1870 Rome was incorporated into the kingdom. In 1871 the Italian Parliament enacted the Law of Guarantees which gave special status to Vatican areas. A dispute lasted from 1871 to 1929 about that status when it was cleared by agreement.

The Vatican City issues coins and stamps—100 centesimi equal 1 lira.

VENEZUELA

Venezuela is located on the northern coast of South America. It has an area of 352,150 square miles and a population of 9.9 million. The capital is Caracas.

Venezuela was discovered by Columbus in 1498. It has the distinction of being the first colony in the New World to revolt against Spain. This occurred in 1810 but it took until 1821 for independence to be achieved. Venezuela joined Colombia, Panama and Ecuador in the "Great Colombia" union until 1830 when it separated and became a sovereign state. Political instability marks this South American country as it seems to have done with the others in the area. The country consists of 20 states, a Federal District, two Federal Territories and certain islands in the Caribbean which are Federal Dependencies.

100 centimos = 1 bolivar.

VISCAYAN REPUBLIC (SPAIN)

Biscay or Vizcaya is a maritime province in northern Spain. The area is 836 square miles and the population at the time of the Spanish Civil War in 1936-39 was less than 500,000. The capital of the province is Bilbao.

The coinage of this province was issued for a short period of less than one year. The province set up an autonomous Basque government on October 8, 1936 in Guernica. This was done at the very outset of the civil war. Over the years, with a history back to 1300, the province had gained certain rights with self government and financial autonomy (granted in 1925). With the Spanish Civil War they extended their rights. In June, 1937 when the insurgent forces entered Bilbao they lost all of their past favors and the Viscayan Republic came to an end. The importance of the province is based on the iron ore production.

Their coinage was nickel and dated 1937.

WESTERN AFRICAN STATES

French West Africa at the end of 1958 was divided into seven republics, with the exception of Guinea which had become independent. All of the republics at the time belonged to the French Community. They were Mauritania, Sudanese Republic, Senegal, Ivory Coast, Upper Volta, Dahomey and Niger. As a political group of French West Africa they ceased to exist on January 21, 1959, by 1962 all of the states had been granted independence.

French influence in Africa remains strong and coinage is still issued for the West African States and is the CFA franc or Colonies Francaises d' Afrigue franc. The inscription on the coinage is "Banque Centrale des Etas de L'Afrique de L'Ouest," or Central Bank of the Western African States. The countries that use the CFA franc 50 to the French franc are Dahomey, Senegal, Togo, Niger, Islamic Republic of Mauritania, Ivory Coast and Upper Volta.

WESTERN SAMOA

The independent State of Western Samoa is a small island group in the South Pacific Ocean. It has a total land area of 1,090 square miles with an estimated population of 135,000 governed from the capital city of Apia on the island of Upolu.

Samoan people settled on the island group as early as 100 BC but their modern history goes back to AD 1250. European contact began in 1772 with the Dutch. Between 1847 and 1861 the U.S., Britain and Germany established contact. Due to a dispute over the succession of the throne in 1900 the U.S. annexed Eastern Samoa and Germany received Western Samoa. In 1914 New Zealand took Western Samoa (WWI) and in 1919 was granted a mandate and by 1921 New Zealand made provisions for civil administration. Since January 1, 1962 Western Samoa has been independent. The U.S. still controls the Eastern section. 100 Sene equal 1 tala on Western Samoa who converted to decimal currency in 1967.

YEMEN

Yemen is on the southwestern corner of the Arabian Peninsula. It has an estimated area of 75,000 square miles and about 5 million persons. The capital is San'a.

No official census has ever been taken in the country. This is not unusual for many of the countries in the world. Official sizes of countries vary due to boundary disputes or to errors in surveying. Yemen is one of the oldest centers of civilization in the Near East. It is in the territory that was once part of the Kingdom of Sheba. Christian and Jewish societies have evolved in various parts of Yemen. From the 16th century onward to 1918 the Turks had control or occupation of Yemen. Currently the country is trying to form a constitution and have elections but has been unable because of political unrest.

Yemen wants to eliminate the use of the Maria Theresa thaler. They use 40 bogach = 1 ahmadi = 1 ryal or M.T.T, on coinage which shows the official Arabic language.

YUGOSLAVIA

The proper name for this country is Socialist Federal Republic of Yugoslavia. It has an area of 98,801 square miles with a population of 20.6 million. The capital is Belgrade.

Yugoslavia came into existence December 1, 1918 after WWI, and with the dissolution of the old Austro-Hungarian Empire. Borders of the nation—at that time called the Kingdom of the Serbs, Croats and Slovenes—took in the five principal slav groups. Currently the country is composed of six republics, Serbia, Croatia, Slovenia, Bosnia-Herzegovina, Macedonia and Montenegro. The languages of the country are Slovenian, Macedonian, Serb-Croatian.

The country name on the coinage is Jugoslavija but in letters of the cyrillic alphabet. 100 para = 1 dinar.

ZAMBIA

Zambia was formerly Northern Rhodesia in the southcentral portion of Africa. It has a total land area of 290,000 square miles with a population of 4.1 million. The capital is Lusaka.

The portion of south-central Africa that is Zambia was not visited by Europeans for centuries. Livingstone saw Victoria Falls in 1855 to be the first European to see the falls, In 1888 the British obtained the mineral rights and in 1895 under the British South Africa Company the area was named Rhodesia. After being involved with a federation, independence was achieved on October 24, 1964. Zambia was the first British territory to become a republic upon attaining independence. The country is the world's third largest producer of copper.

The monetary unit is under the decimal system adopted in 1968 which made 100 ngwee equal to 1 kwacha.

ZANZIBAR

Zanzibar is an island off the coast of Tanzania which is on the Indian Ocean. The island is 20 miles from the coast. It is an island of 640 square miles (53 miles long and about 24 miles wide). Along with Zanzibar was the island of Pemba and the pair of them made up 1,000 square miles in a single British Protectorate in the Indian Ocean, which was included in the political division of British East Africa. The main cities on Zanzibar are Zanzibar and Koani. The one big product is cloves and one of the main problems in the 1950s was the protection of the cloves from disease.

The coinage that was issued in Zanzibar was by the sultan. The legends were in Arabic and the dating system used was AH. Coins were planned to be issued by the British Protectorate but were withheld.

APPENDIX A

NON-CIRCULATING LEGAL TENDER COINS

Including individual proof coins, proof sets and non-circulating legal tender (NCLT) proofs and proof sets. All are silver unless otherwise stated. In the case of proof sets that are not otherwise indicated the coins are of regular designs of the circulating coinage of the country. Most proof sets are housed in specially prepared presentation cases, boxes or other type packaging.

STANDARD CATALOG OF WORLD COINS

This catalog fills a deficiency which has significantly tempered the growth of the constantly expanding interests of American hobbyists in the collecting of world coins — the absence of a single comprehensive standard catalog all collectors could turn to as they sought guidance, be they beginners seeking a series to collect, novices collecting by type or graduates to date collecting pursuits. The pages of this volume chronicle the complete story of the world's coinages commencing in the mid-1800s, thus encompassing the coin issues which evidence the greatest overall collector interest.

The keynotes to which this work is tuned are visual identification of coins, accurate values which reflect the American market and comprehensive listings by date, including many previously unrecorded type and quasi-coin issues which provide puzzlement to the uninitiated. Included between these covers are more than 15,000 original coin photos — about 95 percent of the listed coin types are fully illustrated — representing the most ambitious coin photographing project ever undertaken. Listings are arranged in the logical denomination-date of issue sequence long employed in the cataloging of U.S. coins.

Contributors to this catalog have prepared original date listings on a string of countries including France, Germany, Switzerland, Russia, Morocco, Tunisia, Egypt, the Sudan, Turkey, Iran, Afghanistan, Siam, Nepal, Tibet, British India and the native states. The China section is by far the most comprehensive ever presented, as is a fully detailed, logical arrangement of the often bewildering counterstamped and early coin issues of the states of the Arabian peninsula. The work has been assembled by the experienced professional team which brings the hobby *Coin Prices*, the standard guide to all U.S. coin values, *Numismatic News Weekly*, the monthly *Coins* magazine and selected specialized numismatic books.
